

Made by the Man Who Invented the Phonograph

The New Diamond Amberola is made under the personal supervision of Mr. Thomas A. Edison, the man who invented the phonograph. Its music, quality, and all-around perfection are what you would expect to find in an instrument bearing the signature of this great inventive genius.

Before deciding on your phonograph—come in and hear Mr. Edison's Amberola. Compare it by actual test with any of the so-called "talking machines," and with ordinary phonographs selling at much higher prices. Ask about our offer—*Three Days of Good Music Free!*—Make us prove to you that the Amberola, made by the man who invented the phonograph, is the world's greatest phonograph value.—*Come in today—write or phone if more convenient.*

Forest Fires Kill Jobs

HERE are instances of carelessness such as the Fire Rangers of Ontario are meeting all the time. Each is an actual case, as officially reported in detail to the Forestry Branch. Until each individual realizes personal responsibility and co-operates to prevent forest fires, Government Fire Rangers can hope merely to lessen the tragic consequences of such human carelessness and bad judgment.

Save Ontario's Forests They're Yours

Lumbermen's Fires

May 25th, 1920—A careless river driver, by leaving his smudge fire or throwing a cigarette into slash, burned over two townships, including 7,000,000 feet of pine, a \$5,000 mill, camp buildings and equipment worth \$7,000, sawn lumber worth \$7,500, and killed several million young spruce and jack pine trees.

May 25, 1920—Fire in a rubbish heap behind a lumber company's boarding house got away and, despite prompt action, burned over 1,600 acres, including 2,000,000 feet of white pine, and a set of new camps worth \$1,000.

June 1, 1920—Two old men left to attend to the stop logs in a dam, let fire get away from either their smudge or camp fire, and burned over 9,000 acres, including 6,000,000 feet of pine, one mill, four camps, large quantities of supplies, and equipment to a total value of \$40,000.

May 4th, 1921—Lumbermen burning slash around their camps, lost control of their fire and 15,000 acres were burned before they regained it.

Railway Fires

June 5th, 1920—Engine No. 1368 started a forest fire which ran over 15,000 acres, burning one saw mill, three sets of lumber camps, stables, houses, and outlots. 5,000 cut logs and 1,400 piles, besides standing timber.

May 25th, 1920—Engine No. 2509 set a

fire which burned over 12,000 acres of timber worth \$20,000 on the stump, camps and logs worth \$5,750, and cost \$1,000 to fight!

June 2, 1920—A section crew left a pile of burning ties to go away to their regular work. The fire spread over 1,200 acres.

Fires Set Out Under Permit

June 10th, 1921—Parties burning slash under permit, lost control through bad judgment, and 1,000 acres were burned and forty buildings, including saw mill, were wiped out.

May 27th, 1920—A squatter, burning debris near his shack, fired 7,000 acres, 1,000 of which were virgin timber, and wiped out four sets of logging camps.

Neglected Camp Fires

July 4th, 1920—Tourists left camp fire on shore of Deer Lake. After six days' fight, rangers put fire out, but 550 acres of young pine were dead.

May 31st, 1920—A neglected camp fire, despite efforts of Chief Fire Ranger and 42 men, burned 1,200 acres of young pine.

May 7th, 1921—Indians left camp fire, which burned over 7,000 acres and took one week of fighting to control.

Be careful of fire in the forests. Be careful to put your camp fire out—lead out. Don't throw away lighted matches, cigarettes or cigar ends. Watch out, lest your fire gets away from you.

Yank Out the Stumps

(National Crop Improvement Service.)

"Our tillable lands have gone and with a further growth and development of the world, we must utilize every wast acre. Stump pulling is a vital problem to the man who is farming a cut-over country, to the man who is paying taxes on idle stump land and to the man who is seeking a rich farm at a comparatively low price.

The easiest, quickest and most economical way of clearing out stumps and roots, is with a stump-puller and wire rope," says Mr. R. S. Ridd, president, Canadian Steel & Wire Co.

The use of a pulley block so designed that any number of them can be used in double, triple, or quadruple the power of the machine, will conquer the most stubborn stumps without fail.

"When dynamite is used, the roots are left to be grubbed out or pulled out by hand, all of which is slow, hard work. With the stump-puller and wire rope, the job is clean and complete.

"A good stump-puller will pay for itself in the first of many uses on a few acres of ground, to say nothing of the value of crop values. You can use it in the wet season when you can't work at anything else. In fact, the machine works easier when the ground is wet than when it is dry."

Twenty Dollars a Day in Alaska. Miners employ it in the Alaskan mines receive twenty dollars per day the year round.

To the Farmer:

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without your feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

Yours truly,

F. WATERS
