

Creighton Union reports one public meeting in reference to the Sunday car question, and Western a prayer meeting. Other Unions I believe also held prayer meetings in connection therewith.

Willard reports work against the issue of a license for the sale of liquor in their District.

OLIVE P. HENDERSON,
Superintendent.

SCIENTIFIC TEMPERANCE INSTRUCTION.

Owing to taking the Superintendency so late in the year, I have been unable to visit all the Unions, but since commencing with them, have received replies from all but Western and Eastern. The following Unions have appointed Superintendents, viz., Central, Central Y's, Willard, Gordon, Northern, Parkdale, and Eastern, but good work has been done among other Unions where no Superintendent has been appointed which is very encouraging and shows that our white ribboners are alive to the importance of this work.

Central W.C.T.U. sends an excellent report of faithful work done by the Superintendent, who has addressed the teachers in three schools, also with the aid of a friend, provided three schools with a copy each of *The School Physiology Journal*, while the principal of a fourth school (a lady) subscribed for it for her own school. Literature has been distributed monthly since March 1st to the amount of 1,456 pages, in addition to the copies of *Journal* above mentioned.

The Normal School has been visited and some literature given, and arrangements made for an address at the different schools in that locality later in the season. A teachers' social was given early in the year.

Central Y's report Scientific Temperance Instruction given regularly to a class of 64, of which 35 were boys, who, the Superintendent feels confident, are able to tell in an intelligent manner the evil effects of Alcohol on most important organs of the body. A large quantity of literature has also been distributed in the class and found its way into the homes of the children, which cannot but result in good.

Willard reports sending literature to the 3 schools in that District, 90 copies of 6 carefully selected leaflets, and over 450 pages given to Mr. Hughes, who kindly consented to send them to the schools.

Gordon reports having visited 8 schools, and distributing 450 pages of literature and 8 Teacher's Manuals in ward 2.
