LEIGHTON'S AND MILLAIS' SUC-CESSOR.

The election of Mr. Edward J. Poynter, director of the National Gallery, to the presidency of the Royal Academy, was somewhat of a surprise to the friends of the other candidates, especially to the friends of Val. Prinsep, who was early in the running and was supposed to be the Queen's choice. The election of Mr. Poynter, however, been well received by the press, and in art circles. Although he is not a great painter, Mr. Poynter is fully laster of those social attainments which are necessary to make a successful president of the Royal Academy.

IN OFFICIAL CIRCLES. There is no doubt that the new Lord Mayor of London, Mr. A. Faudel-Philips, will signalize his year of office by great brilliancy. He proposes to commemorate the Queen's reign by raising the sum of £1,000,000, with which to free the London public hospitals from debt. The first of the November Cabinet councils will be held on Lord Mayor's Day, Nov. 9. PRESIDENT LOGIE REPLIES TO

Sir,-As you are aware, the union has an extremely difficult task to perform in selecting referees. It is almost impossible to get anyone who is at all capable to act, when he knows that, however impartial he may be, he will surely be subjected after match to scurrilous attacks from the losing team. It is for this reason that I have constantly refused to act as referee, and I regret exceedingly that, considering it my duty as president of the Ontario Rugby Union to act, ch he was on the sick Port Stanley, Nov. 7.—The storm however disagreeable the task might The object of this on Lake Erie on Thursday night was treatment, it is stated, was to drive one of the most severe in a persuaded by the secretary of the the subaltern out of the regiment. long time. Next Week at the Grand

The Grand Opera House offer three strong and meritorious attractions during the coming week. All three are of the highest order of merit, yet presented at prices such as are ordinarily charged for the commonplace attractions. To specify them is sufficient to those posted in matters dramatie. In the first place, on Monday evening, Mr. James O'Neill will present the ever favorite creation of Dumas, "The Count of Monte Cristo." Mr. O'Neill's reputation as a personator of romantic characters is not a thing of yesterday. His fame is as well established in San Francisco as in New York, and in all the intervening points he is as fully recognized as the leader in his chosen line of dramatic delineation. Mr. O'Neill is surrounded by a company of highest excellence, and while he is the undoubted star, he is by no means the whole of the attraction.

Tuesday evening's bill will be "Human Hearts," a play that has been a success from the start, having for its keynote a strain that appeals to all the finer attributes of our naturethe temporary injury of followed by the downfall of the wicked. It is a picture of the triumph of virtue over vice, set in a handsome frame of dramatic construction, appealing at once to our love of the artistic and our sense of eternal poetic fitness. Presented by a company of metropolitan players, it appeals irresistibly to the human heart.

"In Old Kentucky" forms the bill to be presented Thursday evening, and this is a piece that stands out prominently among the dramatic successes of recent years, that possess more than passing merit. So long as way to the affections of the people who recognize merit in dramatic construction. The fact that London should have three such strong dramatic attractions in one week is a tribute to the enterprise of the Opera House management, and a compliment to the good taste of the people of London. They are depended on to show their appreciation by liberal pat-ronage, and thus demonstrate that high class attractions are what the people of London require. The prices are not raised on these occasions beyond what is ordinarily charged, and the opportunity to see such fine productions at such low rates should result in three crowded houses at the Grand on Monday, Tuesday and Thursday.
