

59. *Gutta Percha Cases*.—Very good.
60. *Duck for Tents*.—Very good.
61. *Duffle*.—Opinions vary. I think a lighter and closer material would answer better, and personally prefer box cloth. For sleeping-bags and coverlets the duffle answered well. Many of the ship's company liked the duffle trousers for travelling.
62. *Floorcloths*.—Crack, tear, and become useless; they are, nevertheless, indispensable to travelling parties during the summer. I would suggest, if possible, a more durable article and a lighter material being supplied in future.
63. *Gauze*.—Useless. Spectacles very much better.
64. *Housing Cloth*.—Very good. Places for trap hatches and stove pipes should be fixed on before leaving England. Should be spread and fitted before leaving England.
65. *Japanese Fishing Rods*.—Useless. Rocket staffs preferred.
66. *Knives, Butchers'*.—Good.
67. *Knives, Long-bladed for Natives*.—Good.
68. *Lining for Tents*.—Very good.
69. *Solar Lamps*.—Good, but rather wasteful, and might be much improved.
70. *Lamps, Moderator*.—Very good.
71. *Chimneys*.—Very good.
72. *Cottons*.—Very good.
73. *Other Lamp Gear*.—Very good.
74. *Matches, Wax*.—Very good. Required to be carried in small corked specimen-bottles on sledges, two dozen in a bottle.
75. *Matches, Patent Safety*. 76. *Striking Papers*.—Very good on board ship. No use for sledging; the striking papers get wet, rendering the matches useless.
77. *Pipes*.—Useless. I would recommend a good strong brier.
78. *Spirit, Methylated*.—Very good.
79. *Saws, Hand, for Natives*.—Very good.
80. *Shoemakers' Awls*.—Very good.
81. *Shoemakers' Bristles*.—Very good.
82. *Shoemakers' Twine*.—Very good.
83. *Cobblers' Wax*.—Very good.
84. *Soles, Spare, for Half-Boots*.—Very good.
85. *Spectacles*.—Very good, but rather too shallow, and the tin boxes were not good or strong enough.
86. *Spare Glasses*.—Very good.
87. *Elastic*.—Very good.
88. *Spoons, Horn*.—Answered their purpose, but I think a more suitable article might be used.
89. *Sperm Oil*.—Very good.
90. *Needles, Sewing*.—Very good.
91. *Needles, Large, for Natives*.—Very good.
92. *Thread*.—Very good.
93. *Thread, Coloured, for Natives*.—Very good.
94. *Thimbles*.—Very good.
95. *Tobacco, Cavendish*.—Navy leaf preferable.
96. *Tobacco, Virginia*.—Very good for sledging.
97. *China*.—Very good indeed.
98. *Earthenware*.—Very good indeed.
99. *Glass*.—Very good indeed.
100. *Fish-hooks*.—Very good.
101. *Boats*.—Very good in material and workmanship; strong and supple. The whalers are perhaps a little too crank. It is marvellous what they sometimes stood.
102. *Buoys, Life, Welch and Bourchier's*.—Very good if fitted in-board, clear of the gunwale, so as to be shot into the water instead of letting go. It is easily carried away when stowed out-board.
103. *Hair Felt*.—
104. *Harpoon Guns, 1½-in.*—Very good and suitable.
105. *Harpoons*.—Very good and suitable.
106. *Spare Shackles, with Nipples*.—Very good and suitable.
107. *Nipple Wrenches*.—Very good and suitable.
108. *Gun Wrench*.—Very good and suitable.
109. *Rammers*.—Very good and suitable.
110. *Powder Flasks*.—Very good and suitable.
