

ENCAENIA EXERCISES AT THE UNIV. OF NEW BRUNSWICK

Many Alumni and Friends of the University Present to Hear Distinguished Speakers Deliver Orations on Academic Subjects—Twenty-Two Graduates—Prizes Awarded and Honorary Degrees Conferred Upon Men Prominent in Country's Affairs.

FREDERICTON, May 19.—The Encaenia exercises commenced shortly after 3:30 o'clock, in the library in the arts building of the University of New Brunswick, the academic procession having previously been formed in Dr. Gove's lecture room. The address of the founders was the address in review by Professor E. G. Harvey, professor of English and modern history. The distribution of medals, prizes and honor certificates was over.

The Alumnus gold medal, for the best English essay on the subject, "The Effect of Confederation on the Economic and Political Development of New Brunswick," was presented to Russell H. Sheldrick, Kingston, Nova Scotia, by George W. Fawcett, president of the Alumni Society; to G. F. G. Bridges, the Governor-General's gold medal, highest aggregate of marks in forestry arts, was presented to Russell H. Sheldrick, by Dr. W. S. Carter.

The Brydone Jack memorial scholarship for third year physics was presented by J. W. S. Mylne, St. John, to George R. Macmillan, who also received a silver medal for fourth year civil engineering, won by John L. W. Harris, Moncton, was presented by Captain M. Hill, president of the Fredericton U. N. B. Club. The City of Fredericton gold medal, for the best essay on "The History and Experimental Station for Electrical Energy and Experimental Station for New Brunswick," awarded to Johnson B. Sergeant, Keswick Ridge, was presented by Ald. G. H. Clark, Fredericton. The subject of the essay for competition next year will be "Water Power and the Use of Electrical Energy for use in Fredericton."

The Alumnus Society's scholarship for highest standing in the sophomore year, won by Miss Mary B. Jones, Fredericton, was presented by Miss E. Haven Allen, retiring president of the Alumnus. William Brewster's prize for first year English, awarded to Margaret B. Wallace, Fredericton, was presented by Mr. Brodie, St. John, retiring president of the Alumnus Society. The Taylor gold medal for the best all round athlete, won by Harrison H. Tripple, Hampton, was presented by Dr. Clarence Webster, of Fredericton. The Parson Longie memorial scholarship for second year applied science was presented to James D. Hassen, Fredericton, by Mr. D. Hassen, G. J. The T. Whitehead memorial scholarship for third year forestry, won by Lawrence E. Gillmore, Stanley, was presented by Professor A. V. S. Pulling, professor of forestry. The prize of \$100 offered by the J. D. for the highest average of marks in the fourth year by a returned soldier was presented to D. R. Bishop, River du Chene, Carleton county, by Mrs. Robert Flatlandoph, Fredericton.

The John Zelmon Corrie memorial scholarship for first year chemistry was presented to J. Henry Bond, St. John.

The special prize for second year civil engineering was presented to Edward G. Rogers, Woodstock, and the special prize for first year civil engineering was presented to Randolph B. Latz, of Moncton.

In Praise of Founders

The Address in Praise of the Founders was delivered by Captain E. L. Harvey, Professor of English and Modern History, in opening Prof. Harvey said:

The speech ended: "Equality of sacrifice is inscribed over: 'The one and the other'; 'I was a 'have'.'

(The second reply): "I was a 'have-not'."

(Both together): "What had thou given that I gave not?"

What shall be given in memory of

"Salute the Sacred Dead,

For Baby's Woollens

The little woolly garments for Baby must be kept soft or they will irritate the tender skin. Washed in Lux soaps, Baby's woollens will keep beautifully soft and fluffy. These thin, elastic-like flakes of Lux are made by our own exclusive process, and dissolve instantly into a lather as luxurious as your water looks.

Just dip Baby's clothes into a handful of the rich Lux and wash them, squeeze out the surplus water and hang to dry. There is nothing like Lux. Sold only in sealed packages—dust-proof!

My words of praise to those who are devoting their lives and their talents toward furthering and improving that system and this important work, upon which our future so much depends. I am also proud to refer to our Provincial University with its historic traditions and its record of producing so many eminent and able graduates, those who have made names for themselves and brought credit to our Province by their accomplishments, not only within the borders of our Province, but throughout the world. Of Canada in foreign lands as well. It is with much pride that I have been able to refer upon numerous occasions to this our university, which has been so instrumental in furthering the cause of education in so many ways. Those who have passed on through its portals with honor, and now that I carry the full weight of a degree, I will feel that I will be able to speak with much more authority and confidence with greater frankness than heretofore. The great work of this university has been the work of years and I applaud when I see any enlargement of its activities.

Now, Sir, to my brief and informal remarks to the gathering here. No suggestion has been made to you, I hope, to consider, to plan, and to march those steps we have an end in view. The original objective.

In the beginning certain lessons were learned by our honored founders. They are numbered with the kings and scholars, who were interested from the great universities of Paris, at Oxford, and at Cambridge. For them are in the right line of association with them: the seven Loyalties, William Brewster, George Brewster, Coffey, Ward Chipman, and Adams Paddock, who in the winter of 1876 founded a memorial to the first Governor of New Brunswick, asking for funds to build a hall for the study of electrical energy for use in Fredericton.

There are three great outstanding events in the life of every normal individual—birth, marriage and death. And I imagine that some of you who today stand upon the threshold of responsibility, think that the greatest event in the life of man is the creation of man. I am told by Captain Jones that your class of 1911 consists of six young men and four young ladies who have won their degrees in Arts, six in Forestry, three in Electrical Engineering and two in Civil Engineering. From time to time we will look back with interest at the period of your life when you first entered college with all the vigor, with all the hope and enthusiasm of youth and now you will wonder as to the future. You will pass through college into the world. There are the great works and the achievements of those who have preceded you. You can look out over this great country from ocean to ocean and see some of the greatest undertakings in the world, immense bridges, our great network of railways, great improvements in our provinces such structures as the Reversing Falls Bridge, the Miramichi bridge, the Grand Falls bridge, our system of provincial railroads, our system of roads and other works. These were brought to a successful conclusion by college graduates in civil engineering, just like yourselves.

As I stated, I do not know what your individual plans are, and although I hardly think I would like to advise you to enter political life at first, with all the responsibilities that go with it, I do not know that there comes with it, as well as the troubles and responsibilities, yet there is great opportunity for both parties need youth and enthusiasm and there is, I assure you, room at the top.

And so in all through the professions, to those interested in the sciences and in medical, dental, law, commerce, and business, there comes with it, as well as the troubles and responsibilities, yet there is great opportunity for both parties need youth and enthusiasm and there is, I assure you, room at the top.

To the others, let me say that all the prizes are not won at College.

Some of the brightest minds and

the biggest men who have accomplished big things did not lead their hand, and all three are not perhaps impossible of attaining in our university.

Sir, may not this idea commend itself to you, and to the learned authorities, that the rewards required,

and the rewards that come with it, as well as the troubles and responsibilities, yet there is great opportunity for both parties need youth and enthusiasm and there is, I assure you, room at the top.

One word of encouragement, and I am through you, there are some of you in the graduating class who have been more fortunate than others in securing great honors and higher marks. To the others, let me say that all the prizes are not won at College.

Some of the brightest minds and the biggest men who have accomplished big things did not lead their hand, and all three are not perhaps impossible of attaining in our university.
