Political Philosophy. "It's all right," said the man from Kentucky, as he heaved a sigh of re-"I was a little worried at first, but it's all right."

"I see that the shooting has quieted down considerably.

"The shooting? Oh, yes. There's bound to be a little of that."

"It wasn't the shooting that causing you uneasiness?'
"No. That's merely a personal matter between gentlemen. You can't figure on it as having much effect, if any, on an election But I was sorry to hear all this talk about inharmoniousness among the Democrats. It does seem like they're splitting up a great deal. But I'm reconcided. Let

'em hoist their banners and bring on their candidates. If one man ain't satisfactory to all of 'em let the kickers get another. The more the merrier." "I don't quite understand your phil-

osophy. "There can't be too much of a good thing."

"Perhaps not." "Well, young man, there ain't anything better than a Democratic ticket, so let's go ahead and have as many of 'em as we can get."

"But when it comes to voting?" "I'm a fair-minded man, and I've got as good a hoss as Kentucky ever raised. It may take some time getting from place to place, but I'm going to do my level best not to show any

The acme of politeness was reached by a mining superintendent, who post-ed a placard, reading: "Please do not tumble down the shaft."

Somebody who is indignant that the name of the goose should be a syno-nym for folly, has collected stories from all quarters to illustrate the true wisdom and dignity of geese. There are many varieties of wild geese, and whether they are all equally nice and dignified the book does not say. Still it is true that the bird is not a coward and does not hesitate to attack birds much bigger than himself. The do-mestic goose is too well known to need a description of his person or habits and most of the stories of this historian of geese are so old that you would hardly care to recall them here.

One or two stories seem somewhat newer. In Richmond Park, in England where many geese are kept, the nests of the setting geese were often destroyed by water rats. After consideration of the matter, the geese began to build nests up in the trees instead of upon the ground. There they hatched out their families and brought their children-not up, but down carefully to the ground, one by one-ur ler their wings.

The goose is certainly a dignified bird in appearance. Whatever the haste of his gait, even when driven along, he never loses his expression of grandeur and importance. It would not have been a goose who suggested that he was silly. If you ever looked a goose firmly in the eye, you would know that he was much too proud to imagine such a thing.

A Boy Writes About the Hornet.

A hornet is the smartest bug that flies anywhere. He comes when he pleases, and goes when he gets ready. One way a hornet shows his smartness is by attending to his own business. and making everybody who interferes with him wish they had done the same

Martha was misbehaving at the table, and her mothe", not wishing to scold, counseled her to "be sweet:" this mild reproof proved of little avail for Martha persisted until she upset a glass of water, then seeing fire in her mother's eye, she quickly retorted, "O whatever you do. mamma, sweet!"

RULERS OF THE WORLD.

Meat Eating Nations are the Leaders in Every Branch of Human

vegetariane and rood cranks may explain this in any way they choose, but messenger afterwards taking the pack the facts remain that the Americans, age to the clearing house, where the English, French, Russians and Ger notes were handed over to the Standare are meat eating nations, and they

non-progressive, superstitious and in- sceept the halance as shown by the ferior physically and mentally to the meat eating nations who dominate The structure of the teeth plainly

indicates that human beings should

perly digest meat, eggs, and similar nutritious and wholesome food, but it is not because such food is unwholesome, but the real reason is that the stomacn lacks, from disease or weak-ness, some necessary digestive element; hence arising indigestion and later on,

people have to do so and brain workers and office men should eat, not so much meat but at least once a day and to insure its perfect diges a day and to insure its perfect diges tion one or two of Stuart's Dyspepsia Tablets ishould be taken after each meal, because they supply the peptones, diastase and fruit acids, lacking in

every case of stomach trouble. Nervous dyspepsia, catarrh of stomach, gastritis, sour stomach, gas and acidity are only different names for indigestics, the failure to digest wholesome food, and the use of Stuart's Tablete county the state of t lets cures them all because by affording perfect digestion the .stomach has a chance to rest and recoversite natural

tone and vigor.

Stuart's Dyspepsia Tablets is the real household medicine; "it is as safe and pleasant for the stomach of the baby as it is for the imperfect digestion

of its grand sire.

They are not a cathartic, but a digestive and no pill habit can ever follow their use; the only habit Stuart's Tablets induce is the habit of good distribution and consequently good health. Tablets induce is the habit of good di-gestion and consequently good health. A little book on stomach diseases mailed free by addressing F. A. Stuart Co., Marshall, Mich. All drug stores sell the tablets at 50 cts. for complete treatment.

If a man be endued with a generous mind, this is the best kind of nobil-
