

HOPES TO GET TO CONFERENCE

Statement in Commons by Lloyd George.

Sir Robert Borden's Name in List of British Empire Delegates—Manchester Guardian on Representation.

London, Oct. 12.—Lloyd George said in the house of commons today that he hoped to go to the Washington conference as soon as the parliamentary and general situation rendered it possible.

The list of British empire delegates made public by the premier contained the name of Sir Robert Borden, representing Canada.

London, Oct. 12.—(Canadian Press)—Discussing the question of the Canadian ambassadorship at Washington, the Manchester Guardian notes how Britain and America have met the suggestion with a truly paternal benevolence, but states that certain complications which the step involves being realized in Canada some repudiation is being caused thereby which the newspaper thinks unnecessary. There seems some confusion about the nature of the ambassador's job. He is not a trade commissioner, but as the old world understands him, he is a representative of the government, and the government cannot easily be subordinated in foreign affairs.

"True, by all natural and geographical tests, a Canadian is the best ambassador the rest of the British commonwealth could have at Washington," the Guardian says.

"Why should not that particular benefit be got by appointing Sir Robert Borden to represent us all, instead of wasting all the awkward questions that would follow upon sending a galaxy of Borden, Goddard and perhaps Smithey Hughes to embarrass Washington? Better, in the meantime at least, to pool one ambassador than multiply him. If Lord Robert Cecil can represent South Africa in the League of Nations, why not the Hon. N. W. Rowell, for instance, represent the whole commonwealth at Washington?"

PARTICULAR CARE OF THE BACKWARD

Attention to Them in Toronto Schools.

Pupils Not Bright in Academic Studies Have Other Talents That May be Developed—These Discovered and Cultivated.

(Toronto Globe).—

The success of auxiliary or industrial training classes in the public schools of Toronto is evidenced in the organization of nine new classes this autumn.

Twelve surveys of the schools were made through the Province of Ontario during the past year, Dr. Sinclair, inspector of Auxiliary Classes, told "The Globe." In response to a request from the school board, the inspector has been making a survey of the schools to determine the number of pupils who have been two years in one class.

Queen Alexandra School, with its unique system of organization, which aims to give every pupil a chance according to mental ability, is particularly interesting. Auxiliary classes in Toronto had their inception in this school, and at three slow-normal and three super-normal classes. Examined by the psychologist, the age of pupils in conjunction with mentality of pupils in assigning them to special classes.

More Manual Training.

"Pupils who learn nothing in the regular classes are taken out and put into special classes."

Hand and Brain Work.

St. Clair Avenue auxiliary class, through special attention to the subnormal pupils, has had the satisfaction of seeing several promotions to other classes. One child who had no manual control of the hands had become clever in knitting. It has been the experience of this class that, through head and eye control, wrought by hand work, there has been a slight brain development.

Strathcona industrial class presents sixteen varied types for the individual study of the teacher. Repetitive work, weaving and woodwork, keeps the children busy when wearied with academic work. Games play an important part in the programme of this class, and the teacher has discovered that intelligence has been quickened through guessing games.

Smoke & Fire.

Wanted—Young woman to assist in care of children. Apply to Matron, Children's Home, 68 Garden street.

auxiliary classes, where they are given individual attention and make progress." Principal J. Wallis told "The Globe." "Slow normals kept at ordinary school work do not make progress. We give them more manual and domestic science training, as well as individual academic attention, that they may be fitted to take up skilled labor when they leave us."

In this school pupils who show abnormal brightness are not retarded, but put into special classes, where they may be pushed ahead with individual tuition. In the sub-normal classes marked ability is shown in plasticine modelling and drawing. Special interest is being taken in this school by the University of Toronto, and progress noted by psychologists who keep in close touch with the pupils.

Particularly happy are the boys and girls of the industrial class of the school, where the morning's academic work is followed by basket-making, weaving and woodwork. With the gift of understanding, which is pronounced in the efficiency of all auxiliary class teachers, Miss J. Flood, the teacher, has discovered a talent for imagination in one lad, and is striving to develop it by urging the boy to write stories and rhymes.

Royal Road auxiliary class is an example of an endeavor to work with the latent lurking in each pupil. The lessons upon which are woven rugs and pillow cases are of the highest artistic value. A child whose arms were crippled through infantile paralysis has been trained to sew on buttons and to fall into the rhythm of the needle and thread. Participation in folk dances and marching to gramophone music have been found to be the delight of the children, by Miss Kingston, the teacher.

Clinton Street, Shirley Heister How and Westside Avenue, have special attention to children who are backward in academic work. Given street auxiliary class is composed of primary children, who are learning to master academic work, largely through mechanical methods.

York Street auxiliary class presents an interesting picture, with 16 boys, of whom 10 are of Hebrew birth, and 6 are of other nationalities. An astounding number of baskets have been woven, as well as woven toys and a few dolls. The teacher proudly exhibits book rests with animals on end carved by a boy who is proving an expert with the plane, but who could not master simple exercises in arithmetic.

Perth School, whose splendid building is making an impression for good in a rather unlovely neighborhood, is training the pupils in the use of the tools of usefulness in the home. A doll's house is under construction, the boys making the furniture and the girls the linen and weaving the rugs. The schoolroom has been made attractive and the children, with their parents, are interested in the pupils, and bookkeeping is becoming a specialty. A Victoria, bought with the proceeds of a bazaar sale of the pupils' handiwork, furnishes the merry valises for exercises.

Roden Street School has 80 pupils in industrial classes. The boys have become adept in woodwork, and the girls have received instruction in housekeeping, bedmaking and hair-setting.

Perth School, located in the heart of the city, has three auxiliary classes, the ambulance class of particular interest. Boys and girls unable, because of lameness, weak vision or other physical disability, to climb stairs or march are given special attention in academic and hand work in one class, and the teacher, Mrs. J. Cameron, has a special interest in the health of each pupil.

Care For Weaker Pupils.

Stretchers provide rest for the frail little ones, and a lunch of milk and biscuits is served every morning. One eleven-year-old boy, who had been in school every day, and although he has never walked, misses no activity of the class. Promotion and subnormal classes are also established at Perth School.

Dress-making is a feature of industrial class of the Jessie Kesteven School. The girls, not only have made dresses for themselves and aprons for their teachers, but have made clothes for the babies in their homes, and a dress for the little motherless sister of one of the boys in the class. Chair-canning is most successfully done by this class. A pleasing feature is the mastery of arithmetic by the children through the playing of the game of "store."

That happiness makes the subnormal pupil brighter, and quickens the wit, has been the experience of the teacher of Dovercourt Road auxiliary class. The exhibit of weaving, raffa-work, basketry and wood-carving in the recent school fair was the pride of the class. One boy who has never been able to master the multiplication table is proving a genius in weaving and carving.

Hand and Brain Work.

St. Clair Avenue auxiliary class, through special attention to the subnormal pupils, has had the satisfaction of seeing several promotions to other classes. One child who had no manual control of the hands had become clever in knitting. It has been the experience of this class that, through head and eye control, wrought by hand work, there has been a slight brain development.

THE BAPTIST CONVENTION

Reports on Activities of the Year.

Some Figures of Accessions—Rev. H. E. Stillwell Tells of the Unrest in India and the Power of Gandhi.

(Special to The Times).

Fredericton, N. B., Oct. 12.—The United Baptist convention opened this morning with devotional service led by Rev. E. Bosworth. After a short service, the convention proceeded to the business session. The report of the board of religious education, the report paid a tribute to the work of Field Secretary Machum.

District conventions have been held in all districts. The secretary took part in six boys' and girls' conferences, visited many Sunday schools and carried on a large correspondence. A large increase in this phase of the work. Co-operation with the M. E. Council has proved successful. Sixty young people's societies have reported. The offerings from the 260 churches was \$1,028.74. Y. P. societies contributed \$6,400. Four thousand dollars was received from the forward movement.

The forward movement work for the present year was outlined. It is suggested that arrangements be made by which Secretary Machum may spend February and March in conducting classes in church training, etc., at Acadia University. Secretary Machum spoke of the co-operative work with the M. E. Council. The report recommended that district conferences, summer schools of methods, boys' camps and girls' camps. The plan is such as to prevent overlapping by field secretaries, and secure the maximum of service in the minimum of time. This matter gave rise to a spirited discussion by Rev. Messrs G. W. Schurman, W. A. White, W. A. Crossborough, A. J. Vincent, H. D. Kane, C. Coon, and also A. W. Welman. A clearer understanding of the M. E. Council's view on this subject was sought. On this matter there seemed much need for light. In this discussion, Messrs. W. R. Robinson, M. P. Freeman, T. E. Dykeman, R. J. Colpitts, Rev. A. H. Saunders, Mr. Tingey had been invited to the convention. Rev. Messrs. J. H. Jenner, M. D. Gregg, E. R. McWilliams, A. J. Archibald, W. A. Crossborough, C. W. Robinson, ordained Rev. Messrs. L. B. Gray, C. B. Lumsden, C. E. Rocking, and Rev. E. S. Mason, superintendent of home mission reported for the board of home mission.

Practically all the members of the staff of officers as last year served this year. No change has been made in the staff of officers. The following were elected: L. J. Tingey, Rev. and Mrs. L. F. Wallace, Rev. W. A. Robens, Rev. A. H. Saunders, Mr. Tingey has been unanimously engaged in New Brunswick. Mr. Saunders has spent about one day in the province, and the rest in eastern Nova Scotia. Mr. and Mrs. Wallace had been in all three provinces and Mr. Robinson had been confined to Western Nova Scotia.

With their help the church property at Corner in Madawaska county, was secured to the little church at that place. New organizations have been established at Eden Cove, N. B., and Port Bickerton, N. S., and revivals have been shared on numerous fields. Pastors and field workers have labored in perfect harmony and fellowship. It had been hoped and earnestly desired to appoint a field worker for the year. The manufacturers say they are not merely sacrificing profits but are incurring big losses to encourage trade.

Other Prominent Speakers With Liberal Leader in Today's Meetings.

Hartmut, N. B., Oct. 12.—(Canadian Press).—Hon. W. L. Mackenzie King is concluding his New Brunswick campaign today with two meetings. He addressed a large gathering in Newcastle this afternoon and this evening will speak to another gathering at Westville county electors in Campbellton. Mr. King is to be accompanied to Campbellton by Hon. J. E. Michael and Hon. C. W. Robinson of the New Brunswick government. He will also have the assistance of the meeting tonight of Hon. Charles Macell, Plus Michael, ex-M. P. of Restigouche-Madawaska and O. Targoun, ex-M. P. of Gloucester county.

Sir C. H. Tupper.

Vancouver, B. C., Oct. 12.—Sir Charles Tupper will leave soon for Nova Scotia. It is understood he will make addresses on behalf of the National Liberal-Conservative, principally in Pictou county, where an old friend, Col. Canby, is contesting the seat in the government interest.

Bourassa and Lavigne.

Montreal, Oct. 12.—Political interest in this city, says the Gazette, has switched from the Liberal and Conservative parties to the Nationalist party as embodied by Henry Bourassa and Armand Lavigne. Although it is being generally accepted that Mr. Bourassa will be an independent candidate in La Motte, a definite announcement as to this will be made on Wednesday night by Mr. Bourassa himself. Whether he will accept a nomination depends on the verdict of his physicians, for his health has not been good of late. It is thought that Mr. Bourassa's entry into active politics will mean the revival of the old Nationalist party, and it may mean, so far as the Montreal district is concerned, that there will be progressive candidates in at least a dozen divisions, since Mr. Lavigne has been elected on what is termed progressive or farmer platforms.

Big Cut in the Price of Ship Plates.
