

1920. *Ulolonche orbiculata* Sm. Aweme, Man., May 3, 1910, one female, (Criddle). I believe this to be a small obscure form of this species, which seems rather common in Colorado and Utah, though it may prove distinct. I know of no previous record for Canada, (Dod).
2024. *Graphiphora furfurata* Grt. Trenton, Ont., July 6, (Evans).
- * *Stretchia algula* Sm. "Arrow Lake, Brit. Col." Jour. N.Y. Ent. Soc., Sept., 1911, p. 148.
- * *Fishia instruta* Sm. De Clair, Man., Sept. 3-15, Trans. Amer. Ent. Soc., xxxvi., 264. Regarding this species Mr. Dod writes: "I have not identified it with certainty, but it appears to be very like the species wrongly listed as *yosemitæ* in the Alberta list."
2083. *Xylinia longior* Sm. Cartwright, Man., Oct. 12, one specimen, first taken here, (Heath).
2123. *Cucullia montana* Grt. Aweme, Man., July 20, (Criddle); Regina, Sask., July 3, 1910, (Willing).
- * *Papaipema moeseri* Bird. Montreal, Que., Can. Ent., Feb'y, 1911, p. 42.
2200. *Xanthia pulchella* Sm. Duncans, B.C., not uncommon in Sept. and Oct., (Hanham).
2205. *Conservula anodonta* Gn. Trenton, Ont., July 12, not taken here previously, (Evans).
2231. *Orthosia lutosa* Andrews. Aweme, Man., June 24, (Criddle).
- Agroperina lineosa* Sm. Described from thirty specimens from Calgary, Alta., and several localities in Manitoba. It is the "*Orthosia conradi*" of my Alberta list, and may really be a race of that species. It has often been, quite erroneously, confused with *Hadena morna* Strk., (Dod).
- Agroperina pendina* Smith. Has the same range as *lineosa* and has already been looked upon by me as a red variety of it, to which opinion I shall adhere, though slight genitalia differences are claimed, (Dod).
2280. *Pippona bimatrix* Harvey. Aweme, Man., July 20, 1910, (Criddle). Previously taken by the late Dr. Fletcher at Aweme.
2289. *Copablepharon grandis* Streck. Aweme, Man., July 4-14, (Criddle). Previously recorded as *absidum*. This latter has not been taken here, according to Dod.
2290. *Copablepharon longipenne* Grt. Aweme, Man., Aug. 19, 1910, one female, (Criddle). This specimen now in my collection agrees with Hampson's figure and my notes on the type. New record for Canada, (Dod).
2492. *Autographa californica* Speyer. Cartwright, Man., May 23, for the first time, at currant bloom; was previously recorded from Winnipeg by Hanham, (Heath).
2493. *Autographa ou* Gn. Aweme, Man., Sept. 27, 1909, one female, (Criddle). I believe this to be the first record for Canada. The species closely resembles *californica* but is darker and less brightly marked. There are slight, though constant, differences in markings. Structurally *ou* has hind tibiae strongly spined, whilst *californica* has not, (Dod).
2494. *Autographa rubidus* Ottol. Aweme, Man., June 15, 1910, (Criddle).
2555. *Alabama argillacea* Hbn. Conspicuous flights of this southern Cotton Moth occurred in Western Ontario in Sept., 1911. At Sarnia and St. Thomas they were extremely abundant. (See Ottawa Naturalist xxv., Dec., 1911, p. 129). Mr. Winn has also reported that the moths were abundant "at light" in Montreal, in the middle of September, (A. G.).
2730. *Melanomma auricinctaria* Grt. Montreal, June, (Chagnon).
