

HAY P. O., Co. HURON, Jan. 28, 1873.

MESSRS. GLASGOW, MACPHERSON & Co., CLINTON.

GENTLEMEN,—Being at present running one of your "Climax Double Cylinder" threshing machines, and this being the second of your manufacture that I have owned, I take great pleasure in recommending your machine as giving maximum speed with minimum power, and satisfaction to grain owners and threshers to a greater degree than any other machine now before the public. The undersigned farmers, on whose grain the machine has been tested, testify to its intrinsic value and general merits.

Respectfully yours,

CICERO ALDWORTH,  
WILLIAM CAMPBELL,  
RUSSELL I. ROSS,  
WILLIAM STONEMAN,

THOMAS WEIR,  
DANIEL MCCOLL,  
JOHN MUNN,  
JOHN FITZGERALD,

HENRY GLAMILL.

LOGAN, Co. PERTH, Nov. 23, 1872.

TO WHOM IT MAY CONCERN.

I have much pleasure in testifying that, having frequent opportunities for these last two years of witnessing the threshing of different machines in this neighborhood, I consider that the machine run by Smith and Edmondson, and manufactured by Messrs. Glasgow, Macpherson & Co., Clinton, has given, I believe, universal satisfaction. I also state that if they had two machines instead of one, they could have been fully employed.

JOHN WAUGH.

LOGAN, Co. PERTH, DEC. 12, 1872.

MESSRS. GLASGOW, MACPHERSON & Co., Clinton.

GENTLEMEN,—This is to certify that Smith and Edmondson have threshed for me the last two seasons with your Climax threshing machines, and I never saw faster or better work done by any other machine.

Yours etc.,

WILLIAM ROBB, J. P.

BONDHEAD P. O., Co. SIMCOE, FEB. 25, 1872.

MESSRS. MACPHERSON, GLASGOW & Co., Fingal.

DEAR SIRS,—It is with pleasure I write to let you know about the "Climax" threshing machine I bought from you last year. It has given good satisfaction this season, and would have done so last, had I known enough to keep men who were favorable to the Abell machine away from it, for they done all they could to keep it from working satisfactorily. This season I got two good hands to help me, and kept Mr. Abell's patronizers away from the machine. We can easily beat any machine in this locality. We could thresh more, and clean it better, with less waste, than the best Abell's machines. We offered to thresh against the
