

Porcupines Under the Weather--Signs of Improvement

Mining Market a Dull Affair But Gradual Recovery Is Made

Porcupines Show an Improving Trend, and Some Small Gains Are Recorded—Cobalts Lethargic and Inclined to Sag.

World Office.
Tuesday Evening, July 4.
There was a steady buying movement in the mining market to-day, and prices made some further improvement, though in no case was the appreciation carried on with any show of vivacity.
The market was undoubtedly "under the weather," and a half session was quite sufficient to take care of all the business in the hands of brokers, consequently, in common with the other Canadian exchanges, the market closed at the end of the morning board.
The recovery which was carried forward at the opening to-day, and the generally active issues showed small advances. These were carried forward during the session, but over a point above the low figures of yesterday, and the upward tendency was pronounced enough to call for more than passing comment.
The cheaper issues which suffered most in the recent decline were of course the leaders in the recovery. Thus Dome Extension, which sold yesterday as low as 72, moved up to 75 this evening, a gain of half a point over yesterday's close. Preston was up to 41-1/2, which was half a point below yesterday's close, but over a point above the low figures of yesterday. Vipond and Swastika were slightly firmer. Eldorado sold up to 19.

In the bigger issues a modicum of buoyancy was observable. Hollinger opened up five points at 14-1/2, and gained an additional amount during the half-session. West Dome was in good demand, and sold as high as 32-1/2, an advance of 15 points.
Cobalts were quiet, with the tendency seemingly undecided. Timiskaming lost another point at 47-7/8, and both Rochester and Little Nip dropped a fraction apiece, but otherwise there was nothing doing.
The market closed dull, but generally firm. The hot weather has temporarily put a crimp in the speculative movement, and the small recovery to-day was too gradual to be indicative of anything other than that the immediate trend was at least toward higher levels.

Fire May Have Been An Unmixed Blessing

It would seem, according to gossip on the street, that the damage incident to the fire which ravaged portions of the Porcupine early in the week would not be as heavy as at first estimated.
In relation to the loss to Dome Extension, which suffered the most owing to the destruction of its plant, it was stated that the total loss would not amount to \$10,000, and that this would be more than atoned for in the amount of clearing which the fire did.
The Porcupine heavily wooded, and the timber is to a great extent dead wood, consequently cleaning up properties is by no means the least of the labor in development work. The conditions would thus point to the fact that the conflagration may have been almost an unmixed blessing.

Hargraves Gets After The Kerr Lake Mine

Suit Entered for \$150,000, Representing Ores Fraudulently Taken.

A suit has been instituted against the Kerr Lake Mining Company Limited for the recovery of \$150,000, being the value of the ores which the plaintiffs claim were taken out of a vein running into their property and at a point outside the boundaries of the Kerr Lake mine.
It is reported that the Kerr Lake Company have offered to pay the claim by the payment of \$25,000, but that the offer has been refused by the plaintiffs, who will carry the case thru the courts.

Pretty as a Picture Is This Gold Find

Remarkable Showing in the Schist at Armstrong-McGibbon Pearl Lake Claim.

PORCUPINE CITY, June 29.—(From Our Man Up North.)—The free gold find on the Armstrong-McGibbon holdings at Pearl Lake, as recorded last week, came in the schist and is as pretty as a picture with the yellow particles sparkling in the honeycombed rock.
It is not uncommon for the gold to appear in the schist walls as well as in the quartz, and even in the schist formation, aside from the vein matter, and for this reason mine men at work on the Pearl Lake section are no longer disturbed because of the unusual occurrence of values.
Surface prospecting and core drill are in operation on the Pearl Lake group of the Armstrong-McGibbon holdings. The lot on which the find was made lies to the south of the Rea mines. There are many outcroppings of quartz in various places and where the gold was found not sufficient development work has yet been done to get the full width of the walls.
On the lot to the north of Pearl Lake core drilling is in operation and several holes over 250 feet deep have been put down. The so-called Jupiter vein at the west line of the Armstrong-McGibbon claims was cut at the 200-foot depth, and there is said to be 50 feet of quartz 200 feet down where the drill intersected the vein.
Charles Fox.

Wide Lead Uncovered

Distance of 150 Feet

PORCUPINE CITY, June 29.—(From Our Man Up North.)—The tremendous showings at the Hollinger mine are the incentives that drive mine men to explore claims in Southwest Tisdale. Recently Consulting Engineer Geddes of the Foley-O'Brien, who also has charge of the work on the Shillington-Richardson lots to the south of the Miller-Middleton and the Moneta, started a large force on surface prospecting on these claims.
A lead, which is supposed to be a continuation of the outcroppings found on the Hollinger, has been uncovered for a distance of 150 feet, and in places 15 feet in width. Not enough of the surface has been uncovered to make it possible to tell just what the width of the lead is.
An elevation which rises 50 feet above the general level of the surface is believed to carry a mass of quartz, which may yet with more prospecting prove to be another Dome.
Charles Fox.

Ran Aground in Canal.

KINGSTON, July 4.—(Special.)—The steamer Keywest, coal laden, on her way to Montreal, ran aground above Cardinal, in the canal. The steamer Donnelly was summoned from Kingston.
Charles Fox.

Porcupine Gold Camp

McKinley Darragh Issues Statement

In sending out dividend cheques for the July dividend, the McKinley-Darragh-Savage Mines issued the following statement of conditions as of June 15:
Cash on hand \$353,024.38
Ore at smelter, etc., 15,500 oz. 35,500.00
Ore at mines ready to ship 35,500.00
Total \$763,524.38
No debts except current accounts.
Silver produced since Jan. 1, 1,100,000 ounces.
The statement compares as follows with the close of 1910:
June 15, 1911. Dec. 31, 1910.
Cash on hand \$353,024.38 \$188,304.00
Ore at smelter, etc. 15,500 256,522
Ore at mines ready to ship 35,500 19,200
Totals \$763,524.38 \$464,026.00

Vipond Has Another Gold Brick Ready

Mr. W. J. Davidson, who was one of the original stakers of the Vipond, and was instrumental in turning it over to the Flynns, and who is now in charge of the property, wired yesterday that the No. 2 vein has been cut on the 100 foot level. Its width has not yet been determined. The vein was encountered while drifting about 150 to the west on No. 2 vein, which at the 100 foot level shows high values. It is claimed. The mill is now running 24 hours a day, and another brick is nearly ready for shipment, making eight bricks in all turned out by the little mill.

Ore Ran \$650 to Ton At West Dome Mine

Pellatt & Pellatt had a wire yesterday from Manager R. Alvin Weiss at the West Dome mine to the effect that the core of the short drill from the 175 foot level showed a value of \$650 to the ton. The quartz vein at this depth runs about 20 feet in width.

Eldorado Township Comes to the Front

PORCUPINE CITY, June 29.—(From Our Man Up North.)—Eldorado, the township to the south of Shaw, came into prominence this week when the Courbois and Duncan Syndicate sold to the township a large tract of land in this very promising section.
Three years' work had been done on the claims and patents secured. In getting so much assessment work accomplished early, several fine leads were shown up to advantage.
The claims, it is understood, will be put in with several other holdings in Shaw.
Charles Fox.

Core Drill To Go Down To Depth of 1200 Feet

McIntyre Mines at Pearl Lake Pave the Way to Prove Porcupine at Depth.

PORCUPINE CITY, June 29.—(From Our Man Up North.)—Deep underground prospecting will be the rule in Porcupine from now on among the prospecting working mines, and yesterday contracts were let to Smith & Travers of Sudbury, owners of shot and diamond drill outfits, to put down an aggregate depth of 5000 feet in several holes on the McIntyre Mines, Ltd., holdings at Pearl Lake.
Some of the holes will run down 1200 feet to determine as soon as possible what the character of the rock is at that depth. Satisfactory results have come from boring to a depth of 200 and three hundred feet in different spots in and around the lake district, and now that holes 1200 feet deep are to go down within 60 days mine men will know soon what greater depth holds in store.
On the surface and to the depth of the deepest shaft now down in the district mine men are satisfied that Porcupine will make a gold camp, but to combat that oft-repeated question "What will depth show?" deep boring will be undertaken.
From the fact that in the deep shafts, such as at the Rea and the Foley-O'Brien, big values occurred as depth was made, men are eager to make haste in the matter of deeper work.
Porcupine has settled into an era of hard mine development work that means by the beginning of fall many of those now classed as mine prospects will have moved into the strictly mine class.
Charles Fox.

RESTORED HIS HEARING

Thrown Thru Barb-Wire Fence by Grand Trunk Train.

KINGSTON, July 4.—(Special.)—As the result of being struck by a train, Louis Renaud of Almyer, Que., who was deaf for many years, has recovered his hearing. Renaud was walking along the Grand Trunk tracks near Bath, when he was hit by the train and thrown thru a barbed wire fence. He had several ribs broken and also suffered a severe scalp wound, but is doing nicely at the general hospital. His hearing is now good, and Renaud says that the bumps he got from the train were better than anything an ear specialist could do.

Stricken With Paralysis.
KINGSTON, July 4.—(Special.)—Mrs. A. Moorehead, one of the oldest residents of these parts, died at her home in Lansdowne in her 96th year. She was the widow of the late Thomas Wade Smith.

Vein at Imperial Mine Widens to Seven Feet

One of Best Showings in District at Property on Deloro-Tisdale Line.

Superintendent Healey of the Porcupine Imperial Mining Co., wired on Saturday that the new strike on the 100 foot level, 25 feet north of the shaft which was made last week, and at that time showed 4 feet of quartz carrying free gold, has now widened to 7 feet and that several experts in the camp, who have at the rate of the remarkable showing, have pronounced it to be one of the best developments with depth in the district.
This uncovering of free gold at the 100 foot level at the Imperial broadens the productive ore zone of the Porcupine and adds another near producer to the district.

Stamp Mill to Go In.

President Taylor and Vice-President Norrington left for the camp last evening to personally examine the new developments, and it is their intention, if sufficient tonnage is developed with the immediate installation of a small stamp mill along the lines of the Vipond. This will pay for all development work until such a time as sufficient tonnage is developed to warrant the construction of a mill of large enough size to place the Imperial on a commercial and earning basis.
As up to the last of July there had been less than 100,000 shares of the stock of the Imperial Mining Co., there still remain over 300,000 shares intact. The management is desirous of making the property self-sustaining as soon as possible, and to reserve the treasury holdings in case it is necessary to install a larger mill later.

Three shafts are working on the Imperial, both north and south from the drift on the 100 foot level to intersect the four different leads, which showed such spectacular free gold on the surfaces. It is expected that within ten days the second vein, which showed 23 feet of solid quartz on the surface, will be cut in the north cross-cut.
The south cross-cut is now some 15 feet from the shaft, and the machine drills are now making their way down to the 100 foot level. The big lead which was opened up on the surface 40 feet from the shaft.

On Adjuncting Lot.
Alex. Doble, one of the owners of the McKay property, which adjoins the Imperial, and has the same ledge system, is now making his way down to the sinking of a main working shaft on the McKay, about 300 feet from the Imperial line. The surface enrichments are spectacular on this property, also, and now that the Imperial has proven its ore depth of 100 feet, the McKay people have decided to immediately start a shaft to prove up their system with depth.
Many men who have followed the developments in Porcupine closely this summer believe that these two properties and in fact several others along the Tisdale-Deloro base line will show many surprises during the next few months, and that section will become one of the most productive in the Porcupine camp.

More Bears Than Gold Up in Porcupine?

PORCUPINE CITY, June 30.—(From Our Man Up North.)—Returning prospectors from the western townships relate unfortunate stories of bears and wolves infesting the dense forests, and it would seem that the bear stories of last summer, when many a prospector's camp was licked out by bears, are to be repeated this year, only a month or more earlier in the season.
We saw about three bears to every man on a prospector to the World to-day, and while camped in Whitesides Township our entire food supply was cleaned out in one night by the wild man. The bears were hungry at this time of the year and the smell of food seems to embrother them. We were obliged to break camp the next morning and travel to the nearest village. Another prospector met with a similar misfortune in Price Township, where bears cleaned up his tent.

Prospectors are advised, and to be robbed of all you have while 40 miles from home is no pleasant job.
Charles Fox.

REFUSED TO HAND OVER

Defeated Officers of Society Hung on to the Funds.

ST. CATHARINES, July 4.—(Special.)—Kirkpatrick Vartanum and Abel Kharjayan were arrested last night, charged with fraudulently omitting to pay certain money entrusted to them as officers of the Arreck Educational Society. The men, who were employed at the McKinnon Dash Works, had been president and secretary respectively of the society. Saturday morning officers were elected and the old ones refused to hand over the funds. The amount involved was between \$100 and \$1700, was produced by the defeated officers. A member of the society was sent to recover the money, and the men were remanded a week. Police Magistrate Campbell meanwhile keeping the money as a trustee.

BOY DIES OF LOCKJAW.

ST. CATHARINES, July 4.—(Special.)—Aaron, the 13-year-old son of Mrs. Joseph Thomas of Centerville, died of lockjaw, which was caused by tetanus. A week ago Sunday, the little fellow ran a silver in his foot, but no trouble was experienced until Sunday, when the dread disease struck him. All the efforts of the doctor to save his life were in vain.

Died at the Age of Ninety-six.
BROCKVILLE, July 4.—(Special.)—Mrs. A. Moorehead, one of the oldest residents of these parts, died at her home in Lansdowne in her 96th year. She was a native of Ireland.

HAND CAR HIT HIM
Employee of M. C. R. Fell Off in Front of the Car.
CHATHAM, July 4.—(Special.)—William Hoxey, an employee of the M. C. R., fell off the handcar last evening near Charing Cross. He fell diagonally across the rail in front of the car, which did not run over him, but bruised his side and left thigh, breaking the same considerably. It was a very painful accident, the victim receiving the whole impact of the car, as well as the lacerations sustained. He was taken to his home in North Buxton.
