

Used in Millions of Tea-Pots Daily

Its Intrinsic goodness in Tea Quality - makes it the most Economical in Use -

Club-Root of Turnips, Cabbage, Etc.

Club-root of turnips and related plants causes a considerable loss in the eastern provinces. Diseased roots are greatly swollen, distorted and sometimes rotted.

CONTROL.

If the following precautions are adopted the disease can be greatly reduced if not completely controlled:-

WOOD'S PHOSPHODINE.

The Great English Preparation. Tones and invigorates the whole nervous system, makes new blood in old veins. Used for Nerves, Debility, Mental and Brain Worries, Headache, Nervousness, Impaired Vision, etc.

(1) Plant only on disease free soil. A comparatively new piece of land which has never been planted with turnips, cabbage, rape, etc., and which hence may be regarded to be absolutely free from the disease is preferable.

(2) Liming is a good practice. Considerable benefit may be secured by applying three tons of air slaked lime or five tons of ground limestone any time before planting the crop; but

The best results are obtained when the lime is applied immediately after the diseased crop has been harvested and a period of three or four years allowed to elapse before turnips or cabbages are again planted.

(3) Manure. Manure from stock fed on club-rooted turnips should not be used as it invariably carries the disease and infects the soil to the turnip crop only such manure as comes from stables where turnips have not been fed at all.

Rotations and Sanitation. Plant susceptible crops on the same soil not often than once in eight years. Destroy all diseased roots or boll them before feeding. Keep down all weeds of the mustard family. Raise cabbage and cauliflower seedlings on diseases free soil and never throw infected soil from seedling boxes where it could be spread to clean fields.

FARM REPORT

The following is a summary of reports made by Agricultural Representatives to the Ontario Department of Agriculture:-

The very broken weather of the first half of April checked growth and greatly hindered field work. The warm days of the week-end have been welcomed, and seeding operations are now being hurried.

Fall wheat and clover are about "as you were," but are expected to run forward with the recent rains and warmer weather.

Hay is in demand. While a few reports state that it may be had in the barns loose at \$20 a ton, general quotations for market prices run all the way from \$25 to \$35 a ton.

Bacon hogs have been selling at from \$18.25 to \$19.50 during the week. The decrease in brood sows during the past six months is telling upon the supply of hogs being prepared for market.

The horse industry has been attracting more attention than usual. The winter was trying to apuraries. Labor is scarce. A representative states that there appears to be considerable interest among workers, and that some men do not remain long at the job, even when they get the wages they asked for.

RHUBARB RECIPES

Rhubarb comes to us when our systems are calling for a tonic and blood purifier.

It is not only a medicine, but a real appetizer, no matter how it is served.

RHUBARB SHERBET.
One quart rhubarb, one cup raisins, two lemons, one quart water, one cup sugar, two egg-whites, two tablespoonfuls gelatine.

Place the rhubarb, cut in bits into a saucepan with the raisins well washed and a bit of the lemon-rind.

Simmer until tender, then strain off the juice and return to the saucepan; add the sugar and the gelatine softened in a little cold water; also the lemon juice.

Let stand until cold. Add the water and pour into a freezer and freeze until it begins to be stiff; then stir in the stiffly beaten egg-whites.

Remove the dasher. Pack around with salt and ice and let stand two or three hours before serving.

RHUBARB PINAPPLE CAKE
One cup milk, two eggs, one tablespoonful butter substitute, one cup baked rhubarb, one tablespoonful cornstarch, one cup sugar, three cups flour, three level teaspoonfuls baking powder, one cup shredded pineapple.

Stir the sugar, melted butter, egg-yolks and a little of the milk together until cre; mix.

Stir alternately with the milk and beat up well all the flour except one cup; then stir in the remainder of the flour to which the baking powder has been added.

Stir enough to incorporate the powder with the batter but do not beat up. Fold in the stiffly beaten egg whites and bake in three jelly cake pans.

Combine and baked rhubarb and the pineapple and thicken with the cornstarch after they have been heated in a double boiler. Spread between the cake layers when cold.

Stir the filling before thickening.

BANANAS AND RHUBARB
One quart rhubarb, one cup sugar, three bananas, one pint water, one package gelatine, one lemon.

Place the rhubarb, water and the lemon juice and a bit of the rind in a saucepan and simmer for 20 minutes or more; then strain off the juice, add the sugar and if not pink enough add a small amount of red fruit-coloring.

Soften the gelatine in half a cupful of cold water and stir into the hot juice. When it begins to stiffen stir in the sliced bananas and pour into a wet mould. Chill and serve.

Minard's Liniment used by Physicians

Became a Plight of the Past.

A schooner bound from Sydney, Australia, to San Francisco, California, was becalmed in mid-ocean, while the ship was lying idly upon the bosom of the unruffled water, as if posing for the picture of the original "patented ship upon a painted ocean," the captain of the vessel became agitated by the thought that he would arrive at his destination too late to take advantage of certain prices on his cargo, as these rates had been named in the charter. Then his eye wandered to the ship's launch hanging idly at its davits, whereat the quiet scene became enlivened by the happy activity of an idea. The launch was put over the side and, at the end of a long tow line, after some effort, overcame the inertia of the ship, carrying it forward at a three-knot rate. Five times on its trans-Pacific journey the launch overcame the calm and won a quick voyage for its ship, with the result that the owners will install small powerful launches on their entire fleet of schooners for the purpose of meeting similar emergencies. In other words it is believed that the happy idea that the skipper found operating in that mid-Pacific calm will make it unnecessary for the modest sailing ship of the world to sit idly on their keels waiting for the wind.

MAGIC BAKING POWDER
Contains no alum
We unhesitatingly recommend Magic Baking Powder as being the best and purest baking powder possible to produce. It possesses elements of food that have to do the building up of brain and nerve matter and is absolutely free from alum or other injurious substitutes.

Salads of Gelatine
Just now, when the spring vegetables are so expensive, it is a good thing to have on hand several of these recipes for gelatine salads. With them you can make a very few vegetables go a very long way.

COLT DISTEMPER
You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin with SPOHN'S DISTEMPER COMPOUND. It is safe to use on any colt. It is wonderful how it prevents all distempers, no matter how cold or horses at any age are "exposed."

SHILOH
30 DROPS COUGHS
It is cooked, add a little chopped onion and celery and half a teaspoonful of salt, and simmer for a quarter of an hour. Moisten one and a half tablespoonful of powdered gelatine in a little cold water and strain the stock over it. Cut off the tips of the cooked asparagus and line tiny molds with them, or else spread them over a layer of the hardened gelatine and cover the same as the tomatoes were covered. The rest of the asparagus can be used for creamed asparagus on toast.

Her Excuse a Good One.
Carrie was invited to a party. Her mother cautioned her not to begin eating her goodies until all around the table had been helped. Carrie was honored with the first helping to ice cream. In a few moments she said: "Excuse me for eating my ice cream before it melts. I enjoy it best while it is fresh."

ARABIAN DICTIONARY
Arabian Dictionary is the Biggest of Any.
The ponderous dictionaries of Europe, even the famous many volumed etymological index of Larousse, which is the monumental work of all modern tongues, are more than surpassed by the Arabic dictionaries of 50 years ago, which are still the great authority for students in that language.

How to Cure Biliousness
Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots," long known as Mother Seigel's Curative Syrup, has no dope or strong ingredients; it cures indigestion, biliousness and constipation. Can be had at any drug store. Get the genuine. 50c and \$1.00 Bottles.

Catarrhal Deafness Cannot Be Cured
by local application as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a "constitutional remedy." HALL'S "CATARRH" MEDICINE acts through the Eustachian Tube, Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed it has a swelling sound or imperfect hearing which is entirely closed. Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the mucous surfaces.

Modern Slavery.
There is no legal and formal slavery now in any Christian country. It survives in a mild form in most Mohammedan countries. The penance system of Latin-American countries is not much different from slavery, but rests upon a different theory. The peon is not supposed to be owned as property; he is supposed to be working to pay a debt which he owes the master.

Sounded Like That.
Dorothy's mother was getting her to repeat the Lord's prayer, and all went well until near the end. And deliver us from evil," said her mother, "And deliver us from measles," repeated Dorothy.—Boston Tri-Script.

Is It a Real One?
Here is quite an easy way to tell whether a diamond is a genuine one or not. Make a small dot on a piece of paper with a lead pencil and look at it through the diamond. If it shows only a single dot, it is a genuine stone, but if it shows more than one dot you've been "had."

To Clean Aluminum.
Make a rather strong soap lather, and while it is warm put the aluminum utensils into it and wash them clean. Dry with soft cloths, and they can be made as bright as desired. Occasionally polish them with whiting made into a paste.

Bearers Copy Tepees of Indians. In the pond were a number of beaver houses, which looked like small Indian houses, writes Samuel Scoville, Jr., in Boy's Life. Most of them were built in water several feet deep and were from three to four feet above the surface and about five feet in diameter. One, however, was a huge one, built in deep water, and fully twice as large as any other. It was made mostly of peeled cottonwood poles and stood on a firm foundation of mud and sticks built up from the bottom. The poles lashed together from the top and had been woven in and out with thick brush and plastered with mud and turf until the walls were three feet thick.
