

present standard and requirements of the Province". As can be seen from a comparison of the Direct Expenditure in 1908 with that in 1934, the activities of the School for Teachers have increased far beyond those contemplated in 1907 and out of all proportion to the increase in income.

At the present time a Special Committee appointed by the Board of Governors at the University is studying, primarily from an academic point of view, the whole question of the relationship between the Department of Education at McGill and the School for Teachers, and is considering the possibility of these two being amalgamated and operated at Macdonald College under a new Agreement with the Province. Subject to the recommendations of this Committee, it is recommended that the University endeavour to enter into an agreement with the Educational Authorities and the Province of Quebec, whereby the School for Teachers training Public School teachers and the Department of Education giving High School teaching diplomas, would be carried on at Macdonald College with the College supplying the necessary facilities of buildings, grounds, etc., but the instruction being carried on at the expense of the Department of Public Instruction. Students would continue to pay their board and lodging as they do at the present time and would continue to be under the authority of the College for the purposes of discipline, but the salaries and miscellaneous expenses incurred would be the responsibility of the Provincial Government.

Your Committee has formed the opinion that the total contribution from Macdonald College and McGill University towards the training of Protestant Teachers in the Province of Quebec should be the provision of the land and buildings necessary for operating a School for Teachers, the complete maintenance of such land and buildings, the accounting services and administration. At the present time all these facilities and services are being supplied and in addition the College is making itself responsible for Direct Expenditure of nearly \$22,000.00 per annum.
