

DYSPEPSIA MADE HIM MISERABLE

Suffered Agony Until "Fruit-a-Lives" Cured Him

Hundreds of people gladly testify to the wonderful curative powers of the famous fruit medicine, "Fruit-a-Lives". To those who suffer with indigestion, dyspepsia or other Stomach Troubles, this letter of Mr. Stirling, the well known real estate operator of Western Ontario, shows the way to a speedy and certain cure.

GLENORA, Ont., Aug. 15th, 1911
"Fruit-a-Lives" were so beneficial to me when I suffered with distressing dyspepsia that I wish to inform you of their satisfactory results.

Although I have, in past, suffered with dyspepsia, I am now in perfect health. "Fruit-a-Lives" accomplished the desired result!"

N. C. STIRLING,
"Fruit-a-Lives" will cure every trace of Indigestion, Dyspepsia, Sour Stomach, Bloating, Pain After Eating, Bileousness and Constipation.

"Fruit-a-Lives" is the only remedy in the world made of fruit juices and valuable tonics.

See a box, 6 for \$2.50, trial size, 25c. At all dealers or send on receipt of price by Fruit-a-Lives Limited, Ottawa.

White Ribbon News.

Woman's Christian Temperance Union first organized in 1874.

Aim—The protection of the home, the abolition of the liquor traffic and the triumph of Christ's Golden Rule in custom and in law.

Motto—For God and Home and Native Land.

Badge—A knot of White Ribbon.

Waterworks—Agitate, educate, or organize.

OFFICERS OF WOLLEVILLE UNION.

President—Mrs. L. W. Sleep.
1st Vice President—Mrs. J. Kaye.
2nd Vice President—Mrs. F. Woodworth.

Recording Secy.—Mrs. W. Mitchell.

If We Only Understood.

If we knew the cares and trials, Knew the efforts all in vain, And the bitter disappointment, Understood the loss and gain— Would the grim external roughness Seem—I wonder—just the same? Should we help where now we hinder? Should we pity where we blame?

Ah! we judge each other harshly, Knowing not life's hidden force— Knowing not the fount of action— Is less turbid at its source; Seeing not amid the evil, All the golden grains of good; And we'd love each other better If we only understood.

Could we judge all deeds by motives That surround each other's lives, See the naked heart and spirit, Know what spur the action gives, Often we should find it better, Purer than we judge we should, We should love each other better, If we only understood.

Could we judge all deeds by motives, See the good and bad within, Often we should love the sinner, All the while we loathe the sin; Could we know the powers working To o'erthrow integrity, We should judge each other's errors With more patient charity.

—Rudyard Kipling.

Application to Temperance.

Every intemperate person, every oppressor of the poor, every one who gains wealth or office by bribery or wrong doing, every neglecter of religion, every profligate of vice—is an aristocrat and despotic to his country.

The Foundation Principle. It is the duty and privilege of every citizen to be a patriot—not only to die for his country, but to live for it. That is the widest sphere of patriotism, to live for our country, as the widest sphere of religion is to live for the kingdom of heaven.

Every young person has great opportunities before him. He is training for his life work and his usefulness. If he is wise he will do nothing which will hinder his career, and especially his service of God.

The athlete to be successful must act according to Paul's rule: "Every man that striveth for the mastery is temperate in all things." Not only during the contest, but during the long preparation for it. The one training with no touch cigarettes or liquor. If it is worth while to go into training, it is worth while to abstain from all that would hinder the training, or to do it in such a way as to do no harm.

A Drunkard's Brain.

The Terrible Result of an Appetite for Alcohol.

I was present at the autopsy of a noted oil-rigger of my own town a few weeks ago, and a resident of this town. He was a man of great strength and ability, and I was struck and amazed at what I saw. The dead man was about sixty years

Keep Window Plants From Frost.

With window and indoor plants, always make a practice, in cold weather, of removing the plants from near the window to the centre of the room the last thing each evening. There will be no risk of frost penetrating the glass, and reaching the plants. If this precaution is considered to involve too much trouble, then adopt the simplest expedient of placing several sheets of paper between the plants and the glass. Paper is a first-rate non-conductor of heat or cold, and consequently the plants will escape injury by the severest frost.

Mrs. A. R. Taylor, of Oriler, Mo., had been troubled with sick headache for about five years, when she began taking Chamberlain's Tablets. She has taken two bottles of them and they have cured her. Sick headache is caused by a disordered stomach for which these tablets are especially intended. Try them, get well and stay well. Sold by all dealers.

A clerk was sent to call on Mr. C., the nearest fireman in the town, to purchase a burial plot in the new cemetery. In half an hour he was back again.

"Could I get him?" asked the manager.

"No," said the clerk. He admitted that the plot was fine one, but he said that if he brought one he might not get the value of his money in the end.

"Why," said the manager, "there's no fear of that; the man will die some day, won't he?"

"Yes," said the clerk, "but he pays he might be lost at sea."

PILES

Do not suffer from this distressing ailment. Chamberlain's Ointment will relieve you in a few minutes. It is the only reliable remedy for Piles, Hemorrhoids, or Itching. Itching, Swelling, or Discharge from the Rectum. Apply this Ointment to the affected part and ease to you.

The Voice of Science.

ALCOHOL AND TUBERCULOSIS.

We can only mention the vast importance which alcohol plays as a factor in producing tuberculosis. Alcohol is a stimulant, and its immediate effect upon the body is to lessen its natural resistive power, and to reduce vitality. Thus alcoholism favors the invasion of infectious disorders generally, and none more than tuberculosis.

Not infrequently the use of alcoholic beverages is associated with insufficient food; the money which should be spent in the provision of nourishing food is wasted on drink, and the poor victim suffers a double affliction. His body is poisoned by the alcohol, and the natural sense of hunger which he ought to possess is deadened, and he is in a state of semi-starvation, which renders him readily susceptible to the germs of consumption. Insufficient feeding must be regarded as an important predisposing cause, and the same is largely true of insufficient clothing.

A. B. Olsen, M. D., D. P. H., in "Life and Health."

Children Cry FOR FLETCHER'S CASTORIA

Fire Prevention.

A fire loss of \$25,000,000 a year in a count of eight millions of people is a waste that can be and should be checked. This is the message brought to Toronto by Mr. F. H. Wentworth, Secretary of the National Fire Protection Association of the United States. His address, delivered before representatives of all the important public bodies of business men in Toronto, was a review of certain statistical information, which goes to show that the American is a careless individual, and the Canadian is like unto him. He is careless in building. He uses wooden window frames and pine shingles. He throws burning matches into corners. He drops lighted cigars. It makes one furious to think what the fire losses of Berlin and Chicago are compared to those in 1911 in the German city, property worth \$175,000 was destroyed. In Chicago \$5,000,000 was the bill. It is plain that much of the loss in the American city should have been prevented. And in Canada a campaign of prevention is about due.

Dolly—The wretch! And so he has been punished to both of us?
Polly—Yes, he has.
Dolly—I wish we could think of some fearful way to punish him.
Polly—I have an idea.
Dolly—What is it?
Polly—You marry him, love.

MOTHERHOOD SUGGESTIONS

Advice to Expectant Mothers

The experience of Motherhood is a trying one to most women and marks distinct epochs in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism untried for the trial of strength, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother's routine.

There is nothing more charming than a happy and healthy mother of children, and indeed child-hood under the right conditions need be no burden to health or beauty. The unexplainable thing that is with all the evidences of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women will persist in going blindly to the trial.

Every woman at this time should rely upon Lydia E. Pinkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.

In many homes once children there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women healthy and strong.

It is not until you read this book that you realize how important it is to have a strong and healthy body. It is not until you read this book that you realize how important it is to have a strong and healthy body.

How to Prevent Bilious Attacks.

One who is subject to bilious attacks will notice that for a few days or more before the attack he is not hungry at meal time and feels dull after eating. A dose of Chamberlain's Stomach and Liver Tablets when these first symptoms appear will ward off the attack. They are for sale by all dealers.

Do you think only of me? murmured the bride. Tell me that you think only of me!

It's this way, explained the groom, gaily. Now and then I have to think of the furnace, my dear.

If your children are subject to attacks of cough, such as the first symptoms, Chamberlain's Cough Remedy is as good as a cure. It is as good as a cure. It is as good as a cure. It is as good as a cure.

Children Cry FOR FLETCHER'S CASTORIA

Children Cry FOR FLETCHER'S CASTORIA

"Mummy won't do anything, what can I do for instance?"
"I won't keep a cough who has made up her mind to quit."

Johnny asked a serious neighbor, "What makes the baby at your house cry so much?"
"It doesn't cry so very much," was the big brother's indignant answer, "and neither if you, look you all out, and your baby was all right, and your legs was so weak that you couldn't stand on them, you'd be like crying yourself."

YOU CAN MAKE MONEY IN Carmangay

PAST The splendidly strategic site of Carmangay was discovered by a far-seeing, sharp-sighted surveyor attracted to the district by the lure of the finest wheat in the Canadian West. He snapped up lands where the wide canyons of the Little Bow river narrows to a point. Here must all railways cross. The C. P. R. came and the shipping center created went ahead by leaps and bounds.

PRESENT Carmangay to-day is a thriving incorporated town, with not less than 63 business places. Her up-to-date electric and natural water supply systems are owned and operated by the people. Carmangay boasts an eight-roomed schoolhouse, two banks and four big elevators, shipping over a million bushels in 1911 and 1 1/2 millions in 1912. Carmangay has coal mines operating, and the entire district is underlain with coal of finest Galt quality.

FUTURE Carmangay grows as Alberta grows. That means a wonderful future. Four new railroads are heading for Carmangay. Four new elevators are trying to cope with the tremendous wheat yields of the district. The mines are opening up splendid prospects. Carmangay is being rapidly developed into one of the greatest towns in the Canadian West. YOU can just as confidently invest in Carmangay as her own people do, who are building in brick and stone for a tremendous future. Carmangay has her own supply of finest brick clay and stone right at her doors, and will soon supply her sister cities in Alberta.

We Are Now Meeting the Demand For Choice Lots In Alta Vista

The High Class Residential Section of Carmangay

Already Alta Vista has beautiful homes costing as high as \$4,000. Every lot is guaranteed high, dry and level. Alta Vista is only a block from the Post Office and City Hall.

ON THE FIRST OF THE MONTH PRICES IN ALTA VISTA WILL INCREASE \$25 A LOT

To Keep Cut Flowers.

It is a good plan when getting flowers for table and other decorations at this time of year, to put them in lukewarm water, add a pinch of common salt. This preserves and keeps them fresh much longer.

For any disease of the skin there is nothing better than Chamberlain's Salve. It relieves the itching and burning sensation instantly and soon effects a cure. Sold by all dealers.

The long expected resignation of Bruce Ismay from his position as chairman and managing director of the White Star Line has been announced. It will take effect June 30. Harold A. Saunders, first vice president of the International Mercantile Marine Company, and a director of the White Star Line, will succeed Mr. Ismay.

When you want a reliable medicine for a cough or cold take Chamberlain's Cough Remedy. It can always be depended upon and is pleasant and safe to take. For sale by all dealers.

"What are you crying for?"
"The teacher ticked me for something I didn't do!"
"Remembering you didn't do it? What was it?"
"In my lessons!"

"It doesn't cry so very much," was the big brother's indignant answer, "and neither if you, look you all out, and your baby was all right, and your legs was so weak that you couldn't stand on them, you'd be like crying yourself."

WHERE FARMING IS PAYING WELL

Production in the New Glasgow Industrial District Cannot Keep Pace With the Demand

The town of New Glasgow, Nova Scotia, is selected by Mr. W. A. Craik in "The Canadian Countryman" as typical of many towns and cities in the Maritime Provinces where industries are bringing business and prosperity to both farmer and citizen. He points out that the revival of progress in the provinces by the sea-shores there was stagnant for thirty years or more, is directly attributable to a single cause, namely, the development of industry. "Sydney, New Glasgow, Truro, Amherst, St. John, Halifax, Moncton and Backville," says Mr. Craik, "to name a few leading examples, are all on the up grade because of what their industries are accomplishing, and as the industrial towns advance, the whole country will respond to the call. It was the building of ships that was the basis of the former development of the Maritime Provinces. It will be the manufacture of many other commodities that will bring back those days of prosperity."

Industries and Prosperity.

The writer then refers to New Glasgow in particular, tracing its development from the days when it rode along the waves of prosperity as a shipbuilding centre, dropping into depression as the wooden ship was displaced by the steel vessel, built elsewhere. Sailors and their families moved away and the agricultural classes suffered accordingly. Associated with the building of wooden boats, however, were some infant industries, one of which had to do with the manufacture of iron kess used to fasten the frames to the deck stringers on the wooden ships. These industries pluckily turned their attention to other lines, and ultimately came to their own through big industrial undertakings. The steel and iron industry has been the great factor in New Glasgow's history and the extensive works of the Nova Scotia Steel and Coal Company have been the determining element in much of its growth. "As auxiliaries and offshoots of this basic industry, most of the other local enterprises have been called into being. Many of them have now passed the stage of dependency and have become of prime importance in themselves, while from year to year new developments are to be noted, swelling the population of the town and bringing more cash to the coffers of the merchants and the pockets of the farmers. Mr. Craik adds: "Looking down on the valley of the East river from the hill above the town, one sees a panorama of exceptional attractiveness. Away in the distance lies Pictou and the open water. Then comes the river, which is now being dredged out so that ocean-going vessels can come right up to New Glasgow and load or discharge cargoes at its docks. To the right of the town is the village of Trenton, where all the larger industries are located. Then New Glasgow itself, stretched out over a considerable length, and linked up to the left with Stellarton, divisional point of the Intercolonial and headquarters of the Acadia Coal Company. Away beyond rises smoke from the collieries of Westville. All these towns and villages are threaded together by the Intercolonial and a local electric train line. The picture represents one, not only with the progress that has been made, but with the possibilities of the future. The day is dawning that will see a vast field of industry in this beautiful valley."

A Benefit to All

And now to answer the question: What benefit does the community derive from this industrial development? New Glasgow is far enough away from other towns to be self-contained. Therefore, its working classes spend their money of home wages are undoubtedly good as compared with the cost of living. The average pay of machinists ranges from \$2.50 to \$2.75 per day, while in the structural shops workers earn from \$2 to \$2.50 per day, the latter price being paid for good, all-round men and riveters. Men who are capable of handling blue prints and acting as squad bosses in the structural shops get from \$3.50 to \$4 per day. In the N. S. Steel and Coal Co. all the men employed in the mills are paid by the tonnage, helpers earn from \$2.50 to \$3 per day and rollers from \$3 to \$4 per day. "Wages of industrial laborers in New Glasgow average 37 1/2 cents per hour. Assuming every thing up, it is estimated that between \$75,000 and \$100,000 each is put into circulation every fortnight in New Glasgow, Stellarton and Westville, which is large percentage is spent in New Glasgow itself."

The effect of the increasing industrial population on the agricultural situation is highly important. In Pictou it is estimated that the population has increased from 175,000 in 1909 to 217,000 in 1912. Notable increases occurred in Stellarton, which advanced from 275,000 to 312,500; structural iron and steel from \$1,835,127 to \$2,150,252; agricultural implements from \$2,215 to \$2,247,085; the chief growth under this head occurring in exports of plows, which increased from \$79,829 in 1909 to \$1,760,046 in 1912. Of automobiles the growth in exports to Canada has been especially marked, \$1,953,247, against \$1,877,223.

It is just a question whether a young country like Canada can become a highly developed nation if it allows an aggressive trade competitor like the United States to exploit its home market in lines which can advantageously be made in Canada. That policy is the right one which would cause this million dollars a day to be spent in Canada among Canadian workmen.

The Trade returns of Canada up to 1911 show that Canada imported in textile goods 66 per cent of its total consumption. This means that the textile factories of Canada are making only enough goods to supply the market for the year—no surplus goods are imported 75 per cent of our total consumption while above that the woolen factories of our own land made just enough goods to supply our own needs. This means that the great condition of the textile industry is a surplus of goods. This surplus is a surplus of goods. This surplus is a surplus of goods.

A DRUGGIST IN WINNIPEG

Cured Himself With OIN PILLS

No greater complaint could be paid OIN PILLS than to have a druggist use them. Mr. Rogers being in the business tried all the ordinary remedies, but it was not until he used OIN PILLS that he was cured of a severe pain in the back.

Winnipeg, May 16th, 1912.

"In the autumn of 1911, I suffered with a continual pain in the back. As a druggist, I tried various remedies without any apparent result. Having sold OIN PILLS for a number of years, I thought there must be good in them otherwise the sales would not increase so fast. I gave them a fair trial and the result I found to be good!"

GEO. E. ROGERS.

OIN PILLS must cure you or your money will be refunded. See a box, 6 for \$2.50. Sample free if you write National Drug and Chemical Co., 32 Canada, Limited, Toronto.

AN ANECDOTE ON THE COST OF LIVING

The high prices secured by the farmer at present for his produce are brought prominently to the front by the following anecdote from an American exchange:

"A Kansas farmer, so the story goes, came into town to buy a new wagon. The dealer made a price of \$70, to which the farmer objected, saying that he had purchased the same style and make of wagon many years before for \$60. The dealer explained that the advance in the price was due to higher cost of materials, etc., but the farmer was not convinced. After a lengthy argument it developed that the farmer ten years before had paid for the \$60 wagon with 600 bushels of corn; corn at the time bringing ten cents per bushel. "I will tell you what I will do," said the dealer, "you give me 600 bushels of corn for this \$70 wagon and I will make you a present of the best reaper in my stock; your choice of surreys, and you can bring your wife down and I will make her a present of the best kitchen range I have in the place, and will fit her kitchen up complete with new stoves and cooking utensils. Is it a bargain?"

"It was!"

ROOM FOR EXPANSION

Home Industry Suffers to Extend of Over a Million Dollars a Day

"That the Canadian manufacturer has still a long way to go before he will be in a position to secure the benefit of the trade of the home market against his aggressive American competitor is apparent from figures recently issued at Washington. The value of merchandise exported to Canada from the United States during the 244 days from January 1 to August 31, 1912, is practically \$344,000,000, or to be more exact, \$344,731,771, or approximately \$1,600,000 a day. In the corresponding eight months of 1909 the value of merchandise exported to Canada was \$199,458,588, or an average of a half-million dollars a day, the total value of exports to Canada having thus doubled in the three years in question.

Concerning the exports in the fiscal year 1912 with those of 1909, bituminous coal shows a growth of over \$17,000,000 from \$15,235,019 in 1909 to \$32,235,019 in 1912. Notable increases occurred in structural iron and steel from \$1,835,127 to \$2,150,252; agricultural implements from \$2,215 to \$2,247,085; the chief growth under this head occurring in exports of plows, which increased from \$79,829 in 1909 to \$1,760,046 in 1912. Of automobiles the growth in exports to Canada has been especially marked, \$1,953,247, against \$1,877,223.

COAL - BRIQUETTES.
