Friday Evening, July 12.

Canadian stocks were again to-day somewhat under the influence of the depression on Wall-street, but it is believed that the worst is over on the latter exchange. A special wire this evening from the head of one of the reliable Wall-street houses stated that he had not been so bullish in months, as he was on this market now, and that he considered stocks at current prices to be great big bargains. It is considered that the New York manipulators for a decline have got all they can out of the steel strike, and that they have probably over-discounted the effect of the drought in the western corn belt. A Kansas advice, moreover, this afternoon reported cloudy weather there and betting that it would rain within twelve hours. Another favorable indication was the fact that money on Wall-street dropped to 2 per cent. this afternoon. The liquidation of the past few days is thought to guarantee a good bank statement to-morrow (Saturday).

World Office,
Friday Evening, July 12.

In Liverpool to-day wheat futures advanced 1½d to 1½d per cental. Maize options rose ½d per cental.

In Paris wheat options rose 10 to 40, and flour options 20 to 35 centimes to-day.

In Chicago to-day July wheat advanced 2½c and Sept. wheat 3½c per bushel. Sept. corn rose 2½c. Grain futures closed near the top. The rise was due to the continued western drought, as is described on the front page of this issue. No rain and fairly high temperatures were the prevailing conditions in the Western States to-day. A Topeka despatch estimates Kansas' corn crop at 50,000,000 bushels, against 103,000,000 last year. A later advice reported cloudy in Kansas and people there betting it would rain in the next 12 hours.

Liverpool receipts of wheat during the past three days 250,000 centals, including 236,000 American. Receipts of American corn during the past three days 168,100 centals.
