THE ANGEL OF DEATH IN THE VATICAN; LEO THE THIRTEENTH HAS PASSED AWAY

His Holiness Died at 4 O'Clock This Afternoon, Surrounded by the Princes of the Church and Relatives—His Career and Achievements—The Procedure Upon a Pontiff's Death— Brilliant Scenes That Accompany the Election of New Pontiff.

4:04 this afternoon.

FARLIER DISPATCHES. Rome, July 20. - 12:35 p.m. - Information comes from the Vatican that it is feared the Pope's last moment is fast approaching. All the cardinals have been summoned to the Vatican. The Pope, after suffering a cardiac attack, has rallied. The Pope, although rallying from the heart attack, still continues in an ex-

tremely grave condition. An attempt to gather something regarding the Pope's condition from the expression on the face of Centra, the expression on the face of Centra, the Pontiff's valet, as he opened the window of the room of his holiness at day-break each morning, has for some days an hour, had by this time gathered, and break each morning, has for some days past been the last act of the night- they went anxiously forward, followed before going to their well-earned rest present. When the bulletin announcing watchers in the piazza of St. Peter's,

great eagerness to assume command, which, however, he cannot do until Pope Leo, is actually dead, arrived, with considerable paraphernalia, plainly indicates that he had come to stay, ordering his carriage to go home and not return. After him came the other princes of the church, all with grave, preoccupied faces, who each returned each other's greetings with such expressions as "I have not slept at all," One even was heard to say, "I think we are at the end." "Or the beginning," very likely to be the next pope. Eight

Rome, July 20. - The Pope died at early, Cardinal Oreglia, the dean of the ing the sick room was the quietest Sacred College, who has always shown and most tranquil spot in the Vatican. The Pope lies on his bed, the pillows of which are not whiter than his face. which has a strange aspect, owing to his not having been shaved for so long. His hands are folded over the rosary, which he has used for over 50 years. The famous arm-chair, which, perhaps, his holiness will never again enter stands invitingly near, with his stick beside it. While Centra, his valet, prays and weeps before a huge ivory crucifix, while Dr. Lapponi sits by the bedside, ready for any emergency. READY FOR THE WORST.

> The doctor, from time to time, rises administer nourishment, of this morning the Pontiff had taken some, Indeed, Dr. Lapponi succeeded at a respectful distance by the others in having him swallow several teaspoonsful of coffee, milk and brandy, mixed. The silence of the sick-room is occasionally broken by a hacking cough due to the gathering of phlegm in Pope Leo's throat. These coughing spells have the effect of rousing the Pontiff, causing him to open his eyes and revive slightly. While the doctors were examining their patient this morning, believing him to be in a stupor, his oliness suddenly fixed his eyes, even now brightest, on them, saying: "This time, doctors, you will not win your brave fight with death."

"It is your holiness who is brave," replied Dr. Lapponi, but before the remark was uttered the Pope was again unable to understand what was said.

ANOTHER HEART ATTACK.

great alarm at the Vatican, as the Pope was suffering from a grave increase of cardiac affection. Dr. Lapponi really thought the end had arrived, and Cardinal Serafino Vannutelli, the grand penitenary, began the prayers for he dying, and gave the Pontiff absolution in articulo mortis. His death was considered so imminent that all the cardinals were present and the members of the diplomatic corps were admitted to the sick-room, as, according to tradition, popes must die surrounded by the Sacred College, the pontifical court and the diplomats accredited to the Vatican.

The Government has decided that when the Pope's death is imminent or has actually occurred, it will hold up all dispatches until the facts are officially verified, when the first official announcement will be made.

Although this morning's bulletin may have given the impression that the Pope's condition is somewhat ameliorated, in reality the doctors do not think so. They consider that the lowering of the pulse and the diminution of the respiration are due to great prostration of the whole organism, which is augmenting, notwithstanding the fact that the patient at times takes a little nour-

The Pope continues, now and then, to mutter phrases, although unconscious. His mind evidently returns to the events which impressed him most before his illness began. A wonderful thing about Pope Leo is that every time his mind becomes clear he seems to grasp the fact that it may be the last, and he makes the highest use of When, during the alarming crisis about noon, he was lying on his bed. perfectly motionless, while around him knelt the cardinals and other members and being replaced by others. This the Pontiff's condition was posted one of the papal court, praying and not morning, as usual, their eyes were fix- in the assemblage said: "His agony is knowing whether the Pope was not aled on the window, but time passed, and almost over.
