

## You Can Pull Out Many a Dollar

you would otherwise miss,  
by giving your work that  
final touch that adds so  
much with

## B-H Concrete Proofing

Concrete and cement are naturally porous, and absorb moisture and grease, and when exposed to the weather, tend to crack and disintegrate. All this can be prevented by putting on a coat of B-H Concrete Proofing, which fills the pores and makes a smooth, hard surface, impervious to moisture, that will last as long as the concrete. And then, if the concrete is tinted with

## B-H Waterproof Cement Stains

you improve the job about 100 per cent. both in looks and wear, at nominal cost. B-H CEMENT STAINS are made in eight attractive tints that will hold their color and freshness indefinitely.
