MEET DEATH ON WAY TO ST. STEPHEN

BOSTON, April 8.—Bishop Edward W. Osborne, of the Episcopal diocese of Springfield, formerly superior of the Cowley Fathers of this city, announces that Rev. Frederick E. J. Lloyd, D.D., formerly of Charlestown, P. E. I., who left the Episcopal Church two years ago and joined the Roman Catholic body, has returned to his former denomination.

Dr. Lloyd was elected Bishop Coadjutor of Oregon in 1906 but declined to accept the office because of objections made by certain members to advanced churchmanship.

He suffered from a nervous breakdown two months ago but has recovered.

The steamer Calvin Austin in tow of tug arrived at 1 p. m. The steamer was taken to East Boston for new sail.

The trip was uneventful.

An Eastport (Maine) dispatch says: Evidence of the drowning of William and Noel Nicholas, Passamaquoddy Indians of Pleasant Point, was found today when the canoe and their belongings were washed up on the northern end of Deer Island, N. B. No trace of the bodies was found. The Indians started from Pleasant Point Saturday for St. Stephen, a distance of four miles, to do some trading. It is supposed they were captured by a squall.

Every Woman

is interested in this new discovery. It is a powerful and effective remedy for all kinds of female ailments. It is a powerful and effective remedy for all kinds of female ailments. It is a powerful and effective remedy for all kinds of female ailments.

DR. SPANGLER ON THE WITNESS STAND

Tells of His Treatment of Mrs. McLaughlan's Case.

Defined Osteopathy—Did Not Treat for Rheumatism—Evidence All In.

The intense interest displayed at the early sessions of the inquest into the death of Mrs. Annie McLaughlan was by no means lacking at the police court last evening. The large room was packed to its utmost and every word of the proceedings was listened to with deep attention.

Dr. Spangler was on the stand for over an hour and a half and told of the nature of the deceased's ailment. He also defined to the coroner and jury the science of osteopathy and stated that he knew he could not be registered under the medical act of the province.

Referring to the McLaughlan case the doctor described in detail the history of the case. He declared he never treated the deceased for rheumatism and called in Dr. Emery to attest himself. After Dr. Emery was called in Dr. Spangler stated he did not treat the deceased lady, but left the case entirely in Dr. Emery's hands.

"Osteopathy believes that Nature's cure is superior to medicine," said Dr. Spangler.

Dr. Spangler gave his evidence in a straightforward manner, and though subject to a severe cross-examination covering his evidence, he was not in evidence. Such remarkable interest has not been shown in a case for a long time.

The other witnesses examined were Charles McDonald and Dr. Murray MacLaren, the president of the Medical Council. The evidence is about complete, but the case will be resumed at 8 o'clock this evening, when it is expected a verdict will be reached by the jury.

MISCHIEVOUS SPOOK DISTURBS HOUSEHOLD

Salamanca Spirit Who Throws Hot Coals and Smashes Windows and Crockery.

LONDON, April 12.—Extraordinary stories are told concerning mysterious and ghostly happenings at a house at Ecclestone, an Old World country town in Staffordshire.

For weeks past the occupants of the house have been amazed at inexplicable occurrences. The crockery and coal in the house seem to be bewitched. Coal placed in the fire grate persists in coming out in full view of residents and smashing windows at right angles to the fire. In less than a week after the weird visitation began every window downstairs was broken, and as fast as new windows were put in they were broken again.

The fire grate was taken out and the chimney swept, but to no purpose. The coal, however, burns excellently.

The extraordinary affair has created widespread astonishment.

A minister who visited the house was greatly startled at the antics of the coal, and took a hasty departure. Another skeptic visited the house, laughing at the whole affair. He went at once and stood with his back to the fire. Immediately a piece of coal leaped out and struck his hat.

The "spook" on one occasion played pranks with the crockery cupboard, smashing all the earthenware it contained, yet when the cupboard was opened no explanation whatever was forthcoming.

The extraordinary affair has created widespread astonishment.

SETTING IT RIGHT.

"In your paper this morning, sir, you called me a 'bum actor'! I want an explanation."

"I shall be happy to explain, young man." That word "actor" was inserted by the proofreader, who thought I had omitted it accidentally. I shall take care that it does not happen again.

"Don't Neglect a Cough or Cold."

It can have but one result. It leaves the throat or lungs, or both, affected.

Dr. Wood's Norway Pine Syrup is the medicine you need. It is without an equal as a remedy for Coughs, Colds, Bronchitis, Hoarse Throat, Pain in the Chest, Asthma, Whooping Cough, Quinsy and all affections of the Throat and Lungs.

A single dose of Dr. Wood's Norway Pine Syrup will stop a cough, soothe the throat, and if the cough or cold has become settled on the lungs, the healing properties of the Norway Pine Tree will proclaim its great virtue by promptly eradicating the bad effects, and a persistent use of the remedy cannot fail to bring about a complete cure.

Do not be humbugged into buying so-called Norway Pine Syrups, but be sure and insist on having Dr. Wood's. It is put up in a yellow wrapper, three glass bottles the trade mark, and price 25 cents.

Mrs. A. Ellis, Innisfail, Alta., writes: "Last spring I had a terrible cough. I tried doctor's medicine but got no relief until my husband got me a bottle of Dr. Wood's Norway Pine Syrup, and before I had finished it my cough was cured. My husband also uses it whenever he has a cough. I would not be without it."

IMPORTANT CORNISH DOCUMENT

One of the ancient documents at Devizes, instead of being a "charter," as was supposed, is, in reality, "letters patent" by James I. under the Great Seal (1609-10), granting charity lands to the mayor and burgesses of Devizes. The discovery may have important results.

"I'm in a scrape this time for sure," observed the vaccine germ, as the doctor scratched him into the patient's cuticle.

HORSE RACE PICTURE FLASHED BY WIRELESS

London Newspaper Prints the Actual Finish of Grand National Steeplechase

Striking Photograph Sent 'Hundreds of Miles in Precisely Six Minutes—A Remarkable Feat.

LONDON, April 12.—The Daily Mirror has accomplished a remarkable feat, printing in its pages a picture of the finish in the Grand National Steeplechase, run near Manchester the day before. The picture was sent by wireless telegraph to the Daily Mirror office in London, and was printed in the paper in precisely six minutes.

The photograph is an important and remarkable improvement on the other instrument which has been used in the Daily Mirror office for receiving photographs wired from Paris and Manchester, for whereas only portraits could be transmitted by means of the old instrument, pictures of a complicated detail in them—such as photographic groups or landscapes—can be faithfully and quickly transmitted by means of the telegraph.

The method of transmission is an old one. It was tried by several scientific men, but it remained for Professor Korn, of Munich, to make practical use of it, with the aid of a special form of receiving apparatus, which renders the instrument so extremely sensitive that it can be used over long distances, even up to 2,000 or 3,000 miles.

PICTURE COMPOSED OF GUM.

For the last two months experiments with the telegraph have been conducted in the Daily Mirror office, and the picture of the Grand National is the outcome of those experiments.

The telegraph can be used either with telephone or telegraph wires, and pictures can be transmitted and received in either direction simultaneously.

The photograph to be transmitted is printed on a thin metal sheet coated with gum rendered sensible to light, and afterward washed in cold water, when only a clearly defined picture remains on the metal. The picture itself is thus actually composed of gum which has the property of not allowing an electric current to pass through it.

Having been prepared in this manner, the picture is placed on a metal cylinder which revolves and travels in a groove cut in the metal. In its progress every part of the picture comes into contact with a metal beam of light.

As the cylinder revolves the electric current which is flowing through it is broken out and in, and the result is that the picture is transmitted in a series of dashes.

Thus, at the receiving station in the Daily Mirror office in London, an intermittent current is received by means of which, through the telegraph or telephone line, a faithful reproduction of the original picture is built up on an ordinary photographic film.

This film revolves with a spiral motion in a manner corresponding with the sending cylinder at the other end. The speed of the two cylinders being adjusted with extreme precision by means of delicate electrical apparatus.

In the receiving instrument a beam of light is concentrated into a tiny point of great brilliancy, and this light falls on the traveling film, and is intercepted in its passage by a small shutter attached to a fine silver thread. With each interruption of the current the shutter is displaced and so allows the beam of light to be intermittent also.

When the whole of the picture has been transmitted the receiving film is developed in the ordinary way, and the telegraph picture is then ready for the process of reproduction.

PICTURES BY WIRELESS.

It is only by means of the utmost precision that this marvellously ingenious instrument can be worked efficiently, as the current received is exceedingly feeble and allows no margin for the least error in adjustment.

The electrical power used by the machine has to be absolutely uniform, so that electrical accumulators are essential at both the receiving and sending stations.

Further scientific developments of an intensely interesting character are likely to be made in connection with the transmission of photographs by wire.

Professor Korn is actively engaged at the present moment in carrying out some new experiments between Berlin and Paris, while T. Thorne Baker, who has charge of "The Daily Mirror" photographic installation in London and Manchester, has also carried out many important experiments. He has even succeeded in transmitting simple telegraph pictures by wireless.

HE IS STILL A BACHELOR.

The Earl of Sandwich, before he entered the diplomatic service, was a Guardsman many years ago, and acted as military secretary at Gibraltar. He holds among other dignities that of Lord Lieutenant of Huntingdonshire, and thereby hangs a tale. He was entertaining a luncheon party at Hitchin, high-rookie, among them an American lady, who, anxious to gather information about English customs, said: "I suppose that as Lord Lieutenant you have the power of conferring titles?" Lord Sandwich replied: "Certainly—but only one, that of 'bachelor.' He is still a bachelor, however."

GREAT CLEARANCE SALE OF PIANOS AND ORGANS

The greatest bargain in high grade, new, and good used Pianos, piano players, and Organs ever offered in St. John. Don't fail to take advantage of this Clearance Sale. Owing to important changes that we expect to make in our business in about two weeks, a large amount of this stock must be cleared out at once.

Pianos, Organs, Talking Machines, Violins and All Kinds of Musical Instruments.

EASTER MEETINGS HELD EPISCOPAL CHURCHES

Financial Condition of Institutions in A Condition—Wardens and Vestrymen Elected for the Ensuing Year—Great Interest Displayed in Laymen's Missionary Movement

Following the usual custom the Anglican churches in the city and vicinity held their annual meetings last evening. In most instances there were large attendances and the usual routine business was transacted.

The numerous reports showed that the churches as a whole were in a flourishing condition. The year has been a good one and in many churches a balance on hand is reported, while in others there is little or no outstanding debt.

The chief features of the meetings were the splendid interest displayed in the laymen's missionary movement. In almost every church strong committees were appointed to further the work. The delegates to the synod were also chosen.

The result of the election in the chief churches was as follows:

STONE CHURCH.

The delegates were as follows: Delegates to synod—W. M. Jarvis and A. H. Hanington. Substitutes—R. B. Emerson and J. G. Armstrong.

Church wardens—William Downie and F. W. Daniel.

Vestrymen—Joseph Finley, Edward Bates, G. A. Kimball, W. M. Jarvis, A. T. Thorne, J. E. Secord, R. B. Emerson, Judge Armstrong, T. E. G. Armstrong, R. D. Peterson, Dr. H. C. Wetmore and C. M. Bostwick.

Laymen's Missionary Movement committee—W. D. Anderson, W. R. Myles, R. D. Peterson, A. T. Thorne, A. E. Prince, F. R. Fairweather, J. E. Secord, and S. D. Crawford.

There was a good attendance. The annual report showed that the receipts practically met the expenditures.

TRINITY CHURCH.

Lay delegates to the synod—M. G. Teal, J. M. Robinson, substitutes—W. S. Fisher, H. H. Pickett. Wardens—James McAvity, C. P. Clark.

Vestrymen—W. S. Fisher, J. G. Harrison, H. S. Gregory, H. R. Sturdee, J. Northrup, J. Seeds, T. Padlock, J. M. Robinson, C. E. L. Jarvis, S. Smith, C. E. Robertson, F. J. G. Knowlton.

The meeting was very well attended. The usual reports were presented and showed the finances to be in a good condition.

ST. GEORGE'S.

Church wardens—Martin Peterson and Harry Lord.

Vestrymen—H. H. McLeod, O. D. Trainor, T. H. Johnson, Frank Belyea, John Maxwell, Samuel M. Sewell, Robert Orr, Robert A. Smith, H. A. Craft, William Perkins, Fred Craft, William J. Smith.

Representatives to the synod—Harry Lord, William J. Cornfield; substitutes—Martin Peterson, T. H. Johnson.

Treasurer—H. A. Craft.

Vestry clerk—A. Rankine Knodel.

Auditors—H. A. Perry and William T. Sengon.

There was a splendid balance in the treasury to start the new year.

ST. MARY'S.

Synod representative—J. N. Rodgers and R. I. Carlous.

Substitutes—H. R. Coleman and E. V. Wetmore.

Church wardens—R. I. Carlous and Samuel Willis.

Vestrymen—H. R. Coleman, D. C. Fisher, E. Moore, C. Morrison, E. A. Lawrence, H. W. Barton, F. J. Wright, A. W. Chamberlain, D. A. Ramsey, R. Dose, J. O. McKelvey, W. J.

ST. JAMES' CHURCH.

The meeting was held in the school room at 8 o'clock. The officers elected were as follows: Wardens—Geo. Bridges and S. S. De Forest.

Vestrymen—John Holden, R. J. Dibble, John T. Keo, G. Herbert Green, W. E. Yroom, Chas. Marvin, William Clark, W. C. Allan, William Simpson, Alfred Carous, William Pearce, Sergeant George Baxter.

Vestry clerk—John T. Keo.

Laymen's missionary committee—R. J. Dibble, W. E. Yroom, Walter Lane, William Pearce and William Clark.

Delegates to synod—S. S. De Forest and William Pearce.

Substitutes—Walter Lane and William Clark.

The salary of the organist, Cuthbert Lee, was materially increased.

The total receipts showed one of the best years since the opening of the church. The amount was \$2,561.07 and the expenditures \$2,547.63, leaving a balance in the treasury of \$13.44. The affairs at the church in general are reported to be most satisfactory.

ST. JUDITH'S, WEST SIDE.

Rev. G. F. Scovill, rector.

Wardens—Charles Carter, W. O. Dunham.

Vestrymen—J. A. Coster, M. L. Harding, A. E. McGinley, Horace Tapley, S. M. Wetmore, Joseph F. Smith, F. W. DeVeber, E. R. W. Ingraham, L. G. Oliver, Chas. P. Tilton, Percy W. Wetmore and George Fowler.

Laymen's missionary committee—Stanley G. Oliver, E. McGinley, W. L. Harding, Fred W. DeVeber, Chas. Coster, F. W. Wetmore and E. R. W. Ingraham.

Delegates to synod—Charles Coster and E. R. W. Ingraham.

Substitutes—W. L. Harding and W. O. Dunham.

The finances were reported to be in a flourishing condition. There is no outstanding debt, while over \$300 has already been paid into the organ fund.

SAINT PAUL'S CHURCH.

Church wardens—John K. Schofield and Frank P. Starr.

Vestrymen—G. Sidney Smith, G. W. Kechem, W. H. Thorne, W. Z. Earle, T. B. Robinson, F. H. J. Ruel, Hon. Chief Justice Barker, J. B. Cudlip, Dr. T. Walker, C. H. Eason, F. B. Schofield, Robert Cassen.

Delegates to Synod—F. B. Robinson and G. Sidney Smith. Substitutes—J. Roy Campbell and W. Z. Earle.

At St. Luke's Church and the Church of the Good Shepherd, Fairville, interesting meetings were also held and the officers elected.

ROME, April 12.—Mount Etna is not in eruption, although reports to that effect have been current, and according to the latest advices received here also felt that another earthquake from Catania, there is no apprehension is imminent.

God made man, and then he made woman, least man should be too happy.
