

THE FAMOUS "606"

Continued From Page 1.

manent cure apparently are effected there is always the possibility of recurrence, as has been in the case of sleeping sickness, where, although a specific remedy was thought to have been discovered, many cases have since recurred within a year.

To counteract this possibility to some extent at least in the case of syphilis, an effective method known as Wasserman's Reaction, which is positively effective in the specific germ is or is not still alive in the body. This reaction is used on the patient at intervals of a few months, even after every apparent trace of the disease has disappeared. The results of the experiments now going on in Toronto with "606" will be watched with interest.

REV. JAS. FLECK DEAD
Was Pastor of Knox Church, Montreal,
for Over Quarter of a Century.

MONTREAL, Jan. 3.—A cable was received in the city to-day from Ireland announcing the death of Rev. Jas. Fleck. Mr. Fleck was the pastor of Knox Church in this city from 1876 to 1909, when he was retired on pension, owing to poor health. He was a popular preacher, and greatly beloved by his congregation. In 1896 he was elected moderator of the Synod of Montreal and Ottawa.

TO ABOLISH SEASICKNESS.

By equipping vessels with gyroscopes it is claimed that all motion, even in heavy seas, may be controlled. The sails on old-time ships were an unpleasant

control. Steamships in turn by increasing the resistance to the wave motion, attained steadiness as well as speed. The friends of the gyroscope believe that the gyroscope will work a radical change in ship building and did the introduction of steam. It

been found by experiment that even a small gyration of the mass of the gyroscope does the work of 200 pounds of ordinary weight in steadying the ship. Thus it is shown that a ship tilted at an angle of twenty-five degrees, and a gyroscope tilted to make itself to an angle of twenty-five degrees, will be steady.

then allowed to rock back to
keel, would come to rest with the edge
of the gyroscope in three rocks in
direction and then remain perfect
steady.

His Proudest Day.
Minnesota is going to erect a monu-

ment to the late Governor John Johnson. Suitable and characteristic inscriptions for the pedestal are being considered. There is a strong sentiment in favor of inscribing Johnson "proudest day," says The Sioux City Tribune. After he had made his grand impression at the meeting of the G

iron Club in Washington and name became frequent in mention the democratic candidate for the presidency, he was asked on his return it was not his proudest day. "No," he replied. Pressed to what it was, after much evasion, reluctantly said: "The proudest

of my life was the day when I went home Saturday night with my week's wages, and, giving them to my mother, proudly said: 'Mother, I need never take-in washing again.' Certainly, put that inscription on the monument. Nothing better marks the character of the man.

A Wonderful Invention.
After half a century of ceaseless persistent endeavor, a machine has been perfected that will harvest the cotton crop of the south, and it is confidently predicted that it will be used to the cotton plantations of the south.

as advantageous to the cotton
as the reaper has proved to the
grower. The thing seems to have
man intelligence, for it robs the
ture boll of its store without
slightest harm to the unripe boll
