

## SOMETHING NEW FOR DAIRYMEN.

COIL HEATERS ECLIPSED BY

### Jacob Turner's Improved Cheese Vat.

The attention of the purchasing public is called to this valuable acquisition of the Dairy and Factory. Mr. Jacob Turner has been engaged in the manufacture of Vats and other Factory and Dairy Implements, both in the States and Canada, for the last six years, and has always felt a deficiency in the construction of the Vats, and their liability of getting out of order; thus causing a great amount of trouble and expense to the Factory and Dairyman. After years of study and labor, Mr. Turner has, at last, been able to bring before the public a Vat which is immeasurably superior to any other now in use.

The woodwork of this Vat is constructed on a different principle; whereby it is made stronger and more durable than that generally used.

The Boiler, being made adjustable, offers a better facility for shipping—as it can be readily packed in the Vat, if needed. The Boiler is lined with heavy copper, thereby generating heat, and saving in time and fuel.

The Shuts and Coupling are made of brass, and are not so liable to break by heat or cold as cast iron—of which they are usually made. The Shuts are so arranged that the Vat cannot be blown up, melted, or get out of order.

The Distributor and Water Gate are adjustable, so, in case of accident, the Dairyman can repair, or put in new ones, himself; thus saving the trouble and expense of conveying the Vat to the shop for repair.

Manufactured by **BARKER & TURNER,**

*Thames Street North, Ingersoll, Ont.*

### "DOMINION MILK BOOK,"

*As used by most of the Factories, shows WEEKLY AND MONTHLY TOTALS OF MILK RECEIVED Factorymen require no other. Manufactured only by*
