BRITISH PRESS ON THE BUDGET

Continued Prosperity as Mirrored in Mr. Fielding's Speech Pleases London.

London, June 9.-The Chronicle says ence about the colonies being quite able to look after themselves. Canada is determined to fight Germany on its own account. The duty increase on woolens shows how small is the real benefit Britain could hope to obtain in return for a policy of preference.

The Financial Times says Mr. Fielding had a very pleasant task to relate—a story of continued prosperity. The reduction for the second year in succession of the public debt is unprecedented in the Dominion, Tariff reformers will watch with keen interest the fight against the "dumper," but are curious to see by what special machinery the precise amount of the special duty will be determined. The Financial News says the prosperity of Canada is reflected in the budget. Mr. Fielding, a free trader in theory, even in practice, does homage o the doctrine. The paper commends the changes in the tariff, which should allay the fears of Britain that once a protective tariff is introduced it is bound to increase in severity. The Allan, Dominion and C. P.
