Pratts Baby Chick Food

is a combination of simple nutritive elements in just the right proportions to properly feed baby chicks. It is a lot cheaper to SAVE the chicks you have than to hatch out more and lose them too. Improper feeding means weak, puny, stunted chicks or NO chicks. Pratts Baby Chick Food will save the youngsters and hasten their graduation into the producing class. "Your Money Back if it Falls."

Pratts Poultry Regulator

ensures fertile eggs and more of them. If a hen doesn't want to lay, she simply has to when she gets a little Pratts Poultry Regulator in her system, and it costs YOU but one cent a month per bird.

For 42 years this preparation has stood the test of continuous use, giving universal satisfaction and never injuring the stock. "Your Money Back if it Falls."

At your dealer's, 25c., 50c. and \$1.00;
25-lb. pall, \$2.50; 100-lb. bag, \$9.00.

Lightning Rods Reduce Your Premiums

THE INSURED PAYS THE LOSSES

The company is the trustee only, collecting premiums from you and paying out here and there, when there is a loss.

If every building insured in your company were properly equipped with Lightning Rods your premiums would be less. Because lightning is the big source of loss to farm property. In 12 years 40 companies in Ontario paid 66 2/3 per cent. of all their barn claims on account of damage by lightning.

Prof. Day, of the O. A. C., in his speech at the Winter Fair at Guelph last December, said: "That out of every thousand dollars worth of damage done to unrodded buildings by lightning, \$999 would be saved if these buildings were properly rodded."

The less your company loses the less your premiums.

If your company lost ten cents instead of \$100 on 66 2/3 per cent. of their fires, it would affect you, wouldn't it? Did you ever figure it out that way?

Our rods are on thousands of buildings—and no building equipped with them has ever been damaged. We are proud of that record. We would like you to see our rod. Drop us a card for sample.

The Universal Lightning Rod Company
HESPELER, ONTARIO

If you intend to build or remodel your barn this coming year, now is the time to get posted on the most modern stabling for stock. A stable that will save its cost in six months, a stable that will cut your chore work in two and make what is now a drudgery a pleasure, a stable that is sanitary, fire-proof, convenient, comfortable for stock, will last for generations, will prevent big knees, abortion and disease.

THE CHAMPION TURNIP SEEDER

A Strong, Handy Implement

This Seeder is made both single and double, and in either form is without an equal as a compact handy implement. The seed-box is run by a friction gear, and can be stopped and started instantly without stopping the horse. It can be regulated to sow any desired quantity of turnip, mangold or carrot seed.
