

This cut is for Symes amputation. It is the most comfortable, strongest, neatest, and easiest to walk on of any leg in the market. It has had a severe test on men at rough work weighing up to two hundred and twenty-five pounds. This leg can be furnished with the knee joints and corset above the knee. Further information will be cheerfully given.

I also make to order for any shape, Abdominal Belts, Kidney Pads, Appendicitis Pads, Trusses, and all Orthopedic appliances.
