

dite limestone are not infrequent, and are probably derived from the chondrodite limestones which lie to the north west of Carp station and the vicinity of Mississippi Lake.

H. M. AMI.

PERSONAL NOTICES.

MR. LEHMANN. Two months ago we published a valuable and very readable paper on the manufacture of sugar from the cane, as practised in Louisiana, U.S.A., from the pen of Mr. Adolf Lehmann B.S.A., a member of the Club. As many of our readers know Mr. Lehmann personally, they will be interested to learn that he is now in Germany, prosecuting his studies in Agricultural Chemistry, with a view of taking the degree of Ph.D. For some years he was Assistant Chemist at the Central Experimental Farm, and in that capacity he did excellent work, all that he did being marked with thoroughness and ability. He then went to the Experiment Station at New Orleans, La., U.S.A., where, under the directorship of Dr. Stubbs he was especially engaged for a year and a half in the chemistry of sugar manufacture.

At Leipzig and Göttingen, Mr. Lehmann purposes making Bacteriology as applied to Agriculture, his special study. The Field Naturalists' Club wish him all success in his new field of labour. F.T.S.

MR. CARRINGTON. On October 17th some of the members of the Club had the pleasure of meeting Mr. J. T. Carrington, the well known English Naturalist who has just returned from Manitoba with Miss Winstone and Miss Flora Winstone, where they have been inspecting the working of the "Young Colonists' Aid Association." Mr Carrington is now the editor of that justly, very popular magazine, "Science Gossip" which has lately changed hands, and appears as a new series, in an improved form. Mr. Carrington was for 13 years editor of the English "Entomologist" and for many years was connected with the Natural History department of the *Field* newspaper. He is to have associated with him Mr. Edward Step, also an accomplished Naturalist. Mr Carrington made considerable collections of botanical specimens in different parts of Manitoba. While in Ottawa, the party visited the Departmental Buildings, the Experimental Farm and the Geological Survey. Mr. Carrington purposes to visit Canada again next spring, and we sincerely hope that it may be possible for him to attend one of our excursions. J. F.
