

THE FARMER'S PROBLEM

WHAT POWER?

The Canadian Steel Airmotor

GALVANIZED OF PAINTED POWER and PUMPING

or the farm is the most economical, and will pay for itself in two years.

Steam and Gasoline Engines are Expensive and Dangerous

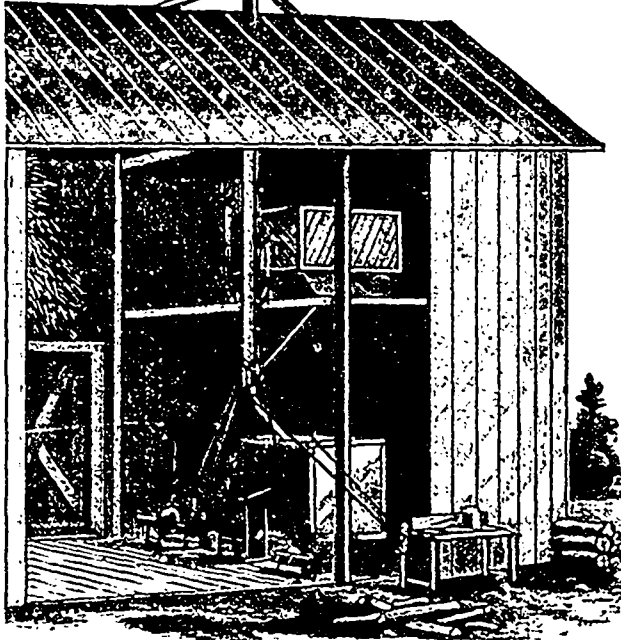

With bountiful crops you will need a first-class Grinder. Our

"Toronto" Grinder

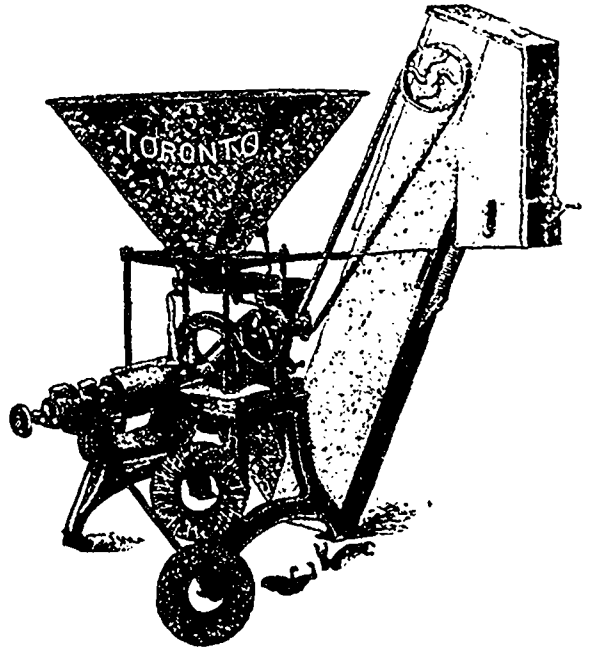

combines all the modern improvements, and is guaranteed to work satisfactorily.

With or without Bagger

Whilst visiting the Fall Exhibitions do not fail to see one

ONTARIO WIND ENGINE AND PUMP CO., LIMITED,

Liberty St., TORONTO (Adjoining Exhibition Grounds)

HON. THOS. BALLANTYNE, PRESIDENT

ROBERT BEITH, M.P., VICE-PRESIDENT

Farmers' Binder Twine Co., Brantford, Limited

The Opinion of the Canadian Farmers:

Give us to use, at any price, next season the Farmers' Binder Twine Company's make of Binder Twine. They are deserving of our fullest patronage, as inch by inch they fought their way into the hearts of our people against awful odds, and to-day stand recognized on actual merit, peers in the great deal as against all competitors, while they built up last season for themselves a proud record and one that cannot be easily effaced, carrying as they did their splendid Red Star Twine without change of price throughout the whole season at 7 1/4 cents until every ball of their 1500 ton output was exhausted.

JOSEPH STRATFORD, General Manager
