

COBALT'S RISING GLORY IS TO DISPEL THE SHADOWS OF ROSSLAND'S GLOOMY PAST

INVESTORS' CHANCE TO GET EVEN BUT MANY REMEMBER ROSSLAND

Mining Deals of Immense Magnitude Have Been Put Through in Cobalt Mining Camp—Old-time Silver Chasers Swarming into the District—Just a Week Last Year, R. G. Godfrey Digs Up Ten Thousand Dollars' Worth of Ore.

Cobalt, May 17.—(Special.)—A gentleman from Toronto, while in Cobalt last week, remarked to the writer, "A burnt child dreads the fire," and to make quite plain his thoughts, he added: "Toronto got badly scorched in Rossland and still remembers War." He further said, "Now right here in Cobalt is where they ought to square themselves, but they will not embrace the opportunity. Into a lengthy recital of Toronto's past mining ventures and losses, this man of good standing went and he was sincere in his regret that this camp had not been filled with Torontonians who had suffered through previous experiences in Canadian mining camps, and that they had not got in and staked out claims."

The man was sincere in his somewhat sarcastic utterances, and it is to be feared he was possibly correct in some of his conclusions. "Wake up, Toronto," and seize the trade of the great growing north! "Trade follows the flag" may be converted into another aphorism, "Investment follows trade," and when Toronto follows the trade the people in this country can rest assured more Toronto capital will be invested.

During the past ten days much has happened in Cobalt camp and many new mining deals, some of magnitude, have taken place. New York, Chicago, Philadelphia, Detroit, St. Louis and Cincinnati have the Cobalt fever. From Winnipeg to Vancouver the fame of the camp has spread to such good effect that at present there are three parties here who are taking over properties and developing them. In the western boom it was considered a great thing if one out of two hundred claims became a shipper. In Coleman Township up to the present stretches of square miles are laid out into mines, every one of which is a shipper and shippers of the richest ore ever sent out of a camp.

History daily repeats itself here, and the marvelously quick outputs of mineral wealth from Coleman Township, that brought the camp into world-wide notoriety a year ago, are being repeated. R. G. Godfrey last year was a cook for a party up here. This year he got a man, named Ingham, from Michigan, to grub-stake him, and he has been working down the railway a couple of miles south of Cobalt Station. After a few weeks' work he made a find and his discovery post was the north half of the northwest quarter of lot thirteen in the third concession of Coleman is dated April 3, 1906. His claim duly passed inspection, and he got to work about three weeks ago. On Monday, May 14, Godfrey had three bags of 1000 oz. ore bagged and ready for shipment. He has a good ore body in sight, and he will ship a carload in another three weeks, which will easily net him ten thousand dollars.

Miner's Mine Hands. Some of the mines which, under old managements, became famous, are passing into other hands, and in some cases into entirely new management. The old Hudson Bay's Stormont mine is now known as "The Silver Queen." This is the mine that enabled the directors of the old company to declare a dividend of two hundred per cent. the result of its first shipment of ore, which was got out with picks and shovels and netted \$37,000, and as a result its dollar shares went from 50c to thirty, forty, fifty and sixty dollars in almost as many days, and have remained at sixty, sixty-five and seventy dollars. Mr. Culver, the managing director, is now in charge, and a complete plant, up-to-date in every particular, is being installed.

The Earl properties have always loomed up big in the eyes of the camp, and much attention has been directed to their operations. It has always been difficult to obtain reliable information regarding their working. It is known that they have had the largest force employed of any mine in camp. They have shipped over a million dollars' worth of ore in the last fifteen months. The new deal, however, the property from which these ore shipments have been made had been stocked is received here with incredulity. Twenty acres, it is said, are covered or included in the last deal. Captain DeLamar, E. P. Earl and Col. Robert Thompson are millionaires several times over. A capitalization of one and a half millions, divided into five dollar shares, is said to have resulted in their five dollar shares on New York curb going to six dollars in 24 hours.

Shares Taken Up Rapidly. The Cobalt Central Silver Mines, Limited, is the result of a visit paid to Cobalt by J. J. Bamberger of New York City some weeks ago. He returned last week, accompanied by Mr. Munson, also of New York; John C. Quinn, and George Lozenky of Buffalo. Fearless Elk Hunt, a very famous mines' experience. Mr. Quinn is a miner of 40 years' standing, and came from the mother lode of California. This Cobalt Silver Mines Co. has acquired the Green property, and its shares have been taken up in New York with great rapidity. They propose to divide their 40 acres into single acre blocks, and lease alternate blocks as in Goldfield, Manhattan, Cripple Creek and other western camps. C. H. Hanson is the vice-president of this company. They are incorporated, selling stock only on New York curb.

There is not a shipping mine in Cobalt camp whose shares will not readily sell there. Haileybury is filled with prospectors coming into the mining registrar's office, and one of the latest deals consists of a large purchase by an agent of Mackenzie & Mann.

Up the Montreal River prospectors are going by the hundreds, and many have come back from that direction having staked out claims. A well-known British Columbian prospector, who had been eighty miles up the river, came down one week ago to day, and states that between the railroad and Metachewan he met over thirty men. Many of these were utterly inexperienced men, who had the mine and predicted many accidents and much disappointment.

Greatest Camp in World. Many tenderloins and many old-timers are going on to Boston Creek, Abitibi and Hudson Bay. Mayor Larry O'Connor of Sudbury was in camp last week. He has sent three parties this year to Hudson Bay, three men in each party. They have gone via Blasco, Chapleau and Liskeard respectively. He is most enthusiastic regarding Hutton Township, and predicts Sudbury will be the greatest mining town in the world before 1907. His prediction does not worry Cobalt. There is plenty of room for both.

In the Temagami reserve there is great mining activity. W. A. Cockburn of Sturgeon Falls came into Temagami the other day, bringing samples with him. He states a different formation exists there to Cobalt, reports traces of silver and gold, but is most enthusiastic over a copper vein four feet wide which has been traced for three hundred feet. Two shafts have been sunk to a depth of fourteen feet, and they claim 17 per cent copper, the ore being copper-galena—a seven per cent copper and a large body of ore means an enormous fortune. He has twelve men working.

Messrs. Dunlop and Gibson are working on an island in the reserve about two and a half miles from Bear Island. They also have a copper vein and have erected buildings and done considerable work, having six men employed. They worked last fall and part of the winter. Mr. Richard Gibson is in charge.

The Aresenal Development Company have been at work all winter with a force of twenty men, but are closed now, preparatory to installing a new plant.

Dan O'Connor in his hotel, and steamship company, has a gold and silver mine combined. A large fleet will carry the passengers on up to Lady Evelyn, where the third of his five boats is rapidly approaching completion. It will accommodate 150 guests and its total equipment has cost \$22,000. It has been built on the same principles as the beautiful Temagami Inn, but is of frame and twice the size of this summer with Professor Wilmut in charge.

The building boom at Cobalt has now settled into a proper condition, and it will henceforth be a case of supply and demand. Perhaps the best indication of Cobalt's prosperity is the business done at the postoffice yesterday. 1000 pieces of mail matter were handled. The new hotel is almost completed and will be opened in a few days. Public opinion in all these towns is healthy, and Haileybury, Cobaltites and the public will not stand for what is vile.

The license question is again to the front by the government's attitude in refusing the "Attorney" at Haileybury, a license, generally, opinion in all these towns is healthy, and Haileybury, Cobaltites and the public will not stand for what is vile.
