We may start the New Year by re solving not to worry about what "might happen."

ent Smith of the Six Nations' Indians is just out in the Blue Book. The report shows a population of 4,606 on the Reserve, an increase of 42. Of the population, 1,585 are Anglicans, 780 Methodists, 951 Baptists and 871 aboriginal belief. The report of the aspector is as follows:

Health and Sanitation.—The average health was good. Seven cases of typhoid fever of a very virulent type occurred, resulting in two deaths. A somewhat severe outbreak of smallpox occurred in the village of Caledonia, near the border of the reserve; donia, near the border of the reserve; but, owing to strict precautions and general vaccination, the disease was kept off the reserve. Tuberculosis, while still continuing its deadly work, is slightly on the decrease, as the Indians are building better dwellinghouses, and are learning the nature of the disease and consequently take steps on their own initiative to prevent its spread. Houses where tuberculosis or other contagious or infectious disease occur are thoroughly

Indians are building better dwelling-houses, and are learning the nature of the disease and consequently take steps on their own initiative to prevent its spread. Houses where tuberculosis or other contagious or infectious disease occur are thoroughly disinfected.

An efficient board of health assists the medical officer in enforcing sanitary measures. The council-house, where large gatherings are held, is regularly and thoroughly cleaned after each meeting, carbolic acid being freely used. The medical officer and others have taken advantage of every opportunity of urging improved dwellings and cleaner surroundings, particularly in regard to drinking water and the general observance of the laws of health.

Occupations.—General farming is that anti-British Americans here are signs that anti-British Americans here are ready to welcome the opportunity for renewing their favorite international quarrel. It seems important, therefore, to point out the necessity of clear thinking on this much-abused subject—clear thinking and caim speech which cannot be misunderstood by anyone.

The moment we concede—as we must concede under the unquestioned rules of international law—the right of Great Britain to halt our merchant ships on the high seas, board them and search them for contraband, we are obviously providing material for wrangling and injustice.

The fact that definitions of contraband are hopelessly vague and the whole doctrine in a state of flux, it is plain that there is no sure ground on which to pick a hasty quarrel with

water and the general observance of the laws of health.

Occupations.—General farming is the chief means of making a living. Many of the younger members frequently seek employment off the resrve as farm labourrs or domestic help, and also in the canning factories. All the buildings on the reserve during the year, including cement abutments for bridges and culverts, was done by Indians. A large quantity of small fruit and vegetables is weekly offered for sale by Indians on the Brantford and Hagersville markets. There is more attention being given to the growing of small fruits.

whole doctrine in a state of flux, it is plain that there is no sure ground on which to pick a hasty quarrel with anyone. Rather is it a case for full discussion, frank demands and hational settlement through the compromise by which every disputed situation at law must be resolved.

So far as now appears, the administration is approaching the question in exactly this spirit. At any rate a spirit of entire friendliness pervades the note of protest. This the London papers fully appreciate, and it is certain that the British Government will reply in kind. Tickets for sale to all points on T., H. & B., M. C. R., C. P. hogs and sheep are raised. Farm Implements-All implements, from milking-machines down, are used by members of the band, and almost every farm is well supplied with the most modern implements, and all, with very few exceptions, are well

Characteristics and Progress- The Indians are generally industrious, progressive and law-abiding. If work cannot be obtained on the reserve. they seek employment off; many have taken up land in the west, others have regular employment in Brantford, Hamilton and other cities

and towns. The South Brant Farmers' Institute held its usual afternoon and evening meetings in the council-house, which were largely attended A Wo were largely attended. A Women's Institute was also held at the same time. The Six Nations' Agricultural Society wholly under the man-agement of Indians, held its usuel three days' annual fair, and was most successful in attendance and quality of exhibits. The exhibit of horses was particularly good. Daily and weekly newspapers and agricultural journais have a large circulation on the re-

iness by cheques.

Temperace and Morality—The Indians are generally temperate in their habits and assist any effort to prevent the use of intoxicants on the reserve. Several temperance societies exist and hold regular meetings. The morality of the Indians is improvmorality of the Indians is improv-

Buildings—The steady improvement in buildings continues, those of erected this year, with the assistance of the loan system, being principally dwelling-houses. The loan system is proving a benefit. Payments are kept up with fair regularity.

Stock—Great interest is taken in the raising of stock. The council purchased three bulls for improving the stock,—a Durham, a Holstein, and a Polled Angus. A thoroughbred stadlion "Light Wool" has also been loaned to the superintendent by the Canadian National Bureau of Breeding, Limited, of Montral, solely for use on the reserve. A large quantity of milk is sold to factories off the of milk is sold to factories off the United States and Great Britain, erpecially a war resulting from the position we have taken in respect to searches and seizures of our cargoes at sea. "Of the peoples I saw, fellow British subjects, any language at my command would fail to convey the splendid impressions which my visit gave me and they inhabit rich and beautiful countries, but it is the simple truth when I say that the farther I wander and the more I see other countries I see, the firmer grows by conviction that in point of soil, climate, potentialities and all that makes life worth living three hundred and sixty five days in the year, there is no country under the sun so favored by Providence, as Saskatchewan.
