

BRIEF LOCALS

Gleanings of City and Provincial News in Condensed Form.

From Tuesday's Daily.

Rev. E. Robson is making arrangements to leave for the mainland to take charge of the Coqualeetza Industrial school, Chilliwack.

The steamer premier was taken off the marine ways at Esquimaux at two this afternoon. She has been undergoing repairs and will be again placed on the Vancouver route.

H. M. S. Royal Arthur is to-day being connected by telephone with the dock yard, rifle range and officers' club. The cable for the lines was put down this afternoon. Connection may be had with the ship from the city through any of the places mentioned.

Henry Augustus Porter and Miss Kate Beaton were married by Rev. Dr. Campbell at the Presbyterian church last night. A large number of friends witnessed the ceremony. A reception was given at 128 Blanchard street, the home of Mr. and Mrs. Porter.

"Progress and Poverty" was the subject of the second lecture by Louis H. Post at Institute Hall last night. The audience was a good one and appreciative. Mr. Post illustrated his lecture by a number of charts explanatory of the fundamental principles of political economy. Mr. Post left for Nanaimo this morning.

The new south ward school building has been completed by contractor J. G. Brown and is ready for acceptance by the board of school trustees. The building is substantially constructed and will meet the needs of the district for some years. In planning its architectural beauty was sacrificed to roominess, light and safety, nevertheless it is a very attractive building.

Henry Barwick, who died on Friday at Westminster, was born 55 years ago in Thornhill, Ont., and was a son of one of the pioneers of North York. Barwick was one of a family of 18 children, six of whom survive. For thirty years he was engaged in milling and commercial enterprises in Campbellford, Ont., and four years ago came to British Columbia.

Catholic Baptist church Sunday school held their annual meeting last night. The officers were elected: Superintendent, Dr. E. Hall; Assst. Superintendent, H. A. Thompson; Secretary, H. Galbraith; Treasurer, J. Robinson; Organist, Miss L. King; chorister, G. F. Watson. For the Bursaid mission W. Waites was appointed superintendent, and Mr. Carter assistant superintendent. On the Victoria mission a resolution was taken. Sunday at 4 p.m. the reports from the various missions will be read.

Manager Macdonald, of the Leander swimming baths, has some tomato plants growing in boxes placed just under the glass roof over the swimming tank. The progress made by the young shoots during the late spell of celebration weather was astonishing. It was almost possible to see them grow. The finest blaze the sun through the glass added to the warmth and humidity within, were like oil to fire. The temperature in that elevated region makes it possible to grow plants of the most delicate nature indigenous to the tropics.

The inquest on the body of the child found in the Fraser opposite Mission City, resulted in a verdict of "found drowned." The body was that of a female child five years old, and evidently had been in the water some time.

The right foot was encased in a moccasin, which led to the belief that the child was of Indian parentage. An Indian child was drowned at the Fountain reserve, on the upper Fraser, April 28 last, and as the body was not recovered, it is considered likely that it floated down to where it was picked up opposite Mission.

The Companions of the Forest and Ancient Order of Foresters gave an entertainment in their hall on Government street last evening. There were excellent refreshments and a good program. The latter was as follows: Opening address, C. C. Mrs. P. J. Davis; piano solo, Mrs. M. Salmon; song, Frank Scott; recitation, Isidore Cohen; song with chorus, Mrs. Wilkie; recitation, Miss Mamie Saunders; comic song, Mr. Tweedy; recitation, Miss Brauch; song, Mr. Pilling; song, Miss Clara Bray; song, Mr. Hanack; song, J. Penick; credit to Mrs. E. Lane for her work as president of the committee in charge.

The steamer Islander left Vancouver at 1:30 to-day, but has neither eastern passengers nor anything but local mail aboard. It is not known to a certainty when there will be mail through. It was promised for to-day, but as far as known there is nothing to warrant the belief that it will be here to-morrow. It is very difficult matter to get information on the mainland is open to St. Paul, and that with the exception of a few hours there has been no interruption to traffic.

Twenty-five ship carpenters at work on H. M. S. Hyacinth have almost finished taking the decks out of her. Work will have to be carried ahead speedily, as there are but sixty days in which it may be done. The sum of \$35,000 was appropriated for the repairs of the vessel.

Mrs. Thomas Haughton, who was quite severely injured yesterday by being thrown from a buggy, was resting easily this morning, and it is now but a question of patiently waiting for the broken bones to knit. The many friends of the lady heard with regret of the accident.

At the request of the United States hydrographic office Second Officer Dobson, of the Northern Pacific steamship Victoria, on July 4, 1893, threw overboard a bottle containing an ocean current report. It was cast into the sea in latitude 49.32 north, longitude 125.42 west. The bottle drifted for nearly a year and was found on April 7 of this year by the sealer Favorite, Captain

bank Sound, where she was driven ashore.

Collector Mine spent nearly all yesterday afternoon aboard H. M. S. Royal Arthur in conference with Rear-Admiral Stephenson on sealing matters. It is even thought no decision was reached. Collector Mine said this morning that there was nothing to give out for publication at all, as the matter was still in abeyance. The sealers are anxiously waiting the decision of those in whose hands the matter rests. There is likely to be considerable cable and letter correspondence between here, Ottawa and London before an understanding is reached.

Mrs. Thomas Haughton met with a serious accident while driving this morning. As she was turning the corner of Pandora avenue and Fernwood road the horse shied and sprang forward. One of the wheels caught on a telegraph pole and the lady was violently thrown from the buggy. Fortunately another team was passing and Mrs. Haughton was quickly removed to her home. Dr. McKechnie was called in and an examination discovered that four ribs had been injured, and she was also slightly cut and bruised. The broken bones were reset and the patient made as comfortable as possible. The unfortunate lady suffered great pain, but this afternoon was reported resting well.

A. J. Langley, J. P., has one hobby that is riding a bicycle on the sidewalks, and Mr. Langley sometimes when on his way to his residence in the suburbs, avoids the bad places by traveling on the forbidden ground. This, of course, a J. P. has no more right to do than any other person, and in order that the majesty of the law shall prevail, the police were charged with the offence in the police court to-day. Mr. Langley is a very old man who rides for exercise, and while the press must respect the law and uphold the stern mandates of Magistrate Macrae and the minions of Chief Sheppard, it is nevertheless impelled to remark that nothing very serious would have happened to the good government of the city if Mr. Langley's offence had never been discovered by the police.

The Columbian says regarding the big fire at New Westminster last Saturday: During the height of the fire, when ten streams of water were being drawn from the city hydrants, the indicator in the Reggie street fire hall showed from 154 to 158 pounds pressure, which competent engineers say is double first-class pressure. The value of the water works to the city was never so fully appreciated as at the time of the leading industry of the city was threatened with total destruction, and the manner in which the water supply held out was a wonder to all.

Mr. Stott, water works superintendent, reports that between 5 o'clock and midnight 542,890 gallons of water were used, and between midnight and 7 o'clock this morning 560,180 gallons, a total during the eleven hours of 1,103,070 gallons. This drain reduced the water in the reservoirs to four feet eleven inches, and Mr. Stott says the supply, at the rate of withdrawal, would have held out for 24 hours.

From Wednesday's Daily.

Rev. Mr. Bryant will supply the James Bay Methodist church next Sunday.

A rather valuable horse was killed by the noon train at the Indian reserve yesterday.

Two admiral and officers of the royal navy have been invited to Vancouver on Dominion day.

In the police court two Indian drunks were each fined \$5. Percie Flynn and Pansie Vanharen, drunk, paid \$5 each.

A farewell reception was tendered Rev. George H. Morden by his congregation last night. Mr. Morden's new field of labor is at Nelson.

Attempts are being made to have the first floor of the new A. O. U. W. building ready for the reception of the supreme master workman on June 20.

The contract for Mr. Le Poer French's bungalow and farm buildings at North Saanich has been awarded to A. McLarty by the architect, J. Gerhard Tunks.

The all night service in the Adelphi restaurant commenced on Monday, and midnight snacks have been plentiful since. The restaurant is now open 24 hours every day.

Many bears are being killed on the island and mangled this season, and the coats are unusually fine. The price and the cost are unusually fine. The price for \$12 for sealings to \$25 and \$30 for full grown, perfect skins.

Russell & McDonald, of Douglas street, have a "tearing down and building up" ad in another column. Extension alterations to the building necessitate a big reduction of stock.

E. E. Blackwood, of the N. P., received a telegram from I. A. Nadeau, general agent of that road at Seattle, stating that the mainland is open to St. Paul, and that with the exception of a few hours there has been no interruption to traffic.

Twenty-five ship carpenters at work on H. M. S. Hyacinth have almost finished taking the decks out of her. Work will have to be carried ahead speedily, as there are but sixty days in which it may be done. The sum of \$35,000 was appropriated for the repairs of the vessel.

At the request of the United States hydrographic office Second Officer Dobson, of the Northern Pacific steamship Victoria, on July 4, 1893, threw overboard a bottle containing an ocean current report. It was cast into the sea in latitude 49.32 north, longitude 125.42 west. The bottle drifted for nearly a year and was found on April 7 of this year by the sealer Favorite, Captain

Langhin McLean. It was picked up by one of the schooner's boats in latitude 53.05 north longitude 141.90 west. It had drifted nearly 1400 miles in a northeasterly direction. The report is printed in seven different languages, so it is even thought no decision was reached. Collector Mine said this morning that there was nothing to give out for publication at all, as the matter was still in abeyance. The sealers are anxiously waiting the decision of those in whose hands the matter rests. There is likely to be considerable cable and letter correspondence between here, Ottawa and London before an understanding is reached.

AT LAST IN THE TOILS.

L. Mosher Alias M. Krall Arrested at Portland for Fraud.

Under the name of M. Krall, L. Mosher, who formerly lived here, has been doing a good deal of robbing and is under arrest there for obtaining money under false pretences, and on several counts for theft. Mosher went there from here and opened a little jewelry store. He worked himself into the confidence of the Catholic clergy and stole \$150 worth of altar furnishings from the German Catholic church. He also changed the works in a watch given him to repair by one of the fathers. He pretended to be in love with a poor hard-working girl and succeeded in getting hold of several hundred of her hard-earned dollars. He gave her a package of alleged diamonds as security, but they proved to be paste. The clergyman and the girl have sworn to the charges against him, and he is in jail in default of \$1000 bail.

Mosher left here about eight months or a year ago. He had been here for some time and managed to get the casual acquaintances of several hundred among the Catholics and Hebrews. He beat them right and left. A photograph of "Krall" received here last evening by one of his victims makes the identification complete.

THE REINDEER-HERLDERS.

The Laplanders Who Went to Alaska—A Curious People.

Fifteen Laplanders, who are under contract to spend three years in Alaska taking care of the reindeer imported from Siberia, went north on the City of Topeka. An agent, B. J. Kjellman, made his way to their home in Northern Europe, and everywhere he went he was received with open arms and bid feast on black bread and goose grease. They asked for specifications.

"One hundred kroner a month and expenses," said Mr. Kjellman. "One hundred kroner is \$27.50 in our money. The Laplanders opened their eyes and intimated that their guest was a millionaire, and owned herds of reindeer that covered the earth for the space of a province. They reckon wealth in Lapland by reindeer. From twenty to one hundred reindeer will buy a wife. Mr. Kjellman's host hoped that Mr. Kjellman probably possessed a large assortment of wives. After explaining that he possessed no reindeer, and wives were reckoned as personal property in America, and furthermore that it was the United States government that was paying the bills, the American gave a glowing description of the trip to this country.

"You will be in a boat bigger than a hundred houses," he said, "and come to a great city, with ten times more people than all Lapland. Then you will get into a huge carriage on a track, and go thousands of miles across the country at a good pace as fast as your swiftest reindeer, and then another boat will take you far north to another country, like your own."

The Lapps are a frank and outspoken people. They listened courteously to their guest, then they consulted among themselves, after which the oldest member addressed the guest. The decision of the Lapps was that while the foreigner was an honored guest and beautiful to look upon, yet undoubtedly he was a liar of remarkable attainments. They were Christians, they added, and took no stock in fairy tales. They guessed they would stay right there in Lapland. Whereby Mr. Kjellman perceived that his steaming and railroad prospects was a little too much for his guileless friends. After that in endeavoring to get immigrants, he suppressed details. After much trouble he got together sixteen Lapps and took them to Christiania, where they embarked for this country.

HOW TO BECOME BEAUTIFUL.

Complexion Hints Compiled from a Number of Papers.

A writer for the St. Louis Republic has gathered these complexion hints in thirty days from the columns of the American press.

"Nothing is so beneficial to the face as steaming. You can do it at home over a saucpan of boiling water; be sure to bind the eyes, as hot water is injurious to them."

"Use pure cold water to insure a fresh, rosy skin. Hot water is a sure producer of wrinkles, for example, look at a washerwoman's hand. Steaming is very injurious, as it makes the skin loose and flabby."

"Bathe the inflamed eyes with hot water."

"The simplest and most harmless preparation to smooth the skin is glycerine and rose water; two parts glycerine and one part rose water."

"Never use glycerine on the face. It draws powerfully and inflames the surface."

"Use cold cream or some soft cream of roses on the face before retiring. The skin must be fed."

"Avoid the use of cold cream and all unguents on the face. All grease, vaseline or glycerine has a tendency to fill up the pores and produce down on the face."

"Never squeeze out blackheads with the nails; it bruises the tender skin and enlarges the pores; rub them out with a coarse towel."

"Never rub the face with a coarse material; wipe gently on a soft linen towel."

"Soap is injurious to the complexion by reason of the alkali in it."

"Wash the face well in a lather of good pure soap and hot water; rinse with a dash of cold water."

"Employ the best massage you can find and let her rub the face for half an hour every day. The skin will not vigorously, and wrinkles will vanish like magic."

"Massage treatment is ruinous to the face, though beneficial to the body; it is a sure producer of wrinkles."

"When rubbing the face, always rub from the nose."

"Rub under the eyes toward the nose to drive away crow's feet."

"The face mask is the surest beautifier in the world. Send for one and become ten years younger."

"Face masks ruin the skin, making it leathery and yellow and producing a look of premature age."

"Lemon juice will remove tan and freckles."

"Never use an acid on the skin. A few drops of toilet ammonia in the bowl freshens, cleanses and purifies the skin."

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

ready for occupation by the beginning of the year. Mr. White will begin his canvass in Westminster, and continue it throughout the province, afterwards visiting the eastern provinces on the same mission.

ST. PETER'S GOSPEL.

Outline of the Greek Text Found in an Egyptian Cemetery.

There will soon be published a French translation of the Greek manuscript which is said to contain, among other interesting fragments, the end of the Gospel known by members of the early Christian churches as that of St. Peter. The document was found a few months since by M. Girault in the cemetery of Akhmin, in upper Egypt. It appears to date from the end of the first century, and contains four parts, which are not in accordance with the writings of the Evangelists. The first of these relates to the trial or arraignment of Jesus, who is led before Herod. Plate lists the side of that monarch, and washes his hands in the crime about to be committed, but neither Herod nor the judges follow his example.

Joseph of Arimathea, who is present, asks that the body of Christ shall be given to him after crucifixion. Plate, who is his friend, refers the matter to Herod, who says that there is no necessity for making the application, as the body will be buried by the Tribunal. Plate's role in the matter is therefore minimized.

The second part deals with the indignities suffered by Christ before being affixed to the cross. He is placed in the seat of the judges, covered with a purple garment, crowned with thorns, and is pricked, buffeted and spat upon amid ironical cries of, "Let us thus honor the Son of God!"

The third part deals with the crucifixion, and relates that at the moment of the Saviour's death all Judea was dark that people had to go about with torches.

The last words on the cross appear in the French translation as "Ma Puisseance! Ma Puisseance! Tu m'es abandonne!"

The fourth and final part refers to the resurrection. The soldiers guarding the tomb heard loud voices crying from heaven. Two men radiant with light approach the sepulchre; the stone rolls back, and the sentinels, full of fear, awake the centurion and those with him, and cry out towards the tomb and tomb hearers. The missing man, being third, who is taller than themselves, although like him, they seem to touch the skies. Behind the three is a cross. A voice from heaven cries, "Hast thou preached to thyself, who art sleeping, and an answer in the affirmative seems to come from the cross.—London Telegraph.

Political.

A political meeting was held in the Tinhead school, Delta, last Saturday. There was a good turnout of voters, but government and opposition being represented by Thomas Forster, opposing candidate, addressed the meeting at the close of the address, after a number of questions had been asked and answered, it was moved by Mr. Hembrong that the meeting be adjourned.

"That in the opinion of this meeting Mr. Thomas Forster is a fit and proper person to represent the Delta riding in the local legislature." The resolution was carried nearly unanimously, only two votes being given against it.

Twenty-three years ago Henry J. Bingham, a respectable young farmer living north of Wurtemberg, suddenly disappeared. His father, William Bingham, offered a reward of \$200 for information concerning his son's whereabouts, and for five years the missing man's family made diligent search for him, but to no purpose.

His wife, who had been married only ten months, became almost crazy with grief. She finally went to the home of her parents in East Palestine, Ohio. The parents of the missing man died within a year of each other, Bingham dying in the fall of 1878 and his wife in the spring of 1879.

Two daughters inherited their property, and married soon after. One went with her husband to Brookville, Jefferson county, and one to Girard, in Erie county.

On Monday last, says the Pittsburgh Dispatch, there arrived in Wurtemberg a stranger who claims to be Henry J. Bingham. There is little doubt as to his identity, as he has in his possession authentic mementoes belonging to his family. For fourteen years he has been engaged in stock raising in South America, where he made a great deal of money.

He returns now to find his sisters. Bingham claims to have written several letters home, but if he did they never reached their destination. He declines to give any reasons for leaving his home and parents, but says he has some questionable circumstances, but says he is anxious to make such amends as he may.

As soon as he can settle up some business affairs in New York he will return to South America, where he hopes to take his sister from Brookville, who is now a widow.

The wife Bingham deserted is dead, but her aged mother is still living in Dutchess county.

Japan has no fewer than 700 earthquake observing stations scattered over the empire, and the Tokio correspondent of the Times is of the opinion that they are all needed. He points out that not only are the Japanese shaken up by fifty 500 earthquakes every year—some of them more or less destructive—but intervals there comes a great earthquake amounting to the great earthquake of October 28, 1891, to a national calamity. Japanese annals record 29 such disasters during the last 1,200 years.

The Duke of Westminster is credited with possessing the finest carriage horses in the world. He recently paid 1,800 guineas for a pair.
