A CARD FROM The American Watch Company.

WALTHAM, MASS.

THIS Company beg leave to inform the citizens of the new dominion of Canada. that they have made arrangements to introduce their celebrated Watches to their notice. They are prepared to prove that their watches are made upon a better system than others in the world. They commenced operations in 1850, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs over 700 operatives. They roduce 75,000 Watches a year. and make and sell not less than half of all the watches sold in the United States. Up to the present time, it has ton, Mass., Rev. Patrick V. United States. Up to the present time, it has been impossible for them to do more than supply the constantly increasing home demand; but recent additions to their works have enabled them to turn their attention to other

Watches are made almost entirely BY HAND. In them, all those mysterious and infinitesimal organs when put together create the watch, are the result of slow and toilsome watch, are the result of slow and toilsome sity a lack of uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skilful operative must vary. But it is a fact that, except watches of the higher grades, most European watches are the product of the cheapest labor of Switzerland, and the result is the worthless Ancres, Lepins and so-called Patent Levers—which soon cost more in attempted repairs, than their original price. Common workmen, boys and women, buy the rough separate parts of these watches from various factories, polish and put them together, and take them to the neasest watch merchant. He stames and engraves them with any name or brand that may be ordered—whether London. Paris, Geneva or what not; and many a man who thinks he has a genuine "M.I. Tobias, of Liverpool," (whose only fault is, that he can never regulate it to keep very good time), is really carrying a cheap and poor Swiss imitation.

And the stame of the conductor and enginedriver.

The Princess of Wales leaves England in the second week in August. Her Royal Highness will proceed on board than their original price. Common workmen, boys and women, buy the rough separate

How American Watches are Made. The American Watches are made.

The American Watchis made by no such uncertain process—and by no such incompetent workmen. All their operations from the reception of the raw materials—the brais, the steel, the silver, the gold and the precious stones—to the final completion of the Watch, are carried on under one roof, and under one skilful and competent direction—

But the great distinguishing features of their.

MR. WARNER'S STORE.—We would direct notice to Mr. Warner's advertisement of his store at Rockwood. He has enlarged his establishment, got a full supply of groceries and hardware, and we are sure that he will be found a most agreeable and upright man with whom to do business.

to do business.

LUNACY:—Yesterday (Friday) a man named Richard Ward, a resident of Garafraxa, was brought to Guelph gaol, a very violent lunatic. The cause of the malady issupposed to have been religious excitement. Application has been made for his admission to the Asylum in Toronto.

onto.

Mr D. Ormiston has resigned his situation as head master of the Berlin Grammar School, and goes to Cobourg to teach in the Grammar School of the preparatory department of Victoria University. We congratulate Mr Ormiston on his appointment.

ity. We congratulate Mr Ormiston on his appointment.

CORONER'S INQUEST.—At the inquest, which was held by Dr. Orton on the body of the boy, John Yeats, on Friday, no facts of importance were elicited from any of the witnesses beyond those we have already given in our narration of the accident. The evidence of Dr. Clarke, however, might be interesting as showing the exact extent of the injuries sustained by the unfortunate young man. Dr. Clarke being sworn said:—I was called to see John Yeats; I found his body in Presants' mill; the front bone and ribs were broken into pieces; the heart was lacerated and protruded externally; the lungs were also torn; the bowels were pushed out of the abdomen, and the left arm was frightfully lacerated. All these injuries were likely to be produced by the body being caught in the cogs of the wheel, and were sufficient to cause death. The jury returned a verdict of "Accidental death." and at the same time Mr. Presant was cautioned against allowing the boys to go bathing by a way in which there was so much danger.

GUELPH EVENING MERCHRY:—Guelph how beasts of two dally naneers—each of

GUELPH EVENING MERCURY :- Guelph now boasts of two daily papers—each of which is a great deal better than the othwhich is a great deal better than the other-er—in the opinion of their respective friends and supporters. On the 20th ult-the publishers of the Mercury issued the first number of a daily evening edition of that paper, since which time it has made first number of a daily evening edition of that paper, since which time it has made its appearance as regularly as clockwork, to the delight of its friends and the savage chagrin of its coalition-loving opponents. It is a handsomely printed 24 column sheet, of the anti-coalition persuasion, and in point of literary ability will compare favorably with its more pretentious city cotemporaries of barn-door dimensions. Notwithstanding it made its bow to the public quite unexpectedly, it became a general favorite forthwith, and is meeting with liberal support from the business men of the town and vicinity. Newsboys are to be seen in every direction urging the sale of the rival papers upon all who, come within reach of their voices; and meet with liberal patronage. The success of the new candidate has, so far, fully realized the most sanguine expectations of its publishers. It is intended as a permanent institution (not as a campaign sheet, as many supposed) and judging from present appearances, is likely to enjoy a long and prosperous career. So mote it be.—Gutph cor. of Berlin Telegraph.

OUT AGAIN .- The Mount Fores Examiner says it is reported that Geo. Jackson, Esq., has signified his intention of again becoming a candidate for the representation of South Grey. Another paper says that exerns are being made to induce Mr Jackson to come out again, on conditions that the expenses incurred in his election be borne by his friends. His attempts to find some outsider to undertake the hopeless task of contesting the Riding with Mr. Dalglish has groved a failure.

Police Court.

Mrs. Lappen appeared before his Worship this morning to answer a charge of being drunk and disorderly, last night, on Essex street. She had raised an awful row, and intruding on the premises of a neighbor, she got a severe thwacking.—

She had cursed and sworn with a vehemence that would rather have been experiening the effects of erysipelas. Her yells and curses had created a great deal of excitement on the street, and finally she was arrested while she was in the act of "bating" Mr Lappen. The affectionate couple perform this conjugal duty by turns. Mrs Lappen gets drunk and wallops Mr Lappen, and anon Mr Lappen gets drunk and returns the kindness.—Thus the melancholy of monotony is prevented. Being a little above the common class of offenders, the old lady refused to walk to the lock-up; she was therefore brought in a carriage—that is to say, a superannuated wheelbarrow was brought into requisition, and in it the drunken but by no means passive form of Mrs Lappen was laid, with due attention to her bodily comfort. One man played horse, while two others held her is the vehicle, and in this manner, amid much applause, she was conveyed to the inassion prepared for her, and "the likes o' her." She while two others held her in the vehicle, and in this manner, amid much applause, she was conveyed to the imansion prepared for her, and "the likes o' her." She was slightly nervous when she appeared in court this morning, and excessively thirsty. One of the constables humanely gave her a draught of what an old pedant once called aqua fontis.

His Worship—"Guilty or not guilty, Mrs Lappen "I was the worse of wine, your Honor, but I never got drunk on bad whiskey."

His Worship—"It does not matter about the kind of liquor used."

Mrs Lappen—"And was it any wonder that I was in such a state? Would you look, if you plaise, at the jaw that Simon Fitznoodle left me, and that's the fifth time he's done that same, since I have been in that house."

A witness was examined, who testified to the feet, of Mrs Lappen's disorderly.

been in that house."

A witness was examined, who testified to the fact of Mrs Lappen's disorderly conduct, and she was fined \$10 and costs. What touched her pocket so heavily touched her heart, and she wept as she went to fetch the money.

How the Work Goes on.

At the Reform committee meeting, held at Lindsay's Hotel last night, the most cheering reports were received from every Ward in town. In Guelph Township and Puslinch also the canvass is being prosecuted with the greatest energy and success. There never was the slightest doubt about securing a Reform victory, nevertheless our friends should not relax in their efforts to swell the majorities for the Reform candidates, and show their opponents how utterly futile it is for them to force on South Wellington two such extreme Conservatives as Messrs. Stone and Leslie.

A meeting of the Committee will be

A meeting of the Committee will be held at the Wellington Hotel on Tues-day night. We hope every member will make a point of attending.

The Crops.

The Crops.

For a number of years past, invariably as harvest approached we were told most appalling tales concerning the ravages that some of the insect tribe were making with the staple agricultural productions of Canada. Had they all been true, to the extent stated, long ere this man and beast in the country must have perished by famine. There is no doubt that there was some foundation for the assertions made, but the prospective evils were always exaggerated by gloomy imaginations. Again this year almost as soon as the wheat was in the head we were assured with all proper solemnity, and every expression of sorrow for the direcalamity which was coming upon us, that the evil has not been so immense as was anticipated, for the Fall wheat has been put into the barns, having suffered comparatively little from midge, rust, or any other cause—in short a heavier crop than usual, and damaged much less. Spring wheat does not cover the ground so thickly as it did last season; there will consequently be a deficiency in straw, (for which the unusual abundance of hay will make amends) but almost every person knows that when the spring wheat was Base Ball Match in Hamilton.

The Maple Leaf Club of Hamilton.

The Maple Leaf Club of Hamilton.

Inve got a tremendous thrashing in the game they profess to play so well. They have entered for a first prize at the Detroit tournament, but have had it pretty clearly demonstrated to them, that there was no necessity for their going so far to be beaten. The game was between them and their namesakes of Guelph, and was played on Thursday last. It should have commenced at noon, but was kept back some way or other until one o'clock; the consequence was, that as the Guelph boys had to leave at a few minutes past six, only seven innings were played, but in these they distanced their opponents so far, that the latter had not the shadow of a chance of success. The following is the score.
