-Considerable dissatisfaction is being expressed over the delay in the publication of the Canadian census returns. Three months ced, and within that time the census of on the marethe British Isles, with a population of over forty millions, has been taken and the toturns published. The slowness of the Canadian count needs an explanation. Surely it will not transpire that the population of the Dominion has decreased, and that the government is affaid to shock the country with the British Isles, with a population of over ernment is afraid to shock the country with such news. The report that the returns are not to be published till October can hardly be taken seriously, though it has received a wide publication. With the large staff of enumerators engaged, the census returns returns should have been in the hands of the people long before this.

The British Navy.

London, July 29.—The Navy League, a patriotic, non-partisan association of influential men, formed to create and direct popular sentiment in favor of maintaining a paramount British navy, has issued a manifesto concerning the present condition of the fleet. The manifesto declares:

"The Navy is supreme no longer. No more dramatic contrast exists than is presented by the actual condition of the main fighting fleet of Great Britain and the belief held by the public concerning their sufficiency and efficiency. The lesson of the Boer war appears to be still ueglected, owing to the fact that there is no thinking department at the Admiralty, whereby provision can be exercised to provide for the eventualities of war. The broad fact is that the fighting fleets of Britain are not ready for war."

The circular goes on to give details of the deficiencies in the Mediterranean fleet, which if they actually exist, show that the equadronics is heading in many of the first essentials of efficient equipment.

The Anchor line steamer Armenia, which left New York on Wednesday afternoon last for St. John, to load deals for the United Kingdom, is now a wreck at Negro Head, about seven miles down the bay, where she went ashore in a dense fog.

The steamer Erik, that has been chartered for a Polar voyage in search of Peary, the Arctic explorer, has arrived at Sydney and will fit out and sail on July 15.

Manufacturers' Agent.

Agent for Massey-Harris Machinery.

The largest makers of Farm Implements under the British flag.

I am offering to farmers this year the only 1900 patent on the market - the Massey-Harris No. ;

and 10, and No. 8 One-Horse Mower, varying in width of cut from 31/4 ft. to 7 ft.

This is an age of improvement. Why buy an old Mower when you can have a new, up-to-date machine. Do not send your money to the United States when you can buy a better machine in Canada. Patronize those who patronize you. The Massey-Harris

Co. pay Nova Scotia for raw material for the building of their machinery more than \$1.00 for every dollar received from N. S. for machinery. The Massey-Harris machin-

ery received highest awards at the Paris Exposition in 1900. The Massey-Harris Co.

know the wants of the N. S. farmer and they have constructed a mower that meets his

requirements, has lighter draft, is easier handled and more durable than any machine on the market. Over 5000 sold in Ontario last year, and have given universal satisfaction. This machine is so constructed that by bearing down on the lever when the outer end of the cutter bar is three feet from the ground the machine goes out of gear, preventing

any danger of damaging pitman rod or knife. It has more roller bearings than other machine; fitted with serated plates if required.
