Government Must Act Promptly to Avert Catastrophe.

St. Petersburg, April 26.—The news from Poland paints a picture of veritable terror before the expected storm. A letter received here reads:

"You know what happened at Warsaw, but you only know part of what is occurring throughout the country. All Poland is in a great conflagration of socialism, the terror of which is everywhere exciting a terrible panic. We expect at Easter a general massacter of Russian government officials and the wealthy, and the blowing up of the Vistula bridge to prevent the arrival of troops from Russia. The police are doing nothing. They pretend is the cause of discontent, which is on around them. The existing regime is the cause of discontent, which is on the increase among the idle workmen, driven from the factories and railroads because they are Poles. They say they will have revenge."

Open Revolt and Bayonet

A letter from Vilna says: "Work is impossible under existing conditions. The government's endless commissions accomplished nothing and the landlords workmen and peasants are convinced that open revolt and the bayonet are the only remedies. Easter may witness the inauguration of another insurrection like that of 1863, which began, as this may, with a Russian massacre."
