Chicago; Ill., Jan. 4.-Baseball magnates are squaring off for the annual meeting of the National Commission, at Cincinnati, on January 9. It has been scheduled as a peace gathering, but from expressions heard during the last few days it is likely to be a pretty lively affair. President Herrmann, of the Cincinnati club will be asked some questions, and it will then be up to him to keep the gathering harmoni-ous. He will be asked why the National League put itself on record against the American on the question of dealing with minors. He must also cast the deciding vote in the Taylor case, which is likely to be one of the most sensational ever brought up in base-

President Johnson, as a member of the commission, will present the case for Charles Comiskey, and then the 'old Roman" will be called on the witthe Mariboros of Toronto and New-then it will be up to Herrmann to de-market, resulting in a victory for New-cide the case. It has been taken for market by 5 goals to 4, the score at granted that President Pulliam will half-time being 3 to 2 in favor of New- vote to drop the case, while Johnson will vote against such procedure. That will make it a tie. How will Herrmann vote? The opinion of the American League magnates, secretly entertained. s that Herrmann will vote with Pulam, and then look out for lurid fire. Comiskey announced yesterday that e would go on to a finish with it, and that James A. Hart must make good the charges he is alleged to have made to a number of friends that Taylor threw some of the games with White Socks last fall. The whole thing s so delicate that fears are entertained that it may cause a baseball war. Herrmann is the man to avert it, but

Rheumatism includes lumbago, sciatica, neuralgia, gout—for all these are the results of rheumatic poison in the blood.

Plainly, the first thing to do is to remove the poison. But this is not enough. The FORMATION of the poison must be stopped, so that nature may have a chance to dissolve and eliminate the crystals which have already formed. Unless this is done there can be no cure—no more can I do to convince you of my days.

City Built on Rubies.

Mogok, a city in the northern Shan states of Burmah, is literally "built upon rubies." The earth in the streets and inclosures is of a crystalline limestone formation, containing numerous veins of gem-bearing gravel. The houses and pagodas represent so many rubies converted into cash. The houses of Mogok are practically the dwelling-places only of ruby miners and merchants and their families. It is said that a king would be ruling at Mandalay today if it had not been for rubies; and Mogok would still have been an obscure village, with a few score inhabitants had there been no rubies in the vicinity, whereas now there are about 40,000 people of every color and hue—the Englishman, American, the Frenchman and German, the Armenian, pure native and Jew. Mogok is so far removed from the ordinary tourist's track that few venture there who are not on business bent, owing to the difficulty of transit in Burmah. Fair promise of gain will tempt men to go anywhere in search of it. Some go to burning South Africa for diamonds, and others to frozen Alaska for gold. Even so men go to Burmah for rubies. For the ruby ranks next to the diamond among precious stones, and holds premiership all its own among the colored gems with which men and women love to bedeck themselves. It is not strange, therefore, that many should search for a stone that is a brother to the amethyst, the sapphire and the topaz,

diamond in value, being, in fact, the gem of gems of the east. A flawless five-carat ruby will bring twice as much as a diamond of equal weight, while a ten-carat ruby will bring three times as much, and cannot be bought for much less than Death of W. H. Baldwin
