speeches, his correspondence, his public utterances, his presence at our Government caucus, was a guarantee of support, and yet he hesitated not in stating that prior to leaving home he intended look-ing over the political field, and if the Government possessed a majority he would continue his support, if not he would join the powerful side. As a political acrobat "he takes the cake," and he strongly reminds me of the man who sacrificed his religious views to obtain alms. Yet conscience is always powerful, and in the commission of the offence remorse drew from him the exclamation "Good bye faith, I'll come back when there are better times." Such is the character my friend from Gloucester is; what a pleasant picture for those friends who without knowing him forced him into the Legislature. It is a matter of regret they did not better understand his character, this slip-shod, double acting ma-chine. Enough of him. His appearance, conduct, justification mark him, all men will know him, and accord to him his just deserts. Mr. Rvan deserves praise

The Attorney General has remarked that the late Government had paid out in the month of November the sum of \$30,000. Well! what if they did? Was there anything wrong in this. Did he want the people to remain without being paid? It had been the endeavour to convince the House by this statement that an exhorbitant sum was paid out, an extraordinary amount, and that the Government withheld certain payments until after the fiscal year. Well now it is a simple sum in multiplication. Let my astute and ingenious manipulator of figures multiply the \$30,000 by twelve, that being the number of months in a year, the total would be \$360,000 only expended, while the Province had some \$600.000 to disburse. My friend must see at that ratio what a sum would be to our credit at the end of the year. Unfortunate man at figures. He has also had the hardihood to state to this House that there was not a dollar in the Treasury on October 31st, 1882, and yet his own printed statement shows a balance at that date to the credit of the Province of \$55,162.30. Had he stated the check unts of the Board of Works and Prov. Secy's office had been overdrawn and which is entirely distinct and separate from Warrant account it was the most he could have said.

Mr. Blair-I could say more than that. Mr. Adams-My knowledge of my friend and my experience as to his statements have long past convinced me as to what he would or would not say to carry his ends. He has also enquired, what right has His Honor the Governor to sign warrants after the end of the fiscal year. In answer I would say the fis-cal year ends the 31st October, the public services must be continued, and it would be a serious crime to delay payments from October until the House in March granted Supply. Again it has been the invariable practice of all Governments—and unless tends to extend the fiscal year to the 31st Expenditure per year 1880, December, but in what manner does he provide for payments from that date up to the meeting of the House. His war-rants must be signed as usual in advance, depending on the Legislature to ratify his expenditures. He proposes some time in the future extending the year until July—but that is only supposition. He has said there was no cause for alarm, He has said there was no cause for alarm, that as a Province our financial condition was good. Well if so what a change has come over my friend since he here here here here an exact balance between Receipts and Ex-penditure I now give you the Revenue for the same come over my friend since he has been trusted with the Seals of Office. Why, Revenue Sir, if no cause for alarm, why need we bond this floating debt?
