bales.

Cotton Gossip.

Marshall. Spader & Co. wired J. G. Beaty, King Edward Hotel, at the close of the market:

Some things point to local stock having passed into hands intending its shipments to New England, and it seems nearly sure that notices were stopped fo-day by parties having heretofore arranged for this action.

This should be considered a favorable influence on the local market, as cotton cannot be delivered here from the new corpon contract probably at present prices.

In other respects, however, the market does not present a favorable aspect for speculation for an advance, and we believe best results will be secured by sales of the monte of trade reports to Bradstreet's Rys: There has been little change in the conditions of trade here during the past week, which fact is largely due to the continuance of warm weather and the resulting lack of demand for heavy goods. But the outlook continues bright in all directions. Retail Trade generally continues to improve and coljections show an improvement over those of this time last month. There is a movement on foot amongst local wholesale drygoods houses to shorten credit. A new arrangement will be arrived at, to take effect Feb, 1 next year. Drygoods trayelers are out with spring lines, and they report a fair volume of business. General hardware lines are moving well, and there are exceedingly heavy from the west. The greecy trade reports a fair movement. Sugars have an advancing tendency, and there is a shortage of dried fruits there, with higher prices for Valenda raisins and currants. Deliveries of country produce are still on the light side, but farmers are restill on the light side, but farmers are restilled to the light side, but farmers are restilled to the light side, but farmers are restilled to the light side, but farmers are restil

feature of trade here during the past week has been the heavy movement in drygoods lines. Prices in all directions are unusually high, but, in spite of this, the demand has never been better, and it has very largely been for goods of the better grades. The prospects are this will continue to be a feature of trade for some time, at least the prosperous condition of the country thruout favors this expectation. Other lines of trade are also feeling the benefits of the general prosperity in the same way. The heavy local and outside demand for hardware is largely the result of continued activity in building and in general lines of manufacture. Country retail trade is more active, but there is but little increase in the receipts of country produce here, and values hold firm. The export demand for cheese is heavy and butter is firm on light receipts here. Hides are less firm, while the demand for leather continues fairly active. The cattle trade is suffering from the large number of poor stock that are coming forward. Choice cattle are scarce, and both butcher and export trades are duli on that account. Hogs are again scarce, with prices tending upwards. Provisions are firm on light stocks.

Winnipeg reports say: Wholesale and retail business thruout the west continues active, and this part of the country shows no sign of slackening. The grain continues to come forward in unusually large lots for so early in the season, and the high grading is still maintained. Owing to the large increase in shipping facilities, the amount of grain taken east of the Great Lakes before the close of navigation will be much greater than ever before. Orders for wholesale lines are good, and retail trade is reported fairly active at all points. Values of commodities hold firm, and collections are fair to good for this time of the year.

Vancouver and Victoria reports to Bradstreet's says: There is a seasonable demand for all lines of wholesale goods. The trade of the interior is reported active, and local industries continue busy. The dema

Mining About Rossland.

The west fully realizes the value of Westinghouse apparatus in mining. The West Kootenay Power and Light Company, which supply electricity to many of the mines about Rossland, are adding to their fine equipment six Westinghouse raising transformers of 1875 K.W., and 15 lowering transformers of 1875 K.W., and 15 lowering transformers of 1250 K.W.

Thanks to the perfection and economy of Westinghouse apparatus, the use of electricity is everywhere increasing. Even the stam locomotive is being replaced by Westinghouse electric locomotives for mine hau're, fast traction work, factory yards, etc.

## MULES ARE SELLING HIGH.

Are Scarce and Valuable

### MRS. WALDMAN'S DEATH.

Guelph, Sept. 28.—(Special.)—Further news from Et. Elizabeth's Hospital at Danville, Ill., in reference to the death of Mrs. Hy. Waldman of Guelph from injuries received in the Wabash wreck at Catlin, shows that she suffered intense agony for several hours before her death. The burns covered all parts of her body.

Mingled with the moans of the dying woman were the piteous cries of her three children, one of whom, Vincent, was lying at death's door in the same ward, and the other two, John and Marguerite's condition is the most critical, and the nurses say she may critical, and the nurses say she may die at any moment. She has inhaled flames, and her body is burned to a crisp in many parts.

### THAW'S REQUEST DENIED.

A collision between a Dundas and of special sessions to the criminal an Avenue-road car at Queen and branch of the supreme court of New Yonge-streets broke several windows. | York.

NOTE-The words underlined in this text are selected from

### When the Dunlop hands are not found stampt on rubber, there's something mist.

The rubber business has no center. In every nation there is at least one firm which has thoroly developt the sience of preparing finisht rubber from the crude imported stock. Here in Canada the Dunlop Company has held a stedfast purpose, and now it is lookt upon and talkt about as Canada's national rubber supply house.

### Pneumatic Tires

Altho the name "Dunlop" has come to stand for a pneumatic tire that may be easily attacht or detacht, it has as good a right to stand for a pneumatic tire of any form-for the inflated tire is the invention of J. B. Dunlop. It was an easy process to develop the Dunlop idea and apply it to pneumatic tires for automobiles, sulkies and and stouter fiber.

### Solid Rubber Tires.

Skilfulness in one department of rubber tire making is sufficient license for successful also. It is all a matter of rubber. Dunlops make tires Side wire tires (an exclusive steam, hot or cold water or oil.

Dunlop property) for heavy vehicles and wagons. The endless side wire tire for motor trucks. These lighter tires are shipt to the dealer in continuous lengths.

### "Comfort" Rubber Heels

for anyone who has never walkt on heels made of Dunlop rubber. Too many rubber heels are woful imitations of shoddy and reclaimed stock, and besides having no "life," they become chipt or scrapt away after a little wear. "Comfort" heels will give a spring to the step down to the last point of wear. They are made of Para rubber, and not only will they last as long as hard leather heels, but they will also give a firmer and more buoyant step and absorb all the jar that is sent thru the ambulances, as well as for spine when hard pavements bicycles. In order to make are walkt over. Put on by all them strong enough for the shoedealers for fifty cents the heavier work, it is only neces- pair. Heels of good rubber sary to put in more rubber are worth it and cannot be sold for less.

# 

Expenditures by the Ontario Muniipal Power Commission (not to be ssion) have amounted to \$16,084.07.

Along With Good Cavalry Horses,

Washington, Sept. 28.-Difficulty is being experienced by the quartermaster-general's department of the army in obtaining horses and mules Even at high prices good cavalry horses are scarce and nearly impossible to procure. The scercity extends thruout the country. Animals, suitable for the cavalry, now are worth about \$140 a head. Mules are even scarcer than horses. Good mules are worth about \$180 a head, and are difficult to get at that price on account of the great foreign demand.
