THE eye is a delicate organ; treat it right and it will treat you right. Quality of light is more essential to the eye than quantity of light. There is but one way to secure this beautiful light, which, because of its pure, warm, clear quality, has been called "bottled sunshine." Instal TUNGSTEN LAMPS. These lamps are a 'quality' product. They embody the highest developments and improvements in the art of lamp manufacture. With these your home becomes the home of beauty and light. Investigate the "TUNGSTEN" Lamp and see for yourself how its light adds to the comfort and pleasures of the home. We demonstrate them daily. We have 25; 40; 55; 60 and 100 Watt lamps.

Fair Dates Selected

The District Fair Association met in The District Fair Association met in Petrolea, Thursday, and arranged the fair dates as follow:—
Forest—Sept. 29, 30.
Strathroy—Sept. 20 to 22.
Petrolea—Sept. 22 to 25.
Sarnia—Sept. 27 to 29.
Wyoming—Oct. 1, 2.
Brigden—Oct. 4, 5.
Watford—Oct. 5, 6.
Alvinston—Oct. 7, 8

Alvinston—Oct. 7, 8.
Florence—Sept. 30, Oct. 1st.
Sombra—Oct. 11, 12. Glencoe-Sept. 27, 29.

There may be other corn cures, but Holloway's Corn Cure stands at the head of the list so far as results are concerned.

Fred Nowlen, a farm hand in Raleigh township, died as a result of a kick from a horse.

with the Mounted Rifles for overseas service were presented with wristlet watches by the citizens of the town.

The Downie Mutual Insurance Co., has raised the limit of insurance on one set of buildings from three to four thousand dollars.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

The world's most active volcano is Mount Sangay in South America, which has been in constant eruption since 1728.

AN OPTICAL ENIGMA.

Why Is It the Human Eye Sees Things Right Side Up?

Just why we are able to see things right side up is a mystery which science has not yet been able to explain.

We know that the human eye involves the same optical principles as a camera. Owing to the fact that light always travels in a straight line and never in a curve, the rays which emanate from any object within our range of vision have to descend and ascend in order to travel into the nar-row opening in the eye which corresponds to the camera's lens.

These rays finally reach a point where they intersect. Continuing on in straight lines, their relative position becomes just the reverse of what they were when they left the object seen.

Thus the image register on the retina of your eye is topsy turvy, just as it is on the photographic plate in a camera. If you are looking at a house, for instance, the image your eye gets will show the chimneys down below, the foundation walls up above, and so on.

But the impression your brain gets reveals the house right side up unless you happen to be afflicted with a rare disorder, which results in everything always appearing topsy turvy.

During the infinitesimally short period required to flash the image seen from the eye's retina to the brain all the light rays which created the image are reassembled and put back in their proper places, so that the brain sees the object as it really is and not in the topsy turvy form it was registered on the retina. Just how this miracle is performed is what science would like to find out.-New York American.

GRAVESTONE LUNCHEONS.

One of the Curious Sights of New York's Financial District.

In old Trinity churchyard, where Robert Fulton and Alexander Hamilton lie buried, dozens of girls can be seen through the pickets of the bronze fences every day enjoying their noon-day lunches amid the tombs of the old time New Yorkers. All about are high skyscraping office buildings. The elevated trains clatter and bang over-head, and on Broadway the trolley's gongs add tumult to the roar of the city. Within the old churchyard all is peace and quiet. It is here that the girls from these big office buildings come of a noontime to eat their lunch, "far from the madding crowd," yet within a hand's reach of the bustle of Broadway.

It was only a few years ago that

some girl, a typewriter in a nearby office building, chanced to let her eyes fall over the gravestones of old Trinity. They did not bring thoughts of ghosts to her mind-they only made her think that it would be lovely if she could eat her lunch among such peaceful scenes. The next day she and a girl friend brought their lunches. They entered the churchyard and, seeking a secluded spot behind the old church, sat down on an old tomb and began to eat their sandwiches. Nobody objected. The next day they came again. Other girls, emerging from stuffy restaurants, saw them and resolved to imitate them. The next day there were half a dozen there, and nowadays, when the noon hour is bright and sunny, the number has increased to sometimes seventy--New York Cor. Pittsburgh Dispatch.

Equality of Sex.

There is a little girl in Springfield, Mass., who, like many of her sex, resents the imputation that the feminine mind is not so strong as the masculine. One day her mother remarked on the apparent lack of intelligence in a hen.

"You can't teach a hen anything." she said. "They have done more harm to the garden than a drove of cattle would. You can teach a cat, a dog or a pig something, but a hen-never!"

"H'm!" exclaimed the child indignantly. "I think they know just as much as the roosters!"—Youth's Companion.

Mystery of the Stomach. "Why does not the stomach digest itself?" is a question often asked. The Journal of the American Medical Association confesses that the reason has not yet been found. There are many theories, but not one of them is entirely satisfactory, and we are still unable to say more than Hunter said more than a century ago, "that these living cells remain intact under such circumstances 'because they are alive.'"New York World.

Honesty the Best Policy. Doubtless the sorest man in the

United States today is the fellow who dropped his purse, containing \$90, while he was robbing a chicken coop, and who is afraid to claim his property. Verily, honesty is the best policy.-Pittsburgh Chronicle-Telegraph.

Something Learned. Farmer Clapole—Has that city feller who bought Stone's farm learned any-

thin' yit? Farmer Sands-Wall, he's larnt it don't do no good ter try ter make apple butter in a churn.—Judge.

A Missing Man. "What has become of the old fash-ioned man," asks the Cincinnati En-quirer, "who used to wear a yard of crape on his hat?" Perhaps he's married again.-Toledo Blade.

Both Bad. "Is there anything worse than owing money you can't pay?" "Yes; being owed money you can't collect."—Boston Transcript.

No one of us may do that which if

END OF THE EARTH.

The Latest Figuring Puts It Only Two Million Years Away.

Scientists tell us that life on the earth began about 2,000,000 years ago. It has generally been accepted that life will last for 95,000,000 years.

Ninety-five million years is a fairly long time. None of us who are alive today need worry about what will take place 95,000,000 years hence. Even the most altruistic can scarcely be inspired by love for an inconceivably remote But the French savants are alto-

gether disturbing. Here comes one, M. Verronet, who says that the earth will permanently freeze within the next 2,000,000 years and that life will vanish. This is bringing the tragedy nearer home. We would glady accept the older reckoning.

Verronet places mankind of today about midway between the beginning and the end. He computes that in the future life will exist as long as it has already existed. He specifies only one forty-eighth as long a life as those who have studied in the past.

There is only one consolation to be derived from the Verronet reckoning. As far as the influence of today is concerned 2,000,000 years is as good as 95,000,000. In either event those who are comfortably laboring today cannot expect to be lovingly remembered when the cataclysm of ice makes the earth a barren wilderness.-Cleveland

HIS TWO TENSE MOMENTS.

One Was a Ninth Inning and the Other at a Dinner Table.

I heard a prominent Cambridge man tell of the two most tense moments of his life yesterday. But the tension in each case was different.

"I doubt if I ever shall forget either occasion," he said reflectively. "They were big moments.

"The first was when I was in college, was captain of the baseball team that year. We came to the end of the ninth. We needed one run to tie the score and another to win the game. Two men were down and two on the sacks when I came to bat. And for once in my career I did it. I lined out a three bagger, right over the railroad track. When I felt it go-well, that

was one occasion.
"And the other." He chuckled, but a slow flush crept over his cheeks. was thirty years ago, soon after I left college. I went over to see a girl I thought was pretty nice and to meet her folks for the first time. I went on a Sunday. All the men were away. And they had duck for dinner." He stopped. "Ever carve a duck?" he asked meaningly. "No, neither had I before. Nor have I since." His flush deepened. "I never even went to see that girl again," he added plaintively .-Boston Journal.

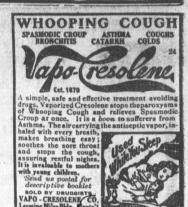

Once as 1 was botanizing under an oak I found among a number of other plants of similar height one that was dark in color with tightly closed leaves and a stalk that was very straight and stiff. When I touched it, it said to me in firm tones: "Let me alone. I am not for your collection, like other plants to which nature has given only a single year of life. I am a little oak."

So it is with a man whose influence is to last for hundreds of years. As a child, as a youth, often even as a full grown man-nay, his whole life longhe goes about among his fellows, looking like them and seemingly as unimportant. But let him alone. He will not die. Time will come and bring those who know how to value him.-Schopenhauer.

The Pill That Leads Them All.—Pills are the most portable and compact of all medicines, and when easy to take are the most acceptable of preparations. But they must attest their power to be popular. As Parmelee's Vegetable Pills are the most popular of all pills they must fully meet all requirements. Accurately compounded and composed of ingredients proven to be effective in regulating the digestive organs, there is no surer medicine to be had anywhere.

The Ontario Government is doing

The Ontario Government is doing something more to supply the wants of the Belgians, the contribution on this occasion being six carloads of beaus. This is valued at \$10,000. The supplies will go on the February boat from Halifax.
