

THE CANADIAN CONNECTION

These and other uses of videotex demonstrate the growing recognition that the medium is highly effective, not only for large commercial services, but also for hundreds of in-house or special-purpose applications.

Canadian electronics, systems and service companies, leaders in NAPLPS videotex technology and applications, have designed many of the systems and services described in this booklet. Most companies and organizations interested in exploring Telidon-based services are choosing products and services from north of the border, because of the recognized leadership of Canadian companies in the field of NAPLPS - videotex.

For more information on Canadian designed and built NAPLPS systems and services, contact:

Brian Casey
