

# The CANADIAN BÖVING CO., Limited.

Water and General Power Engineers,

164 Bay St.

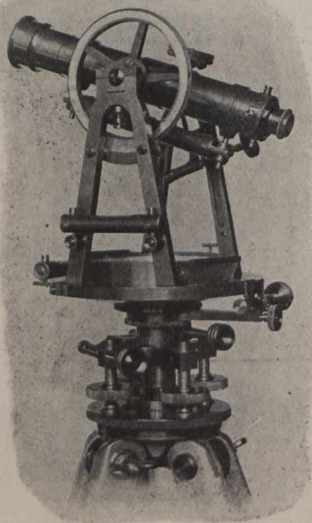

TORONTO

Four Thousand H.P. Quadruplex Turbine Operating Under 33.5 Feet Head. Speed, 187 R.P.M.

Canadian Made.

## Consol Transits

Consol 5" Transit, \$190.00.

Some doubt has been expressed as to the genuineness of our claim to a Canadian-made instrument, and we invite anyone who is interested to visit our factory and see our "Consol" Engineering Instruments in the making.

We not only make these instruments throughout in our own factory, but we claim that they are the equal in point of construction, style and finish to the best foreign instrument, and our price just saves the duty.

Our 5" Transit shown above is the best value ever offered, but we make a good serviceable Transit for \$150.00.

Get your order in now for spring delivery.
