

ate drinker. In the confirmed drunkard it becomes a disease of the nervous system. The medical treatment of this disease consists in the employment of remedies that act directly upon those portions of the nervous system which, when diseased, cause lunacy, dementia and the drinking habit. Remedies must be employed that will cure the appetite for strong drink, steady the trembling hand, revive the lagging spirit, balance the mind, etc. The nervous system of the dram drinker being all unstrung or shattered, must be given a nutriment that will take the place of the accustomed liquor, and prevent the moral and physical prostration that often follows a sudden breaking off from the use of alcoholic drinks. Those of our readers who are interested in this subject should send their address for LUBON'S Treatise, in Book Form, on Drunkenness, Opium, Morphine and other Bad Habits, which will be mailed free to any address, when stamps are enclosed for postage. Address—M. V. LUBON, 47 Wellington Street East, Toronto, Ont.
