

**CARTER'S
LITTLE
LIVER
PILLS.**

CURE

Stick Headache and relieve all the troubles incident to a bilious state of the system, such as indigestion, nausea, drowsiness, diarrhoea, constipation, pain in the side, etc. While their most remarkable success has been shown in curing

SICK

Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured

HEAD

ache they would be almost priceless to those who suffer from this distressing complaint, but more than that, their goodness does not end there, and those who once try them will find these little pills able in so many ways that they will not be willing to do without them. But after all stick head

ACHE

is the bane of so many lives that here is where we make our great boast. Our pills cure all these things and more. Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not grip or purge, but by their gentle action relieve all the troubles incident to a bilious state of the system. In visit 25 cents; five for \$1. Sold by druggists everywhere, or sent by mail.

CARTER MEDICINE CO., New York.
Small Pill. Small Dose. Small Price.
London, Wednesday, Feb. 26.

PROFESSOR PAUL.

The Story of a Life's Love.

"But I must not linger on these minor events lest I weary you, though to me they are laden with so much sweetness."
"When I became too advanced in my studies to continue longer at the village school, my aunt with many lowly admonitions sent me to London to complete my education. I was there nearly four years, but during no part of that time did I give any but indifferent attention to my general studies, my fondness for art leading me to devote to it every possible moment. During the last years, I occupied my time exclusively in the pursuit of painting. I had already gained some slight distinction at school when the period, during which I was to remain in London came to a close and I returned to my home at Seaton, village with any intention of a very different nature as regards my future course.

I had not remained long, however, in the quiet little place before the monotony of village life became distasteful to me, and I resolved to go to Paris.
"I told my aunt that unless my ideas and conceptions of art were to time at all events moulded under the influence of the French school I could never hope to attain eminence in my profession, and at length I succeeded in persuading her to consent to my only being accompanied by actual residence in Paris.

"Of my life there I need say little. I entered the atelier of one of the foremost French artists, and studied about two years with all the ardor of which my nature was capable. Some of my work at length was highly spoken of, and presiding upon my success, I rashly decided to paint a picture for the Salon. I sent it in and it was rejected.

"It was always of a very impulsive disposition—in excellent spirits one day, and perhaps a fit of deepest depression the next—and so, when my picture was refused, all my success was gone. I became disheartened and miserable, and in my desperation I resolved to give up art and return home. It was not long after this that I again found myself in the eventful train that runs from London down through Seaton village.

"I had not been home for nearly two years, but as I had been so long away, I felt that I should like to see my aunt and I knew that her affairs had not altered to any great degree during my absence.

"There was one change, however, that had taken place in the little economy in my aunt's household of which I was then aware, but which was destined to link itself with my future life.

"At this point the old man ceased speaking, and resting his chin upon his hands, gazed earnestly into the fire. After sitting for some time without altering his position, he slowly turned towards me and continued:

"I have often said in my heart that my life might have been made easier for me, but now I know that it was better so, and I would not have altered it if I might. No, my friend, not even if my last great secret should fail—if it will not fail, but if it should, I would not care. I would not care to prove futile; and if my long pondered calculations should be but a chain of sand; and the reality of my great plan prove only the thin vapour of a dream, I would then ask that no part of the past be changed, but that I remain. But they will not fail. My plan is not a dream. My calculations are based on facts, indisputable facts, and there was not one of them that I have not pondered over for days in nervous dread. They are true. I have authority for them, the best of authority."

"He had become quite excited, and as he continued, his dark eyes usually so dark and lustreless, assumed a brilliancy that I had never before seen in them.

"Yes, my friend, the best of authority the world has ever produced. You will quickly see that I am not mistaken when I mention such names as Carleux, Gabriel, Maunde, Geber, Artophous and Korals; and again when I speak of Virgilus, Bishop of Salzburg, whom the Archbishop of Mainz consigned to the flames as a heretic for his devotion to science, or the great geometrical and chemists, Gerbert, and Roger Bacon, and to these I might add the names of others, many of whom, like the great Virgilus, preferred rather to sacrifice their lives than learning. Can any one overrule the flames of their persecutions? And their names are handed down to us with reverence."

"I ceased speaking. During the latter part of his remarks he

had arisen to his feet, and he stood now beating his right fist against the open palm of his left hand.
"As I was quite ignorant of the plans and calculations to which he had referred, I remained silent.

"Suddenly, as though recollecting something, he turned towards me and said:
"You will pardon me, my friend, but I must leave you alone for a few minutes."

"He hastened towards the small door that opened on the hall, and went out. I listened to his footsteps upon the stairs, until they died out, and all became silent.

"I then arose, put some coal upon the fire, which had become low, for the night was cold, and then sat down in the large armchair that Professor Paul had occupied, and fell to musing upon what I had just heard.

"What could this great plan be, about which he had talked so earnestly? Why should he be doing up there? These, and many other similar questions passed rapidly through my mind. I remembered that in a restaurant one day, had made jokes at my expense, and questioned the old man's own topics; if so, I had only to wait, and he would surely mention it. An insane man would hardly keep a secret.

"I now remember to what conclusion I had come, except that I would await the subject of the picture I purposed painting that day. Now a young artist always believes his next work will be the one to make him famous, and as I was no exception, at the same moment that I began to oblige the picture, I became utterly oblivious to the subject and circumstance.

"I remember being aroused by the little clock in the outside shop striking 12. Surely light into the shop, I examined the face of the clock, and found that it was nearly two hours since he had left me.

"I could wait no longer.
"I placed a glass over the fire; pulled on my great coat; and after turning down the light went out, first taking care to spring the lock on the outside door after me.
(To be Continued.)

FUN, FACTS AND FICTION

A Judicious Compound of Wit and Wisdom.

If love is blind there is no waste of gas on it.
Carter's Little Liver Pills must not be confused with common Cathartic or Purgative Pills, as they are entirely unlike them in every respect. One trial will prove their superiority. All things have their uses. The scales over the eyes of justice are very handy in weighing evidence.

Peculiarities of the Hair.
There are times when all persons require to pay some particular attention to the hair. It is the life and energy of the roots is the world's great German hair medicine. Dr. F. W. Strong, 184 Dundas street, London, supplies fresh nourishment to the glands in the hair, and restores it to its natural color. Every druggist sells it. It is money well spent. See advertisement in another column.

The man who is able to travel extensively can generally learn enough in a year to make a bore of himself all the rest of his life.
A man's wife should always be the same and nervous and wise. Carter's Little Liver Pills, she cannot be, for they will make her feel like a different person. At least so they all say, and their husbands say so, too.

Nothing wears deeper into our endurance than waiting for somebody to make a move.
Advice to Mothers.
Mrs. Winslow's Soothing Syrup should always be used for children. It soothes the child, softens the gums, allays all pain, cures colic, and is the best remedy for diarrhoea. 25c a bottle.

Miss Pootchey Leftby: "It's a wonder Miss Leftby can be so light-hearted after playing such a mean trick on Mr. Snowdon last night when he asked her for her hand. Mr. Leftby: 'Did she refuse him?' 'No, she accepted him.'"

Artists of the Continent.
In thousands of households all over Canada the merits of Yellow Oil, the great family medicine, are well known. It is especially useful in the treatment of rheumatism, lumbago, neuralgia, sore throat, croup, quinsy, sprains, bruises and all pain. Used externally or internally.

The maids of old were not necessarily old maids.
Let quality, not quantity, be the test of a medicine. Ayer's Sarsaparilla is the concentrated extract of the best Sarsaparilla in the world. Medical men everywhere recommend it as the most reliable and economical blood medicine in the market.

Carry note—A red haired girl with yellow hair carried a pink parasol with a yellow dog.
Fret not your life away because your hair is gray, while young, as you can see your hair grow and turn white with the hair of Hall's Hair Restorer and be happy.

The moaning of the tied—"We want a divorce."
A Delaware man declares that it is the frost that makes this land of freeze people. SHILOH'S VITALIZER is what you need for Consumption, loss of Appetite, loss of strength and all symptoms of Dyspepsia. Price 10c a bottle. W. T. Strong, 184 Dundas street, London.

A downfall—Reduction in the price of feathers.
SHILOH'S COUGH and Consumption Cure tested by us on a guarantee. It cures Croup, Whooping Cough, and Bronchitis. W. T. Strong, 184 Dundas street, London.

Gambler found no difficulty in keeping Lent. They kept fast all the year round and prey on the public for Lent.
For lame back, side or chest, use Shilo's Plaster. Price 25c. W. T. Strong, 184 Dundas street, London.

Many a broadcloth husband owes his position to the fact of his marrying a gingham girl.
Dizziness Caused by Dyspepsia.
Dizziness is a symptom of dyspepsia. "I have used Burdock Blood Bitters for dizziness, which came over me in spells, so that I had to quit work for a while. The B.B.B. entirely cured me."

JAMES WRIGHT, Chesterfield, Ont.
"My wife, the rub," said the boy whose mother was washing his face.
Frank Nicolls.
Rubber Stamp Works, Carling's block, London.

Money saved by buying furniture and getting upholstering done at Tradors', 97 King street.
"BARKWELL'S BRONCHIAL BALSAM" cures all kinds of coughs and colds, bronchitis and croup. Ask for "Barkwell's," take no other.
Spring shipment of ladies' and gents' fine shoes. Prices low. R. KIRKPATRICK, 219 Dundas street.

Bitter oranges, bitter oranges, bitter oranges for marmalade. A. MCKINNON, City Hall.

DOMINION DAIRYMEN.

General Trade Interests Discussed at the Capital.

Outline of the Work of the New Commissioner.

Government Aid Asked to Re-establish the Export Butter Trade.

(By the ADVERTISER'S Special Representative.)
Early in 1889 steps taken by a number of those interested in the production and export of Canadian butter and cheese resulted in the organization of the Dominion Dairyman's Association. Mr. W. H. Lynch, of Danville, Quebec, the well-known butter expert, interested himself especially in the movement, and Mr. F. A. Barnard, Secretary of Agriculture in Quebec, who was then president, pointed out the four following objects as the principal ones in view: 1. To foster making the best possible products in all varieties. 2. Finding best markets and securing lowest freight. 3. Studying the requirements of each market. 4. Securing the highest quality of product at the lowest possible cost. Another object in view was the appointment of a Dominion Dairy Commissioner, and the Dominion Government selected Prof. Jas. W. Robertson, whose abilities were early shown in his connection with the Ontario Dairy Association and the Ontario Agricultural Society, where he held the position of professor of dairy husbandry. In fact, the Dominion Association seems to be a meeting of the minds of the dairy interests of Ontario have forged far ahead of those of the other Provinces.

THE FIRST ANNUAL GATHERING of the new association was held in the City Hall, Ottawa, on Feb. 18 and 19, several Senators and members of Parliament attending. The Eastern Ontario Dairyman's Association was represented, but the writer did not observe any official representatives either from the Western Ontario Dairyman's or Ontario Creameries' Associations. In view of the magnitude of western dairy interests especially, this was to be regretted. The council, composed of men as Ballantyne, Caswell, Lane, Hopkins and others from the West would have been of great value to the new organization. However, otherwise the absence of western representatives, and the publication of the reports will be the means of circulating much information of general value. The chair was taken by Dr. D. M. Derbyside, of Lancaster, the secretary being Mr. J. C. Chapuis, of St. Denis, Quebec, a successful dairyman from a cold eastern district. He greatly regretted the absence of the Western Board of Wisconsin, whose fame as dairy authority had spread far and wide.

THE GOVERNMENT, Lord Stanley, who present, gave a pleasing address, entering heartily into the spirit of the meeting. He laid stress upon the breeding of the dairy farmer. The object in view was to secure the largest return upon the cost and care of feeding. His words were taken up by Mr. J. C. Chapuis, who registered in the Quebec Herd Book. These cows are the result of a cross between the old British cows and the best obtainable. They are small, but very profitable. He argued that small cows were most profitable and showed that a great saving in food could be effected by the use of his cows regularly.

He had the milk of his cows regularly weighed and analyzed, and fed a winter ration made up of ensilage, hay, straw and cotton seed, and yielding 10,000 pounds per annum and yielding a handsome profit. He gave excellent advice as to balanced rations and warned feeders against an excessive use of grain. The paper on the ration, Prof. Barnard's paper is to be given to the public ere long in permanent form.

Mr. Thorburn had great hopes for butter dairying in the Territories. Heavy freights now hampered them, but nearly 2 cents per pound on butter from British Columbia.

Mr. Wright, of Renfrew, suggested that private dairy methods might be improved by sending out Government inspectors who would go into localities and give practical instruction, while ten or twelve persons could be got together.

Senator Reesor related how a run-down cow in York county had been raised in value from \$25 to \$100 by him, when he had been sold to him for \$75 to \$100 by the public ere long in permanent form.

Mr. Thorburn had great hopes for butter dairying in the Territories. Heavy freights now hampered them, but nearly 2 cents per pound on butter from British Columbia.

Mr. Wright, of Renfrew, suggested that private dairy methods might be improved by sending out Government inspectors who would go into localities and give practical instruction, while ten or twelve persons could be got together.

cow giving a fair quality of milk with fair proportion of fat.
Prof. Smith, of Nova Scotia, emphasized the importance of farmers studying the individuality of cows.

Prof. Robertson, the dairy commissioner, said it was important that the new association should proceed upon broad lines of policy in seeking to guide the general dairy interests of Canada. They should lay down general principles rather than go into detail.

"DAIRY FARMING FOR THE DOMINION" was Prof. Robertson's subject, and he took the ground that agriculture would always continue to be the greatest of Canadian interests. Dairy farming would produce more food than any other line of agriculture, and as our farmers have been wasting their substance in riotous farming, dairying becomes doubly important in the enrichment of soil. The home production of milk and butter products was rapidly increasing. The market would never be flooded with good butter at low prices. He believed that in 25 years butter would be made at a profit at 12 cents per pound selling in the next place he had been.

sympathy with those who were waiting that grain farming in Ontario is played out. Grain could be grown and should be grown, but their products should be sold. He had no sympathy either with those who were shipping half-fat store cattle for some one else to finish at twice the profit made by Canadian farmers. Canada should produce all its own dressed beef instead of importing the dressed beef from the United States. The dairyman's work should be to produce 1 and 2 and 3 and 4 and 5 and 6 and 7 and 8 and 9 and 10 and 11 and 12 and 13 and 14 and 15 and 16 and 17 and 18 and 19 and 20 and 21 and 22 and 23 and 24 and 25 and 26 and 27 and 28 and 29 and 30 and 31 and 32 and 33 and 34 and 35 and 36 and 37 and 38 and 39 and 40 and 41 and 42 and 43 and 44 and 45 and 46 and 47 and 48 and 49 and 50 and 51 and 52 and 53 and 54 and 55 and 56 and 57 and 58 and 59 and 60 and 61 and 62 and 63 and 64 and 65 and 66 and 67 and 68 and 69 and 70 and 71 and 72 and 73 and 74 and 75 and 76 and 77 and 78 and 79 and 80 and 81 and 82 and 83 and 84 and 85 and 86 and 87 and 88 and 89 and 90 and 91 and 92 and 93 and 94 and 95 and 96 and 97 and 98 and 99 and 100 and 101 and 102 and 103 and 104 and 105 and 106 and 107 and 108 and 109 and 110 and 111 and 112 and 113 and 114 and 115 and 116 and 117 and 118 and 119 and 120 and 121 and 122 and 123 and 124 and 125 and 126 and 127 and 128 and 129 and 130 and 131 and 132 and 133 and 134 and 135 and 136 and 137 and 138 and 139 and 140 and 141 and 142 and 143 and 144 and 145 and 146 and 147 and 148 and 149 and 150 and 151 and 152 and 153 and 154 and 155 and 156 and 157 and 158 and 159 and 160 and 161 and 162 and 163 and 164 and 165 and 166 and 167 and 168 and 169 and 170 and 171 and 172 and 173 and 174 and 175 and 176 and 177 and 178 and 179 and 180 and 181 and 182 and 183 and 184 and 185 and 186 and 187 and 188 and 189 and 190 and 191 and 192 and 193 and 194 and 195 and 196 and 197 and 198 and 199 and 200 and 201 and 202 and 203 and 204 and 205 and 206 and 207 and 208 and 209 and 210 and 211 and 212 and 213 and 214 and 215 and 216 and 217 and 218 and 219 and 220 and 221 and 222 and 223 and 224 and 225 and 226 and 227 and 228 and 229 and 230 and 231 and 232 and 233 and 234 and 235 and 236 and 237 and 238 and 239 and 240 and 241 and 242 and 243 and 244 and 245 and 246 and 247 and 248 and 249 and 250 and 251 and 252 and 253 and 254 and 255 and 256 and 257 and 258 and 259 and 260 and 261 and 262 and 263 and 264 and 265 and 266 and 267 and 268 and 269 and 270 and 271 and 272 and 273 and 274 and 275 and 276 and 277 and 278 and 279 and 280 and 281 and 282 and 283 and 284 and 285 and 286 and 287 and 288 and 289 and 290 and 291 and 292 and 293 and 294 and 295 and 296 and 297 and 298 and 299 and 300 and 301 and 302 and 303 and 304 and 305 and 306 and 307 and 308 and 309 and 310 and 311 and 312 and 313 and 314 and 315 and 316 and 317 and 318 and 319 and 320 and 321 and 322 and 323 and 324 and 325 and 326 and 327 and 328 and 329 and 330 and 331 and 332 and 333 and 334 and 335 and 336 and 337 and 338 and 339 and 340 and 341 and 342 and 343 and 344 and 345 and 346 and 347 and 348 and 349 and 350 and 351 and 352 and 353 and 354 and 355 and 356 and 357 and 358 and 359 and 360 and 361 and 362 and 363 and 364 and 365 and 366 and 367 and 368 and 369 and 370 and 371 and 372 and 373 and 374 and 375 and 376 and 377 and 378 and 379 and 380 and 381 and 382 and 383 and 384 and 385 and 386 and 387 and 388 and 389 and 390 and 391 and 392 and 393 and 394 and 395 and 396 and 397 and 398 and 399 and 400 and 401 and 402 and 403 and 404 and 405 and 406 and 407 and 408 and 409 and 410 and 411 and 412 and 413 and 414 and 415 and 416 and 417 and 418 and 419 and 420 and 421 and 422 and 423 and 424 and 425 and 426 and 427 and 428 and 429 and 430 and 431 and 432 and 433 and 434 and 435 and 436 and 437 and 438 and 439 and 440 and 441 and 442 and 443 and 444 and 445 and 446 and 447 and 448 and 449 and 450 and 451 and 452 and 453 and 454 and 455 and 456 and 457 and 458 and 459 and 460 and 461 and 462 and 463 and 464 and 465 and 466 and 467 and 468 and 469 and 470 and 471 and 472 and 473 and 474 and 475 and 476 and 477 and 478 and 479 and 480 and 481 and 482 and 483 and CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." E. A. ARCHER, M.D., 111 St. Oxford St., Brooklyn, N. Y.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhoea, Eructation, Kills Worms, gives sleep, and promotes digestion. Without injurious medication.

THE CENTRAL COMPANY, 77 Murray Street, N. Y.

mean great loss. Wet boxes are an abomination and cheese should never be taken to the depot in the rain. It should be shipped in ventilator cans always. Much stale butter was the result of the BAD CUSTOMS OF FARMERS AND CREAMERY MEN.

keeping their product till the end of the season, expecting it to be as good in September as May or June. Much butter, once spent in re-establishing this very policy of waiting that made an opportunity for butter to slip into the market and gain a foothold when it might have been killed the first year. It is not eaten in Canada but much is shipped through. It is a miserable failure, however. Skim cheese was a fraud and indeed cheese shortly had been really enormous. If the British market be secured it must be fought for. Weekly shipments of fresh butter would no doubt result in a loss, but the Government propose spending \$25,000 for seed grain \$5,000 or \$10,000 might well be spent in re-establishing this great industry and developing the butter export trade. The experiment should be made with the product of two or three Ontario and Quebec creameries. Hand-made spruce kegs should be used. Last year the value of cattle and products exported from Canada amounted to \$17,0
