**Important to Grocers and Consumers of Groceries,**

Do you want to know all about the manufacture of sugar, and how it is graded? If so, buy a **FELKER'S GROCERS' MANUAL**. Are you selling sugar-cane syrup, or is it starch syrup made from the sulphuric acid? The "Manual" gives directions for testing the adulterated syrups. Is the mustard you are selling genuine or is it simply turmeric sharpened by cayenne pepper? Is your ginger the real article? The "Manual" tells you how to find out. Do you want to know all about the manufacture of cheese, chocolate, cigars, starch soap, salt, new process of wheat flour, and over three hundred other articles? Then buy the "Grocers' Manual." Can you tell codfish from hake or haddock? Do you sell cinnamon or cassia? What kind of coffee do you buy, and do you get the kind you suppose you do? Can you tell how to determine the quality of indigo? Do you understand the burning test, flash test, and the laws in relation to kerosene oil? Can you tell when lard is adulterated? What constitutes a No. 1 mackerel, and No. 2, 3 and 4? Do you understand the terms clear pork, mess and prime mess pork? The "Grocers' Manual" answers all the above questions. Do you know all about tea; how it is prepared, adulterated, and how to judge of its quality? The "Manual" will tell. It tells all about tobacco; how it is raised, cured, and made into smoking, chewing and snuff. Can you tell whether your vinegar is pure, or whether it contains sulphuric or muriatic acids? How much tare do you get on your coffee, cinnamon, syrup, figs, etc., etc.? The "Manual" gives the tare as fixed by law, and as established by custom. "Felker's Grocers' Manual" is a book of over 300 pages, neatly bound, and is worth ten times its cost to any grocer. It is invaluable to housekeepers.

SENT POSTPAID ON RECEIPT OF PRICE, \$1.50.
