CODMAN & SHURTLEFF'S

Atomization of Liquids for Inhalation, Local Anæsthesia, &c.

BY the Atomizer, any medicated liquid may be converted into the finest spray. In this state it may be inhaled into the smallest air-cells, thus opening a new era in the treatment of all diseases of the throat and lungs. (Fig. 15.)

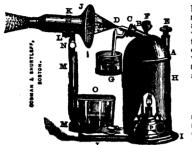

Fig. 15. The complete Steam Atomizer.

e treatment of all diseases of the throat and lungs. (Fig. 15.)

It consists of the sphere-shaped brass boiler A, steam outlet tube B, with passes box C, formed to receive rubber packing through which the atomizing tube D passes steam tight, and by means of which tubes of various sizes may be tightly held against any force of steam, by screwing down the cover while the packing is warm; the safety valve E, capable of graduation for high or low pressure by the spring or screw in its companient cup and cup-holder G, the support H, iron base I I, the glass face-shield with oval mouth-piece connected by the clattic band K with the cradle L whose slotted staff passes into a slot in the shield-stand M M, where it may be fixed at any height of angle required by the milled screw N.

The wastecup, medicament cup and lamp are held in their places in such a manner at they cannot fall out when the apparatus is carried or used over a bed or otherwise.

All its joints are hard soldered. It cannot be injured by exhaustion of water, of any attainable pressure of steam. It does not throw spirts of hot water, to frighter of scald the patient. Is compact and portable, occupies space of one-sixth cubic for only, can be carried from place to place without removing the atomizing tube or twater, can be unpacked and repacked without loss of time. Will render the best of water, nickel plated, additional, \$2.50. Neatly made, strong black walnut box, with convenienth andle, additional \$2.50.

Shurtleff's Atomizing Apparatus. Pat. March 24 1868.

The most desirable hand apparatus. Rubber warranted of very perfectly in all positions. The bulbs are adapted to all the tubes made for us for Local Anæsthesia in Surgical Operations, Teeth Extraction and the halation. Price \$4.00. Each of the above Apparatus is supplied with directions for use.

Every steam Apparatus is tested with steam, at very high pressure apparatus is carefully packed for transportation, and warranted perfect.

HAND BALL APPARATUS (Fig. 5 with a strength of the strength of the

pparatus is carefully packed for transportation, and warranted policy HAND BALL APPARATUS, (Fig. 5, without shield) with two glass 30 to 100 per ships of the contract of the

tubes.
THE BOSTON ATOMIZER with two glass Atomizing tubes
TREMONT
GLASS ATOMIZING TUBES, to fit any of our Apparatus, warranted

N.B.—To save collection expenses, funds should be sent with the order, either in form of draft, post-office order, or registered letter.

**Por complete inlustrated price-list of Apparatus. Tubes, &c., see pamphlet.

Will send by mail (post-paid), on application, a pamphlet containing two articles, by distinguished foreign authority, in thalation of Atomized Liquids, with formulæ of those successfully employed. Also, an article by Dr. L. W. Thudichum, B. C.P., on "A New Mode of Treating Diseases of the Nasal Cavity," with is formulæ. Also an illustrated description of the best Apparatus for the above purposes, and for producing Local Amæsthesia by Atomization of Rhigolene.

Instruments made to order, Sharpened, Polished, and Repaired.
