...THE DUVAL SEPARATOR...

removes Tares, Chaff, Oats, Wild Oats, Buckwheat and other hurtful grains from Wheat. Separates broken from whole Barley, and the Spelts from Heats and Peas, and cleans, grades and separates with little waste; gives clean seed for sowing and marks table grain for best price. It works easily and rapidly, will separate hurtful seeds from Alsike.

In writing please state the seeds which you find most difficult to get rid of in the grain you have to treat and we may be able to show you not only how to treat your ordinary crop, but how to turn apparently hopeless material into gold.

ESTIMATES GIVEN FOR
POWER SEPARATORS.
