HOW TO STAIN A SMOOTH FLOOR -- A smooth floor may be stained a rich dark brown by the use of one pound of asphaltum mixed with a half pound of beeswax, or a greater quantity of each in the same proportion. If the composition is judged too light, additional asphaltum may be cautiously added. This is applied with a sponge or brush. A thin coat of shellac is then laid over the whole, and the surface smoothed with sandpaper. A coat of common varnish will give a splendid finish.
