SHIPPING LIVE EELS FROM CAN-ADA.

Three hundred barrels of live eels were shipped by Dominion Express from Montreal to Germany and Holland recently. This is believed to be the first consignment of its kind to leave the country for Europe, and hopes are entertained of its marking the beginning of a regular trade of some profit to the Dominion and in particular the province of Quebec. The eel has long been a favorite article of diet with epicures of certain European countries, but hitherto Canada has not placed its product upon the European market.

The second second
