

TORONTO MOWER NO. 4

This Great Meadow Monarch is Immensely Popular, 35,972 have already been sold and now being in actual use.

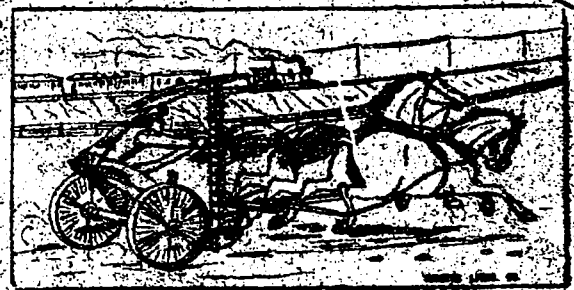

For steady, even, clean and powerful cutting no mowing machine has ever been designed that can equal the Toronto Mower. It is made exceptionally strong, and for rough land its equal is not known. It is often used on rough land, where it would be most unsafe to venture with other styles of machines. It can be used for underbrushing a swamp. The Toronto Mower is the only machine which practically admits of the cutter bar being raised to an upright position with the knife in full motion. No stopping required with the "Toronto" in passing obstacles.

Admirable Patented Pitman Connections.

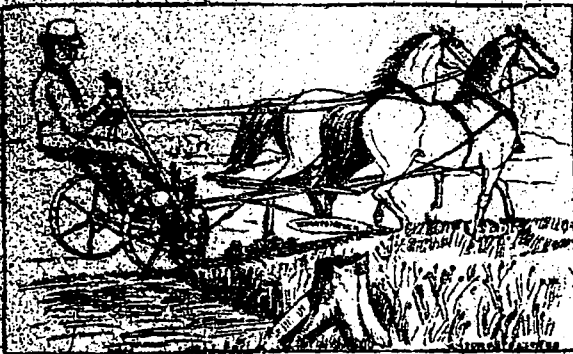

As when out of gear the only two big wheels on it are three wide apart and the machine is like a sulky, and with the free spring seat rides almost easy. The Guards are of tested malleable iron, head with larger plates of steel made at our own works. The Bearings are made of best Royal-Nickel steel, specially imported by ourselves for this purpose. These, as well as the Ledger Plates, are made by ourselves. Our Knife and Bar Department is thoroughly equipped and constitutes a large industry in itself. The Cutter Bar is made and is thoroughly tested before being fitted with guards and knives. A lead wheel in the middle also carries the cutter bar over inequalities of the land.

ALWAYS READY.

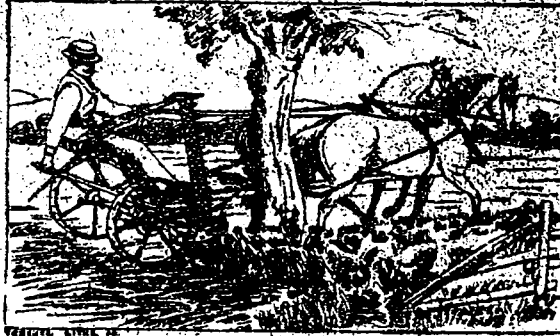

LET HER GO! NO HARM CAN COME.

LIGHTEST DRAUGHT.

OVER A STUMP—KNIFE IN FULL MOTION.

EASIEST OPERATED.

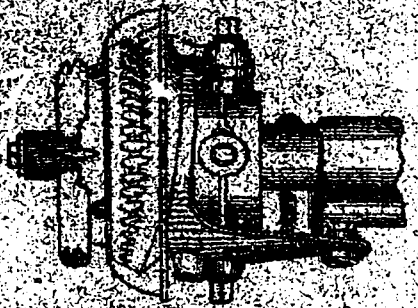

PASSING A TREE—KNIFE IN FULL MOTION.

POWERFUL.

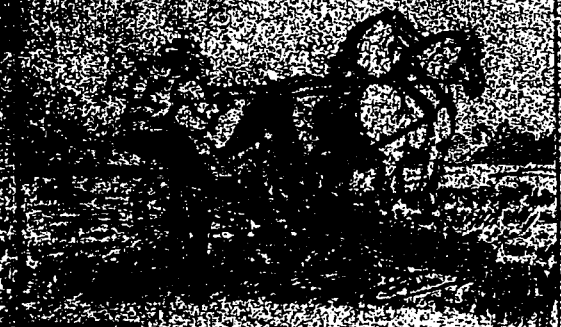

In every detail this celebrated mowing machine will be found to excel. The Pitman connections are ball and socket and all slack from long wear can easily and quickly be taken up by simply turning a nut. No mower extant has such perfect adjustments to adopt it to all circumstances.

The "Toronto" is not drawn from the pole. A draft rod attached to the main frame connects with a sliding device on the pole, thus connecting the horses directly with the cutter bar.

DURABLE

The Wonderful Differential Gear.

WORKING—KNIFE IN FULL MOTION.

STURDY

The machine is made of the best material and is built to last. It is designed to be used in all climates and on all kinds of soil. The differential gear allows the machine to run on uneven ground without any loss of power. The cutter bar is made of the best steel and is fitted with the most durable knives. The machine is easy to operate and requires little attention. It is a true mowing machine and will give you the best results for your money.
