**BIG CONCERN HAS** 

Another Automobile Concern Ex-

cured For Start.

An automobile plant that will have 500 hands on its pay roll next summer has taken an option on a factory site in London. As it will be some time before the factory can be erected, tem-porary quarters are being secured in which work will be commenced shortly. All of the details are not yet completed, and the name of the company and other definite items are not being made public at this time. It is expected that these will be announced shortly. A represen-tative is at present in the city com-pleting the details. For the present the cars will only be assembled here. The parts will be pur-chased from the best manufacturers. Later the parts will be manufactured here, and while it is expected that it will be some time before this can all be accomplished, all plans will lead to this eventually. The car will sell for approximately

conflict. One docker was killed by the misdi-rected fire of his own party. The total number of serious fires in Belfast since Wednesday last reached 214 this morn-Wednesday last reached 214 this morn-

PREPARE FOR WHEAT RUSH OTTAWA, Sept. 1.—(Canadian Press Dispatch.)—Efforts are being made by the Canadian railways to reduce the number of their cars on the other side of the border, in order to make provis-ion for the handling of the 1920 wheat crop. In recent weeks the balance of Canadian cars on the United States lines as against American cars in Can-ada has been greatly reduced. So far as possible, Canadian railways are getting their own cars back here and are not loading, for shipment to United States points, any Canadian cars which would be serviceable for the handling of wheat and other grain. Enforcement of the curfew ordinance Enforcement of the curfew ordinance in this city last night had a quieting effect for the night. All persons with-out permits were compelled to leave the streets at 10.30 o'clock and all tram cars ceased running at 9 o'clock. Be-fore midnight the streets were almost deserted and only a few persons with-out permits were arrested. There were several fires in various sections of the town during the early evening, but no Berious rioting occurred. . EVENTS OF TUESDAY.

Announcement of real estate trans-fers for the months of July and August in Commissioner Grant's office shows that a total of \$5,000,000 in real estate has changed hands in London during the first eight months of the year. While figures are not completed to date property transfers already entered and assessed shows that the \$5,000,000 mark has been clearly passed.

Up to the end of June of the present year 1,598 transfers of property had been recorded, valued at \$4,324,883. The June total was 305 transfers, valued at \$765,480. During the past months of July and August a total of 342 trans-, fers were recorded, averaging nearly \$3,000 each.

That the 1920 record of transfers will

# be in the vicinity of \$7,000,000 is ad-mitted by the most conservative, and many do not hesitate to predict a \$10,-000.000 year.

FORTUNES MADE.

Fortunes have been made in real estate in London, it is stated, during the first two-thirds of the year. People in moderate circumstances when the new year entered are to-day able to write their personal worth in five

figures or more. While a slight falling in transfers recorded was noted in the past two months, this condition is ascribed large\_ ly to the summer holiday period. The

diately. "I always had the idea that it was

"I always had the idea that it was the intention to put the complete plans in effect immediately," said the alder-man. "Now I see that the plans are something that will not be completed until away in the future. They are simply a vision of what London may become with careful co-operative work of all bodies in the meantime."

CO-OPERATION IS NEEDED

Acting on the suggestion made by Noulan Caouchon, the town planning committee will likely ask the Dominion Railway Board to send one of its engi-neers to London to look over the rail-way situation. Ald Seabrook, who is chairman of this committee, stated that this would be taken up at the next meeting. This will be called early next week in all probability. In this connection it is stated that several aldermen who were opposed to the principle of town planning prior to last night have changed their attitudes. Ald Ashton said to-day that he realizes that the plan as outlined does not necessarily mean that the city is to be committed to any large outlay imme-diately. Acting on the suggestion made by

TRAIN FOR CITIZENSHIP.

ferring to the Bell Telephone's rate in-crease application the mayor said: "We must present a united front against all these applications for higher rates. The Railway Commission doesn't rep-resent the people." T. J. Moore, of Guelph, thanked the mayor for his address. He said all the municipalities believed a great deal de-pended on the development of the hy-dro-electric system. They were all carefully watching the various applica-tions for increased rates.

they will have to pay income tax addition to their business tax.

President Baker's address was a lengthy one, covering a wide field of municipal activity. One important point was touched upon, that of train-ing in citizenship. The president said, DRUG VENDING CONTROL

Widespread interest also centers in the going into effect of the New Drug Act that will, it is believed, tend to during the night. **TWO BADLY HURT IN** 

point was touched upon, that of training in citizenship. The president said, in part:
"It is a disgrace that Ontario gives the vote to anyone without a test as to what citizenship means. Steps should be taken by this organization to see that not only the foreigners but the youth of our own land be trained in good citizenship."
Other points touched upon by the president were the need of a provincial commission to report on reform of municipal government.
The advisability of municipalities employing as civic officials of only persons who have had a univer ty training in municipal affairs."
The employment of an expert who would advise municipalities on all affairs of public importance.
The advisability of the creation of a purchasing department of the Hydro-Electric Commission to purchase supplies for the municipalities.
TO WATCH LEGISLATION. At Wardsville. WARDSVILLE, Sept. 1.—This morn-ing about 10 o'clock, as Mr. R. Dobson and son, Jack, were driving to Glencoe their car collided with one driven by Jsaac Waterworth as the latter was turning in at the gate of Wm. Gould. Mr. Dobson and Jack were thrown out, the former suffering a broken shoulder and the latter internal injuries, which, however are not recarded as danger. however, are not regarded as danger-ous. Mr. Waterworth escaped without

**U. S. ADMONITION IS** 

Cable.)—Terence MacSwiney, iord I mayor of Cork, who has been on a hun-ger strike since August 12, in protest against his arrest by the British author-ities, suffered a change for the worse last night in Brixton prison, this city, where he is confined. Late morning editions of London newspapers say he is sinking rapidly. A complete numb-ness of the limbs has developed, and MacSwiney can no longer speak be-cause of weakness, it is said. Lord Stamfordham, private secretary to King George, has replied to a letter from Horatio William Bottomly, mem-ber of Parliament, urging the release of MacSwiney. He told Mr. Bottomly that, even if the King favored the re-lease of the Mayor of Cork, it could be effected only by the sovereign's per-sonal action in the face of the advice of his ministers, with the presumable result that they would resign. He de-clared, also, there was the further risk that the "country at large might re-gard the price paid too high for the ob-ject obtained, and blame the King for creating a grave political crisis at a time of special national stress and anxiety."
