

*Pamphila palæmon*, Pallas. (*Carterocephalus mandan*, Edw.) Eastman's Springs, June 19, several specimens. (Gibson and Young). The only previous record for the district was of a single specimen taken in the same locality some years ago by Dr. Fletcher.

*Ampelophaga versicolor*, Harr. A perfect specimen of this rare hawk-moth was taken at the Power House on the Britannia Electric Car Line, on Aug. 18, (Baldwin).

*Sphinx canadensis*, Bdv., July 6, (Baldwin). A very rare species.

*Apantesis virgo*, L. var. *citrinaria*, N. & D. A fine specimen of this rare variety, which has yellow hind wings instead of red, was taken on Aug. 4 by Mr. Baldwin. This is the first record of the variety having been taken at Ottawa. In a paper on the Genus *Apantesis* in the CANADIAN ENTOMOLOGIST, May, 1903, the only Canadian record then known, was of two specimens which had been reared from larvæ at Hamilton, by the late Mr. J. A. Moffat.

*Apatela radcliffei*, Harvey. Mature larva found on apple, Sept. 26. (Létourneau). The species is rare at Ottawa.

*Apatela juncralis*, Grt. Bred from larva found on maple, June 10. (Young). Dr. Fletcher had previously reared the moth from a larva found on birch. Other food plants are hickory, elm and apple.

*Apatela retardata*, Wlk., June 16, (Fletcher). June 12, (Gibson).

*Gortyna immanis*, Gn., Sept. 14, (Fletcher). This interesting species has not been found at Ottawa for some years.

*Papaipema pterisii*, Bird. In last year's Report this insect appeared under the name "*Papaipema harrisii*, var." but Mr. Bird has since decided that it is not a variety of *harrisii*, but a new species, and has described it under the above name. The larva has been found in the bases of the fronds of the Common Brake. (*Pteris aquilina*).

*Hydriomena contractata*, Pack., Ottawa, 10 Sept., (Fletcher). Only two or three specimens of this geometrid moth have been taken at Ottawa.

*Phlyctenia acutella*, Wlk. A specimen of this rare pyralid was taken by Mr. Young. Mr. Metcalfe took a specimen at Toronto some years ago.

*Enarmonia americana*, Wlsm. June 11, (Gibson). A handsome little species not taken here before.

*Sparganothis flavibasana*, Fern. The larvæ of this tortricid
