constituted the B. C. Telephone com-

adopted without comment, follows:

EISTING STEAMBRS Canadian Fish and Cold Storage Co. Will Contract for Construction of Big Fleet for Halibut Business

ORDERS SIXTEEN

Tenders will be invited in England for sixteen halibut fishing steamers to used in northern British Columbia waters next year for the Canadian Fish & Cold Storage company, which has a large cold storage plant practically complete at Prince Rupert. George H. Collins, managing director of the com pany, is now on his way to England to award the contracts with British shipbuilders for the fleet. The orders will be scattered as the company is in a hurry to secure the sixteen vessels. It is anticipated that they will be ready for delivery in the Spring. With former. the sixteen vessels of this company at work next summer and the new British Columbia Fisheries, Ltd., in the field with a fleet of steam trawlers brough from the crowded fishing grounds i the North Sea, and other concerns at work there will be a vast development shortly in the halibut and sea fishing industry of British Columbia. Mr. Wilfred Vere Doughty who is so well known in connect with the Grimsby fisheries, is coming to Victoria shortly to complete arrangements for the extensive business to be developed by the B. C. Fisheries company, which will have not only a large cold storage depot at Porches island, connected by trackage with the Grand Trunk Pacific line, but also can neries, salteries, oil works, etc., and will place a fleet of fishing vessels which will probably total a score of steamers in the waters of the north. The Canadian Fish & Cold Storage company proposes to commence business next April and it is hoped to have the fleet of sixteen fishing vessels ready for that time. The company is capitalized at \$1,500,000 and the plant will cost when completed close on \$500,000

and will be the largest of its kind in the world. The building is of reinforced concrete built at one end of the harbor of Prince Rupert, and will be fitted up with the most modern machinery. The storage capacity will be fourteen million pounds of fish, with a freezing capacity of 110 tons per day. With the completion of the G.T.P.

Mr. Collins points out that fish from the Pacific Coast will be put in the eastern market three days quicker than now. The establishment will give em ment to 500 men, none of whom will be Japanese. White men and In dians only will be employed. The remaining directors of the com-bany are: Andrew Kelly president of the Western Canada, Flour millio, Win-

; James Carruthers of Montreal grain exporter; and Grier Starrett, for mer manager of the New England Fish company.

MR. COSTE IS

a share in nearly all ...e big engineering works of Canada, with the planning of all the larger harbors and the development of waterways, since 1883. Mr. Coste, who is a member of the British Institute of Civil Engineers, studied engineering in England under one of the greatest of British engineers, Sir James Brunlees, past president of the Institute of Civil Engineers.

ENQUIRING INTO DYNAMITE FUND

(Continued from page 1.)

Labor Officials Summoned.

SAN FRANCISCO. Dec. 16 .- Olaf Tveitmoe, secretary-treasurer of the State Building Trades Council, and Antone Johannsen, an organizer for that organization ,arrived in San Francisco today from the East. Both were served in Sacramento with subpoenaes directing them to appear before the federal grand jury in Los Angeles. Johannsen went immediately to his home in Corte Madeira, where his daughter died a day or so ago. He said that he would attend the funeral and then go to Los Angeles, departing probably tomorroy night. Tveitmoe said he had business affairs that would necessitate his presence here for two or three days, and that then he would go to the southern city. Both men went east to attend labor convention before the confes-

sion of the McNamaras. Both Tyeitmoe and Johannsen talked freely and declared they had nothing to fear from the national or local investigation of the relations of labor leaders to the dynamiting of the Times,

was nothing in his resolution which could be construed as an insult to "sen- 798,988. Many improvements are resitive Russia," and urged senators to adopt it without any modification whatever.

The first stir over the announcement that Russia had become aroused over the proposed action of the American congress in cutting off treaty relations with that country and that international complications might ensue, soon was followed by another thrill when six members of the ca...net were summoned to the White House late in the afternoon.

Officially it was stated that the cabinet had been called in council to pass fnally upon President Taft's message on department aimirs, to go to congress next Thursday. The meeting lasted for more than three hours.

Throughout the day an effort was lade in official quarters to minimize the importance of the Russian ambas ador's action.

ON THE GROUND age remarkable in itself, but which becomes all the more remarkable when his strenuous and eminently successful career is remembered, together with the eer has been connected. In September, 1908, Bishop Cridge preached in the Church of Our Lord for the last time. It was little realized then that it would be for the last time. but within a week of that memorable occasion the light left his eyes for ever in this word, and since the date of that unfortunate affliction he has gone on guided by the spiritual light within. In his appointment to the post of chaplain here Bishop Cridge was successor to the first chaplain and preceptor sent to the colony from England, the Rev. Robert J. Staines, who arrived in Victoria in the year 1849. When Bishop Cridge and his wife (who died in 1905) came to Victoria some six years later they discvered a field where all their abilities and tact and patience one raid, in which five schooners were nd loving sympathy were needed. They were very popular from the first, and made a warm place for themselves in the hearts of the colonists of all creeds and all nationalities, a place which was always maintained.

the take from the rookeries on St. Paul and St. George islands in Bering sea 12,500 skins taken by the pelagic sealers, including the catches of the Vic toria and Japanese sealing fleets, and 500 Cape of Good Hope skins. The catch offered by the Russian government from the Copper island rookery, but 900 skins, will be sold in March next. The meagre number of skins from Copper island is evidence of the great inroads made by the seal-raiders from Japan into the herds of the Com nanderoffski group during the past few years. In less than a decade the total number of seals on the Copper and Bering island rookeries amounted to 60,000, but the concerted raiding during the Russo-Japanese war, when the guard was withdrawn, slaughtered the greater portion of the herds. In
