

- 10 -

C174416

- (v) Physiological tests were carried out on thirty military personnel. The tests included service-time tests on impregnated clothing and mustard-gas therapy.
- (vi) Production of Containers at the Container Assembly Plant was held at 1800 per day. The assembly of Facepieces to Cannisters was maintained at the rate of 2000 per day.
- (vii) The construction of the new proofing laboratories in the National Research Annex is progressing satisfactorily. The fume cupboards are complete and the laboratory is ready for occupation except for the installation of ventilating fans. The apparatus is being assembled, and its installation will commence immediately.
