DESTRUCTIVE FIRE.

The New Brunswick Antimony Works Burned.

The Boiler in the Engine House Explodes—Heavy Loss of Property.

(Special to THE STAR.)

FREDERICTON, June 15.—The New Brunswick Antimony Works at Lake George, Prince William, were burned to the ground on Saturday evening last. The engine rooms and the large crushing room caught fire from sparks from the chimney and the flames were under considerable headway before discovered.

The boiler in the large engine room burst, making a terrible crash, which was heard a long distance away from the scene of the accident and shattered large portions of the building into atoms.

The engine room was soon a mass of flames, and despite all the efforts of the large gang of men that are at work about the place the flames made rapid headway. The fire soon communicated to the store rooms, and the smelting building and the store rooms caught in rapid succession.

All the principal buildings, including a few tenement houses with the exception of the office, which are located on the opposite side of the road are now in flames. The fire spread to the smelting building and the store rooms, and when the fire got under headway it seemed impossible to save any of them from destruction, but a large number of the men worked like heroes to prevent the spread of the fire.

AGRICULTURE.

The Editor of the Farmer's Views on Farming in Charlottetown.

(St. Croix Courier.)

Learning that Editor Macneil, of the Fredericton Farmer, was in town on Monday and had been expecting some of the neighboring farmers and stock, a Courier reporter waited on him at his rooms for the purpose of obtaining his valuable opinion concerning the agricultural possibilities of this section of Charlottetown.

"I understand," said the reporter, "that you have been looking over some of our farms and inspecting some of our choice stocks since your arrival on our shores."

"Yes, through the courtesy of friends, I have been enabled to see some of the country and I have had as yet been very much interested."

"What do you think of Charlottetown as a farming district?"

"Well, that question is a little too comprehensive, I understand you have fine farms along the St. Croix and Digby rivers, and speaking of the immediate vicinity of St. John's, I should say that, with a little more attention to the soil and the agricultural possibilities, it might become one of the most productive portions of the province."

"How can a knowledge of scientific farming be obtained?"

"First of all, of course, farmers should read good agricultural literature. I think the Farmer and the Stockman, published in this section, are well worth the attention of every farmer."

"What do you think of the present state of agriculture in this section?"

"I think it is in a very good state, and that the farmers are doing well. I think the present state of agriculture in this section is very good, and that the farmers are doing well."
