The same argument with equal force may be applied to every industry in the country, and as a matter of fact they are all on all fours. We do not wais or concentrators anywhere near the claim. The man's mind is not upon the output, but upon the opening up of his prospect for the purpose stated. In the case of the prospector, therefore, the pro-posed tax will be a tax on mining pro-cesses, rather than on values that might be properly the subject of taxation.
